

elipson® | Chroma 200 RIAA

TURNTABLE

A belt-driven manual turntable with an elegant design, with our latest technologies.

The Elipson Chroma 200 RIAA is a belt-driven manual turntable with an elegant design, with our latest technologies and can be connected directly to any amplifier or active speaker. Assembled in France in our premises, the Elipson Chroma 200 RIAA offers the characteristics that contributed to the success of the Alpha models such as the OTT (Orbital Torsion Tonearm) tonearm in aluminum, its digital processing system of the motor rotation. It is distinguished by a new axis system for an even more precise rotation, an improved drive motor with optimized damping, a graduated counterweight, as well as by the addition of a cue control lever for your comfort of use.

Its integrated Phono-RIAA circuitry offers all the features of more expensive separate components with a choice of moving magnet and moving coil cartridge as well as a very high and faithful resolution of vinyl record signals.
