# iShare

Wireless projection system

designed by infobit

What is iShare?

Infobit iShare allows you to project what's on your laptop or mobile devices, on a presentation screen, transforming your meeting room to be wireless, collaborative and complete sharing with a single click. Designed for intuitive meeting collaboration to empower people in business and education.

1 Features

Go Wireless

Infobit iShare universal USB-A dongle avoid the unsightly jumble of cables and adaptors. It creates clean, tidy and comfortable meeting room without any additional adaptors or rummage under the table. Go wireless, you'll spend less time setting-up and more productive and effective.

2 Features

No Software Installation

iShare couldn't be easier. Plug the USB dongle into your laptop, wait a few seconds for it to establish connection with the receiver box connected with your display via HDMI, and press on the dongle to start present. No connecting to Wi-Fi is needed with this plug and play feature.

infobit

3

Instant Show/ Hide

Frequently, users want to temporarily hide the screen from the mass or due to privacy. iShare allows you to hide your projection by only single click on the dongle instantly and show it with another simple click.

4

Cross-Platform

iShare works on any PC or Mac, but what if you want to project content from your mobile devices? It supports AirPlay and Miracast technologies built in to project your content.

infobit

Features

Multiview

Physical cable connection allows only one user projection from one device at a time. iShare supports single view, 1x2 split view or 2x2 quad-view. Supports up to 16x input sources connected simultaneously.

iShare frees everyone to share what's on their device, on the same display, simultaneously. Anyone can connect with one click and present straight away. Just walk into any meeting room and share what you want to, no matter which device it's on- no cable switching and no set-up procedure.

Multiple Users Collaboration

7 Features

Guest Friendly

iShare works for everyone including visitors that show up in your office for the first time. As there's no need to install any driver or ask your company's Wi-Fi password, meetings start and end on time by the so easy click-and-present way.

