

## **EasyClean Home**

### How-to Connect the Suction Hose to the Tool Attachment

CA0701UK

## How-to guide

1. Ensure the carpet cleaner is in the upright position.

Open the suction hose door.

2. Insert the suction hose into the suction hose opening. Ensure the two hose release clips are locked into place. The carpet solution delivery tube should be facing upwards.

3. Remove the cap from the carpet solution outlet.

4. Connect the solution delivery tube to the carpet solution outlet.

5. Turn clockwise to lock it into place.

6. Ensure the dirty water tank is secured into place.

7. Select the preferred tool attachment and slide onto the end of the suction hose until it clicks into place.
