Power Switch

2.4G Wireless Connection

- Remove the battery cover, and insert the battery/The keyboard requires one AAA battery, and the mouse requires one AA battery. When installing the batteries, please ensure that the positive and negative terminals are placed correctly.
- Take out the receiver.
- Turn the power switch to ON.
- Press and hold the "Esc" key and the "v/v" key simultaneously for 3-5 seconds. Release the keys when the power indicator lights up red.
- Depending on the operating system of your computer, select the correct operating system on the keyboard. Switch by pressing the Win System Button or OS System Button, and the indicator light above will light up green.

Frequently Asked Questions

How to deal with disconnection issues, keys repeating or typing & clicking delay?

- Please replace new batteries in time. A low battery can affect the performance of the keyboard/mouse.
- If the issues persist, try to connect the keyboard/mouse to other devices to check if the same issues occur and don't hesitate to contact our customer service for assistance.

How to deal with keyboard/mouse won't turn on or stops working?

- Please note the positive and negative poles when installing the batteries.
- Try to change another new batteries to confirm whether it is a battery issue or a fault with the keyboard and mouse.
- If the power indicator of the keyboard/mouse does not light up at all, please do not hesitate to contact our customer service for assistance.

Why can't I switch to OS system? The indicator light doesn't turn green after I press the OS key?

- Please ensure that the receiver is fully inserted into the Type-C port without any gaps. That is, the port needs to completely cover the receiver, otherwise you may not be able to connect the device and switch to the OS system. If the issues persist after confirmation, please do not hesitate to contact our customer service for assistance.

How to Re-pair Keyboard with Receiver

- Unplug the receiver, turn the power switch to ON.
OR
- Plug the receiver into the USB-A or Type-C port of the computer, and the keyboard and mouse will connect automatically.

How to Re-pair Mouse with Receiver

- Unplug the receiver, turn the power switch to ON.
OR
- Press and hold the left button, scroll wheel, and right button simultaneously for 5-8 seconds. Release the buttons when the indicator light at the bottom of the mouse lights up red.
