

IONIQ 5

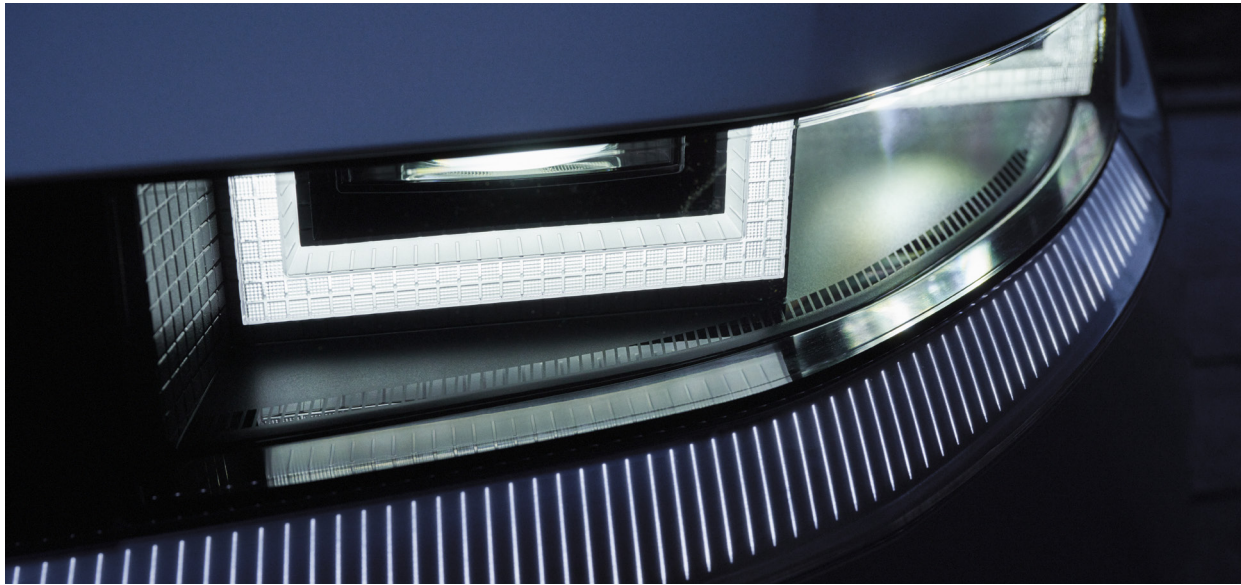

IONIQ

Power your world.

Hyundai is at the forefront of zero emission vehicle technology and is recognised as a leader in producing highly efficient electric vehicles. With IONIQ 5, we've taken this expertise and combined it with the highest level of progressive design to produce what has already become one of the most desirable models in our history. IONIQ 5 doesn't change the game; it moves our electric vehicle offering on to a whole new level.

Equipped with an 800-volt battery system for ultra-fast charging and delivering a driving range of up to 298 miles¹, it has been created to take you further – with faster charging and sleeker style. Advanced connectivity and driver assistance features will offer the ultimate in-car experience while ensuring a high level of safety. Plus, Vehicle to Load (V2L) technology enables charging of domestic electric items – you can even trickle charge another electric car.

¹72.6kWh battery variant WLTP. Actual results may vary.

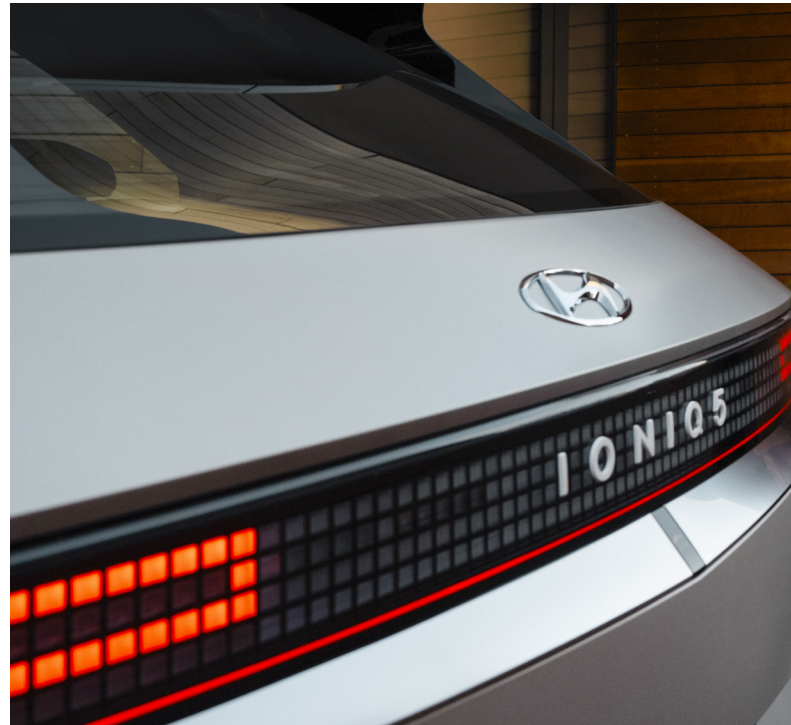

Distinctive LED headlamps with 256 Parametric Pixels.

Bold. Unique. Pure.

The IONIQ 5's pure design is a refreshing take on electric vehicles, stripping away complexity to celebrate clean lines and minimalistic structures. The unique clamshell bonnet spans the entire width of the car, minimizing panel gaps for a clean, high-tech look. The LED lighting showcases its signature 256 Parametric Pixels – jewel-like design elements that will feature on the exterior of all future IONIQ models.

Aerodynamic 20" diamond cut alloy wheels – Ultimate trim.

Signature Parametric Pixel rear light design.

Live, drive, work, relax.

Inside the IONIQ 5, the lines between living space and moving space blur. Our new, dedicated electric vehicle platform results in unique proportions and an elongated wheelbase, giving us the opportunity to re-create the interior as a whole new in-car experience. The interior was designed with space and flexibility in mind – from front seats that can be fully reclined, to the sliding centre console that can be moved back and forth to accommodate space and provide access to extra storage and USB ports. The unique experience isn't just limited to space and flexibility either. Inside the car, you'll find environmentally friendly materials are used throughout, from the carpet and roof liner to the seat covers – even the door panel inserts. Materials include eco-processed leather, yarn made of crushed recycled PET bottles and raw materials extracted from sugar cane – all of which are durable, look great and add to the car's premium feel.

The finer details.
