KEYS AND PARTS

Your phone

This user guide applies to the following models: TA-1611, TA-1613, TA-1621, TA-1617.

- | | |
|-------------------------|------------------------|
| 1. Scroll key | 6. Right selection key |
| 2. Call key | 7. Power/End key |
| 3. Left selection key | 8. Flashlight |
| 4. Earpiece/Loudspeaker | 9. USB connector |
| 5. Headset connector | |

Some of the accessories mentioned in this user guide, such as charger, headset, or data cable, may be sold separately.

Note: You can set the phone to ask for a security code. Select **Menu** > **Settings** > **Security** > **Keyguard** > **Security code**, and enter a code. Note, however, that you need to remember the code, as HMD Global is not able to open or bypass it.

Parts and connectors, magnetism

Do not connect to products that create an output signal, as this may damage the device. Do not connect any voltage source to the audio connector. If you connect an external device or headset, other than those approved for use with this device, to the audio connector, pay special attention to volume levels.

Parts of the device are magnetic. Metallic materials may be attracted to the device. Do not place credit cards or other magnetic stripe cards near the device for extended periods of time, since the cards may be damaged.

SET UP AND SWITCH ON YOUR PHONE

 **Note:** Pre-installed system software and apps use a significant part of memory space.

Open the back cover

1. Put your fingernail in the small slot at the side of the phone, lift and remove the cover.
2. If the battery is in the phone, lift it out.

Insert the SIM cards

1. Slide the SIM card in the SIM card slot.
2. If you have a dual-SIM phone, slide the second SIM in the SIM2 slot.

Both SIM cards are available at the same time when the device is not being used, but while one SIM card is active, for example, making a call, the other may be unavailable.

Tip: To find out if your phone can use 2 SIM cards, see the label on the sales box. If there are 2 IMEI codes on the label, you have a dual-SIM phone.

Insert the memory card

- 1. Slide the memory card in the memory card slot.
- 2. Put back the battery.
- 3. Put back the back cover.

Use only compatible memory cards approved for use with this device. Incompatible cards may damage the card and the device and corrupt data stored on the card.

 **Tip:** Use a fast, up to 32 GB microSD memory card from a well-known manufacturer.

RESTORE FACTORY SETTINGS

WARNING: Restoring factory settings will erase all data on the phone.

Restoring factory settings will erase all data on the phone, including contacts, messages, photos, videos, and apps. It will also reset all settings to their default values. Use this option only if you are selling the phone or if you are having trouble with the phone.

Before restoring factory settings, make a backup of your data. If you are not sure how to do this, contact your service provider or Nokia support.

Restoring factory settings will take some time and the phone will restart several times.

1. Go to **Settings** > **System** > **Reset factory settings** to restore factory settings.
2. Confirm the reset by tapping **Reset factory settings**. The phone will restart and restore the factory settings.

BATTERY AND CHARGER INFORMATION

Battery and charger info

To check if your phone has a removable or non-removable battery, see the printed guide.

Devices with a removable battery Use your device only with an original rechargeable battery. The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, replace the battery.

Devices with a non-removable battery Do not attempt to remove the battery, as you may damage the device. The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, to replace the battery, take the device to the nearest authorized service facility.

Charge your device with a compatible charger. Charger plug type may vary. Charging time can vary depending on device capability.

Battery and charger safety info

Once charging of your device is complete, unplug the charger from the device and electrical outlet. Please note that continuous charging should not exceed 12 hours. If left unused, a fully charged battery will lose its charge over time.

Extreme temperatures reduce the capacity and lifetime of the battery. Always keep the battery between 15°C and 25°C (59°F and 77°F) for optimal performance. A device with a hot or cold battery may not work temporarily. Note that the battery may drain quickly in cold

temperatures and lose enough power to switch off the phone within minutes. When you are outdoors in cold temperatures, keep your phone warm.

Obey local regulations. Recycle when possible. Do not dispose as household waste.

Do not expose the battery to extremely low air pressure or leave it to extremely high temperature, for example dispose it in a fire, as that may cause the battery to explode or leak flammable liquid or gas.

Do not dismantle, cut, crush, bend, puncture, or otherwise damage the battery in any way. If a battery leaks, do not let liquid touch skin or eyes. If this happens, immediately flush the affected areas with water, or seek medical help. Do not modify, attempt to insert foreign objects into the battery, or immerse or expose it to water or other liquids. Batteries may explode if damaged.

Use the battery and charger for their intended purposes only. Improper use, or use of unapproved or incompatible batteries or chargers may present a risk of fire, explosion, or other hazard, and may invalidate any approval or warranty. If you believe the battery or charger is damaged, take it to a service centre or your phone dealer before continuing to use it. Never use a damaged battery or charger. Only use the charger indoors. Do not charge your device during a lightning storm. When charger is not included in the sales pack, charge your device using the data cable (included) and a USB power adaptor (may be sold separately). You can charge your device with third-party cables and power adaptors that are compliant with USB 2.0 or later and with applicable country regulations and international and regional safety standards. Other adaptors may not meet applicable safety standards, and charging with such adaptors could pose a risk of property loss or personal injury.

To unplug a charger or an accessory, hold and pull the plug, not the cord.

Additionally, the following applies if your device has a removable battery:

- Always switch the device off and unplug the charger before removing any covers or the battery.
- Accidental short-circuiting can happen when a metallic object touches the metal strips on the battery. This may damage the battery or the other object.
