REPLICATING NATURE.

Product Portfolio Fall 2018

signia

Life sounds brilliant.

Signia.

## Taking the future of a sound legacy to the next level.

We invent the future of better hearing. Beginning with Siemens, this has been our consistent mission for 140 years and counting – the greatest legacy in the industry. As hearing aid pioneers, we have introduced countless world's firsts and now we are continuing this success story by expanding the portfolio of our game-changing platform Signia Nx and enhancing the world of hearing aids.

Hearing solutions for everyone.

With Signia hearing aids, you can offer your customers a wide selection from many different models and performance levels for every requirement and all degrees of hearing loss. To facilitate orientation and help in the selection of the right hearing solution, our hearing aids are placed in three categories according to their construction models. This lets you find out quickly which model best suits a customer's wearing preferences.

Contents

The degrees of hearing loss indicated above serve as a rough guide. For precise information, please refer to the individual product pages.

Hearing aids overview.

We offer a broad range of hearing aids in many different models and performance levels to help hearing care professionals meet their clients' needs, preferences and demands. Take advantage of this diversity to enhance your customers' satisfaction.

Signia **Nx** feature overview.

Our game-changing platform Signia Nx delivers the most natural own voice and the best speech understanding in noise, while combining the most advanced connectivity systems.

Features	Information	Performance levels		
Audiology		7Nx	5Nx	3Nx
OVP™ (Own Voice Processing)	Own Voice Processing (OVP™) utilizes real-time recognition of the wearer's voice to deliver a natural own-voice impression. Available for RIC/BTE devices with Ultra HD e2e.	●●●●●	●●●●●	●●●●●
3D Classifier	Unlike conventional classification systems which rely on acoustic data, 3D Classifier analyzes multi-dimensional information from the wearer's environment and communication behavior. Information on the wearer's voice activity, motion state, and acoustic data are used to tailor the hearing aid's response to the wearer's needs. Motion detection available for Bluetooth-equipped devices.	●●●●●	●●●●	●●●
Sound Clarity	Sound Clarity provides lifelike sound which covers the full spectrum of wearing situations. Exceptional clarity is achieved with features such as: HD Spatial, extended dynamic range, extended bandwidth, EchoShield, HD Music, eWindScreen™, speech and noise management and feedback cancellation.	●●●●●	●●●●	●●●
Speech Quality	Speech Quality delivers improved understanding of other people's voices in noise by using an exclusive technology called Ultra HD e2e. Features which utilize Ultra HD e2e include narrow directionality, Spatial SpeechFocus™ and TwinPhone.	●●●●●	●●●●	●●●
Connectivity				
Direct Streaming	Signia Nx hearing aids can be connected directly to Apple devices for phone calls and audio streaming – without additional accessories. With the StreamLine Mic accessory, direct streaming is possible also from Android devices and other Bluetooth mobile devices. With the StreamLine TV accessory, high-quality stereo sound can be streamed directly to Nx hearing aids. Available for Bluetooth-equipped devices.	●●●●●	●●●●●	●●●●●
You Adjust	Technically inclined wearers often appreciate having extra control over their hearing aids. Signia Nx hearing aids offer these wearers a comprehensive range of adjustment options via the myControl App™ or touchControl App™.	●●●●●	●●●●●	●●●●
Remote hearing care				
TeleCare 3.0	TeleCare provides a structured communication approach for hearing care professionals and their clients, which is especially important during the initial stages of a fitting. In addition, TeleCare provides full live remote tuning to assist with rapid and effective troubleshooting. Available for Bluetooth-equipped devices.	●●●●●	●●●●●	●●●●●

New!

Introducing Signia Styletto.

Too many people who need hearing aids don't want to wear them simply because the look and feel does not match their image of themselves. At last you can attract new and existing clients of all ages and convert them into satisfied wearers.

Styletto is more than a hearing aid. It is hearwear with a revolutionary design: the world's first SLIM-RIC.

