TWO VERSIONS of D07

There are two versions of D07 dash cam, the Micro USB charging port and the Type-C charging port.

Micro USB D07:

- APP: "LuckyCam"
- 4 Hardwire kit Asin: B09NPS1LS9
- Extension Cord Asin:B0814ZHHST
- Separate rear view camera cable

Type-C D07:

- APP: "Ucam"
- Hardwire kit Asin: B09QSQ3XST
- Extension Cord: B09TFHQW81
- Rear view camera is connected to the type-c car charger cable (Details as the right picture)

Rear view camera and type-c car charger are on the same cable

Please reach us ASAP if professional help needed. **32GB TF SD** card/ Hardware Kit/Extension Cable, you can choose one for free. (Shipping address needed)

MICRO USB

TYPE-C

Q: How to download the app for the mini dash cam/Where could I get the app for the mini dash cam?

A: IOS / Android Devices: search "LuckyCam" or "UCam" on App Store / Google Playstore.

Q: How to find my videos/pictures in the mini dash cam?

A: If your D07 has micro-usb port, below steps can help you:

- Stop Recording: Short press power button
- Enter Photo Mode: Long press Menu button
- Take a Photo: Short press power button
- Enter Playback Mode: Long press Menu button again to enter playback mode from photo mode
- View List: Short press Up/Down button to browse videos and photos

Q: Why can't my dash cam be turned on? /Why does my dash cam automatically turn on and off after using it for a period of time?

- Pls confirm whether you're using the original accessories first. If not, pls use the original accessory and check the problem.
- If your D07 has micro-usb port, It may caused by the poor connect of the magnetic part in the bracket, you can pull it out first and then wipe the magnetic thimble then back it to check whether it can turn on.

It may caused by the accessories, you can check as below: 3-1 Check whether the car charger cable is good Pull out the SD Card&Rear view camera&Car charger, use a micro usb cable(if you have), one side connect to the computer, another side connect to the power port. Then check whether the cam can turned on

If yes, it may be the problem of car charger cable, you can tell us your address to get one new car charger.

If still don't work(or you don't have a micro usb cable), pls connect the car charger cable only and then use a toothpick to press the "R" in the bottom of the dash cam for a while to check whether it can turned on. If still don't work, pls **CONTACT US** to get further help.

3-2 Check other accessories

If D07 can work well when connected the original car charger cable, pls connect the other accessories one by one and check as former. If there is a problem after connected to a certain accessory, pls tell us, that might be the problem.

Or you can tell us for any question.

Q: How to connect WIFI?

A: You should download the app first, then connect the WIFI as below steps:

- 1 Turn the WiFi on: Long press the UP button to turn on
- Find the WLAN on your phone and link it (password: 12345678 or check it on the screen on dash cam).

Note

We have tested almost all common smartphones with Android, ios system on the market. If there still has problems connecting to the app, please feel free to CONTACT US. We will give technical support.

Q: Why the app keeps disconnecting. How can I fix this?

A: The available distance of the WIFI connection is 9-15ft, and it will be automatically disconnected if out of the range.

If still disconnect within this range, you can forget the WIFI in your phone and restart both the mini dash cam and your phone, then re-connect.

Problem still exist, pls tell us to get further help.

Q: SD Card error occurs/The SD card isn't compatible with the mini dash cam/After formatting card in device, it intermittently fails requiring to format again.

A: Please format the SD card or replace the SD card. Recommended TF Card Asin: B084CJ9T2R

Note

Class 10, U3 Speed Micro-SD Card for 4K Video is required. We recommend SAMSUNG Class 10, U3 Speed Micro-SD Card. Please DON'T USE any "SanDisk Ultra" or "Generic Class 10 for HD Video" Cards from third party sellers. They are NOT made for 4K high-end dash cam. If you have any problems about SD card, please tell us and we will support you to solve. Avoid fake cards.

Q: Won't loop recording/Loop recording doesn't work/Stop recording after recording a video.

A: Please format the SD card first. If still doesn't work, you can replace the SD card.

Or CONTACT US directly, we will help you solve it.

Q: After connected to WiFi, phone shows no network.

A: Because the main function of D07's WiFi is to play back video, it does not have the function of surfing the Internet, which means that after the WiFi is connected, it will show that there is no network. But the APP can be used normally.

Q: The cord is too short for my car

A: If the car is large(such as trucks, RVs, etc.) the cable of the rear camera will be a little short.

We have 50ft extension cable to solve this problem, if you want, please contact us!

Micro USB D07 Extension Cord Asin:B0814ZHHST Type-C D07 Extension Cord: B09TFHQW81

Q: My date and time is constantly changing/I have to reset the date&time again and again.

A: Please set [Timezone] before setting Date/Time.

Q: How to connect the hardwire kit.

A: Pls connect the yellow cable to BATT/B+, red cable to ACC, black cable to GND.

Q: How to find the BATT, ACC correctly/Why the battery still drain out after connected to the hardwire kit.

A: BATT with electric all the time no matter the car is on or off, ACC only have electric when the car is on, you can use an voltage tester pen to check it accordingly. If you're still not sure about it, please provide your fuse box drawings to us, we will let our technical department to help you find it. If you connect both the yellow and red cable to the BATT, it will cause the battery drain out

Great Customer Service