8

Touch Back Control

With the interactive display or whiteboard, you can control your source PC/Mac by manipulating or annotating without any cable connected or walking back to your seat.
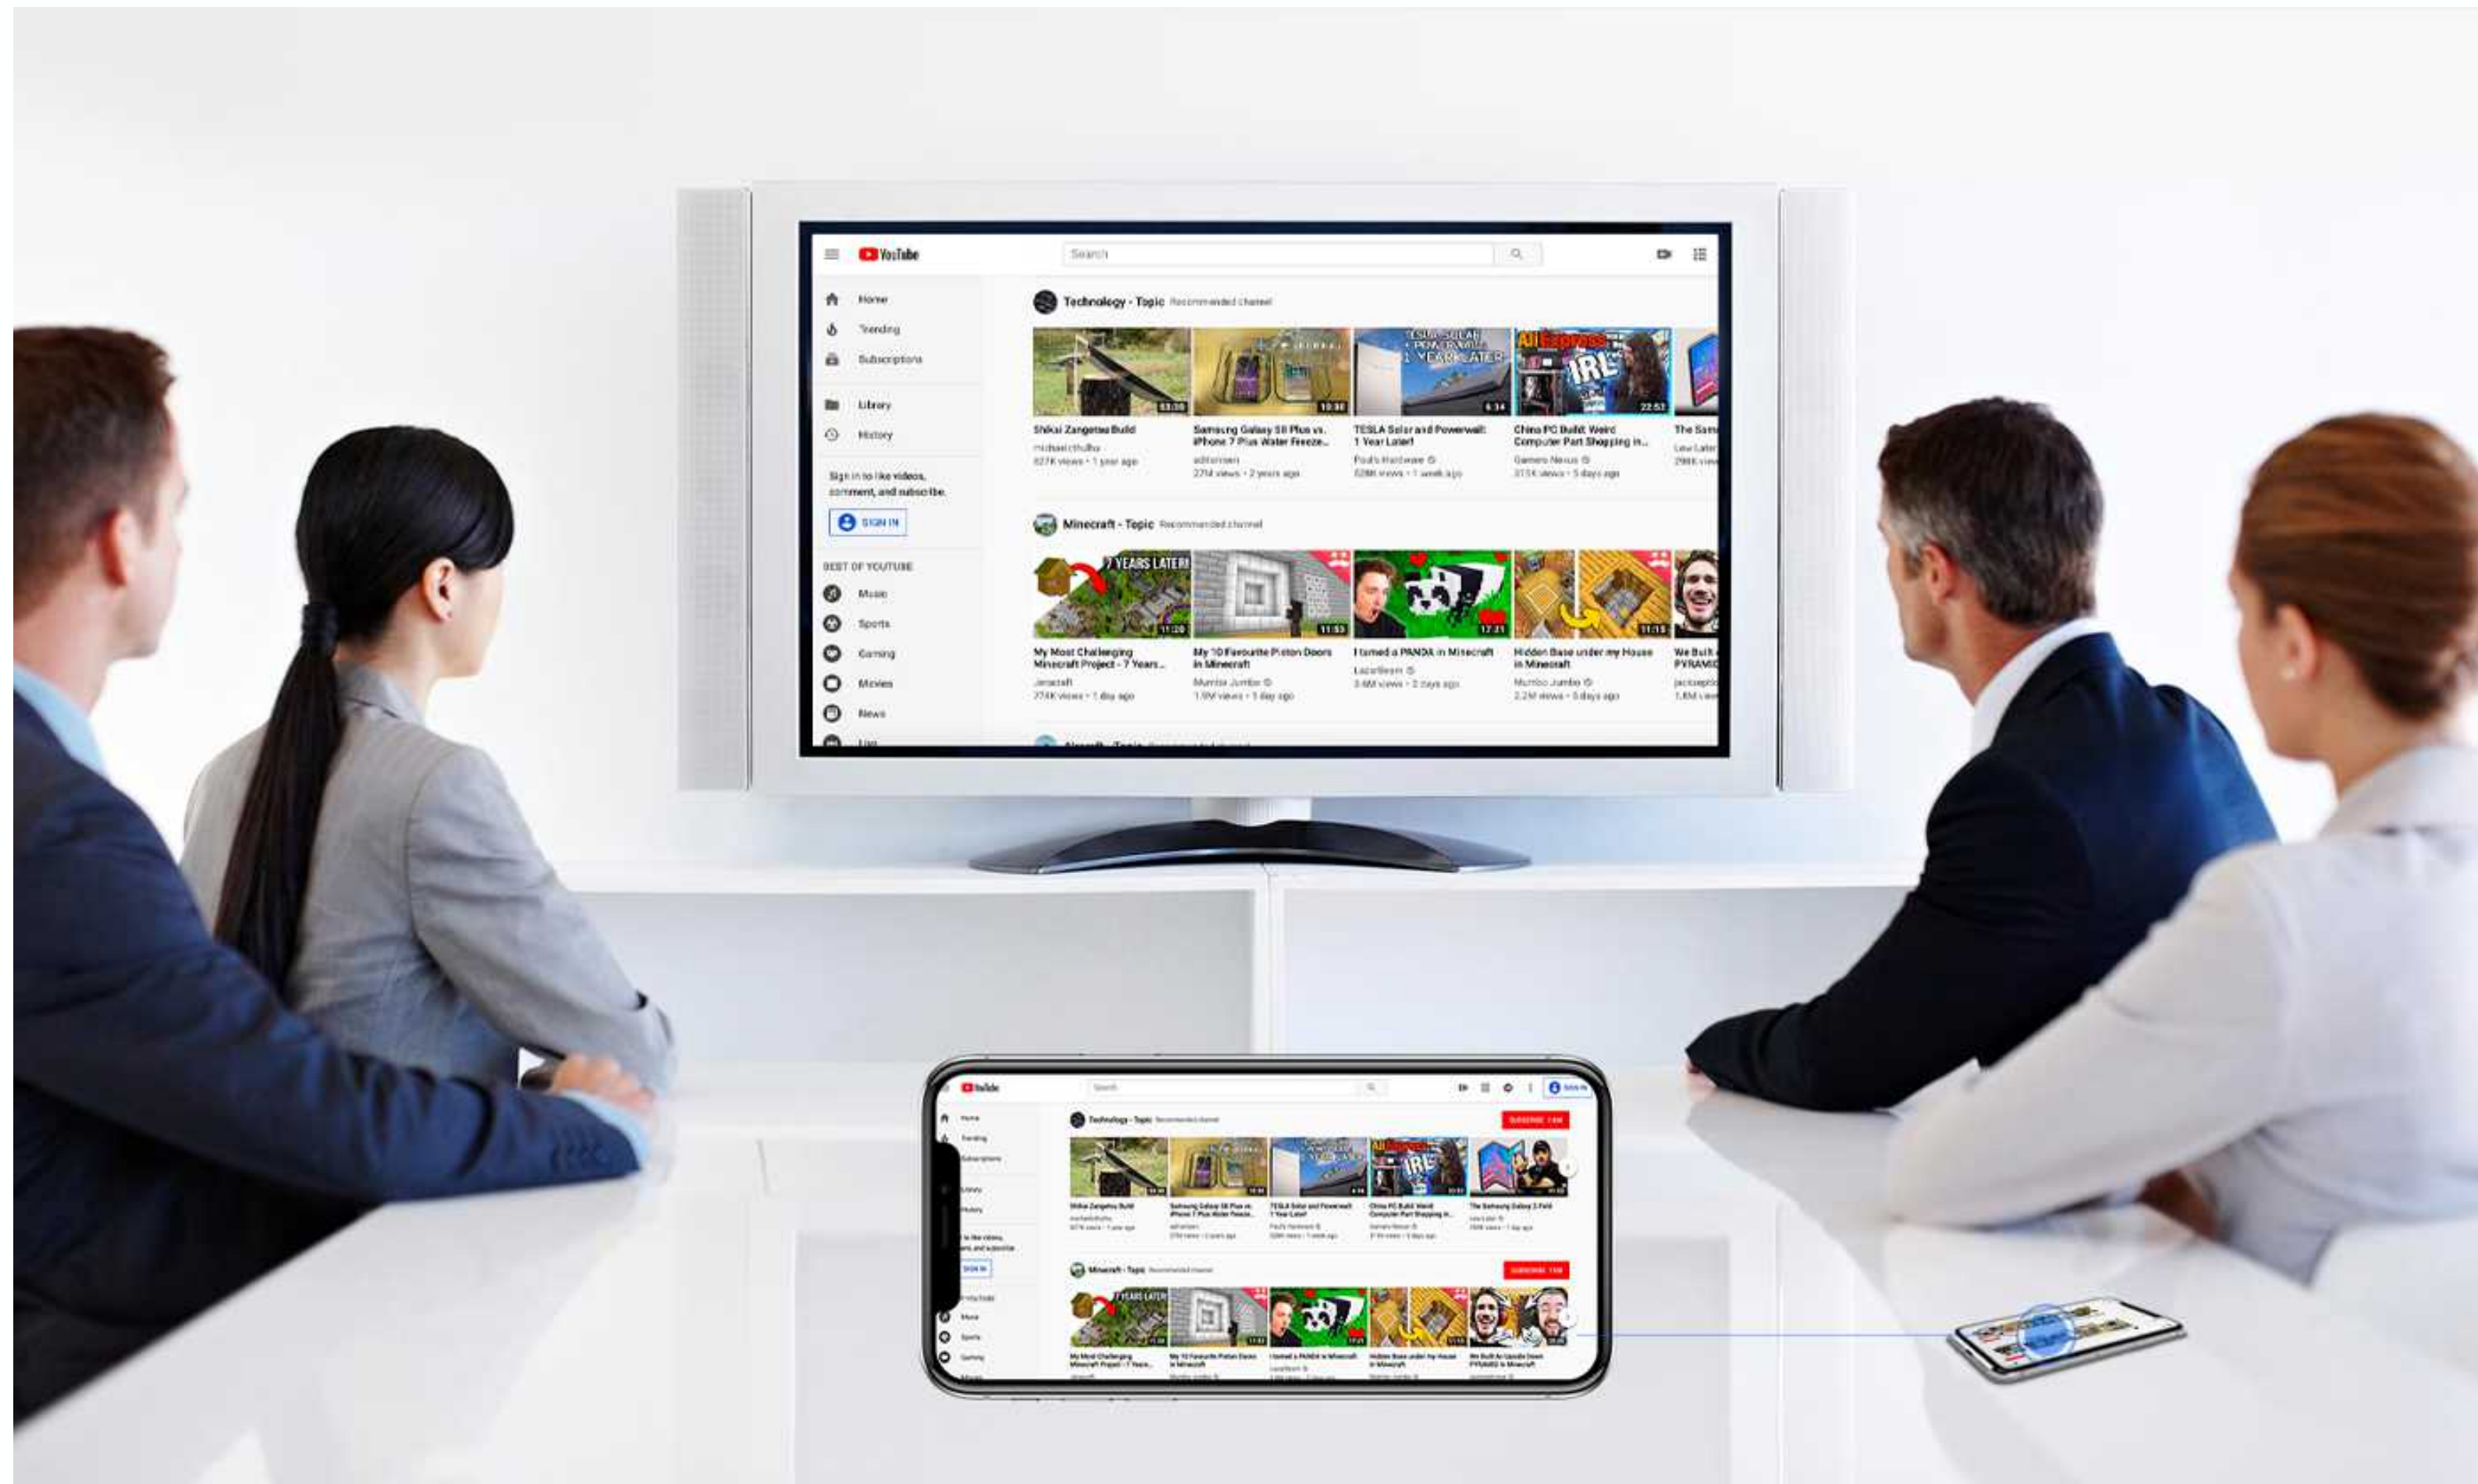

infobit

9

4K UHD 60Hz

iShare receiver supports up to 4K60Hz via HDMI connection to the display. The USB dongle support up to 1080p/ 60Hz and a latency of 0.1s.

Note: 60Hz under Windows 10.

Dual-WiFi

What if you want to use internet when casting your mobile device which is connecting the meeting room Wi-Fi without internet? iShare is the first in this industry to support Dual-WiFi technology that allows you to visit the internet while casting or show on-line contents.

infobit

11 Features

Android Casting with Audio

iShare is the first in this industry to support casting video and audio together from Android devices (conventionally, only iOS devices with audio).

Separated Audio

What if your display does NOT have built-in speaker? iShare receiver box provides 3.5mm separated audio output to connect your standalone speaker/ Sound Bar.

infobit

13 Features

Landscape or Portrait

iShare supports both landscape and portrait display installation. It supports 0, 90, 180 and 270 degrees image rotation which allows you to present your mobile device in full screen without any stretch.
