

Operation Manual

SMH-SOCKET-1

Smart Wi-Fi Plug (Works with Amazon Alexa / Google Assistant)

Introduction

Control electrical devices, such as lamps and more with the Smart Wi-Fi Plug. This convenient smart plug comes with a 110 / 240V AC socket, allowing you to plug in various devices to control remotely. The compact design also makes it easy to plug into various outlets without taking up space. Aside from control with the app using a smartphone / tablet, integration with Amazon Alexa and the Google Assistant also allows voice control with a smart speaker.

Features

- Switch electrical devices on / off with app on iOS or Android
- Works with Amazon Alexa and Google Home for voice control of electrical devices
- IFTT compatible. Automate tasks and perform customized actions
- Compact design to fit into various outlets (2.13" L x 1.12" D)

Operation

1. Download "**Smart Life**" from the Apple app store or Google play store and launch the app
2. Register and login to your account
3. Plug in the smart plug
5. Hold the power button on the controller for 5 seconds until the power indicator flashes repeatedly
6. Add a device from within the app
7. When selecting the device type, tap "**Electrical outlet**" from within the categories
8. Make sure the smart plug power indicator is still flashing repeatedly. If it is, then tap confirm
9. The app will now add the smart plug as a device

WARNING: Please make sure you are plugging in the smart plug to a 110-240V AC outlet

Google Assistant / Google Home Control

1. In Google Assistant, tap the blue icon located on the right hand side of the screen
2. In the Explore tab, find "**Smart Life**"
3. Link your account to add your devices to the Google Assistant
4. In Google Home, tap the menu icon on the top left hand side of the screen
5. Tap the "**Home control**" category
6. Tap the + icon on the bottom right hand side of the screen
7. Scroll down until you find "**Smart Life**"
8. Link your account to add your devices to Google Home

Alexa Control

1. Choose "**Skills**" in the options bar in the Alexa app. Search "**Smart Life**" in the search results and then click "**Enable**"
2. Link your account to add your devices to Alexa
3. Once your account is linked, there should be a message to discover your devices. Devices need to be discovered in order for Alexa to function

Specifications