It's not just a hearing aid.

New!

OWN VOICE PROCESSING
OVP

It's embracing life with stylish high-tech.

By thinking differently, we have produced a hearing solution that transforms the image of hearing aids and is as easy to sell as traditional RICs. Styletto combines all the audiological advantages of our acclaimed Signia Nx platform with a stylishly designed new form factor.

It provides the latest advancements in terms of energy-efficient chip design, unique lithium-ion batteries, and the most natural sound. All in a refined slim-line styling that is preferred by more than 8 out of 10 people compared to conventional hearing aids.*

Experience the Styletto hearwear revolution.

Design
The unique, beautifully designed Styletto delivers strong and proven consumer preference.

D) Not available in the app version on Google Play Store.

E) Available with hearing aids with two microphones each and at performance levels 7 and 5.

F) Available in binaural fittings only.

G) Output via the number of signal tones in the hearing aid.

H) Available with Nx hearing aids with Bluetooth connectivity.

I) After activation via customer service.

App overview.

Remote support

Via the **myHearing App**, your customers can experience all benefits of TeleCare to familiarize themselves with their new hearing aids in as little time as possible. They can follow special listening exercises, consult the user guide and connect to you on the go.

Audio streaming and remote control

The **myControl App** enables direct streaming and remote control for hearing aids using Bluetooth. It also optimizes hearing aid settings for each individual listening environment and lets your clients track their communication time and hearing performance.

Remote control

The **touchControl App** for hearing aids without Bluetooth enables discreet and convenient changes to hearing programs, volume, bass, and treble via the wearer's smartphone – without any extra hardware.

Audio streaming and remote control

With the **easyTek App™**, hearing aid wearers can discreetly control the easyTek via their smartphones for program or volume adjustments and audio streaming.

All apps are compatible with Android and iOS. Their download on the Apple App Store or Google Play Store is free of charge.

Apps, accessories and hearing aid compatibility.

This overview shows you which apps and accessories work with our hearing aids. Depending on the solution your customers choose, they can even enhance their hearing experience and convenience with this well-matching portfolio.

Accessory overview.

Streamers

Via **StreamLine TV**, TV sound can be fed directly into Bluetooth-equipped Signia Nx hearing aids. Wearers can even adjust the TV volume individually via the myControl App.

The **StreamLine Mic** transforms Signia Nx devices with Bluetooth into more than state-of-the-art hearing aids. They also become hands-free mobile headsets and wireless stereo headphones that stream highest quality audio into both ears from any Bluetooth device. Wearers can even adjust the streaming volume individually via the myControl App.

The **easyTek** wirelessly connects hearing aids to different Bluetooth enabled devices so sound is streamed directly into the hearing aids. Plus, it also acts as remote control for program or volume adjustments and is controllable via the easyTek App.

CROS/BiCROS

For people with unaidable hearing loss on one side. **CROS Pure Nx**, **CROS Silk Nx**, and **CROS Pure** receive sound on that side and transmit it to a hearing aid on the other side. **CROS Silk Nx** is the world's only **CROS CIC**.

Transmitter

The **TV Transmitter** connects TVs to the easyTek. This way, sound can be wirelessly streamed directly into the hearing aids.

Charging stations

The **chargers** recharge hearing aids so your clients don't need to worry about handling batteries.

Remote controls

Small enough to carry on a keyring, the **miniPocket** is the ideal solution for anyone who wants discreet, convenient hearing aid control without the need for a large remote control or smartphone.

The sleek **easyPocket™** with large buttons and an easy-to-read display even gives users with dexterity issues easy access to their hearing aids.

Color overview **SLIM-RIC, RICs and BTEs.**

* Study conducted at the University of Northern Colorado, 2015, examined the effectiveness of the new features of primax by collecting and analyzing ongoing EEG data while subjects performed speech testing. For both primax features SpeechMaster and EchoShield, the objective brain behavior measures revealed a significant reduction in listening effort when the feature was activated.
