

SmallRig

**Top Handle Compatible with
ARRI Locating Holes**

Operating Instruction

SmallRig ARRI Locating Handle (Lite) 3765 is designed to facilitate low-angle shot and reduce burdens on arms. The ergonomic handle, featuring anti-slip and anti-freeze silicone, feels comfortable and weighs only 124g because of a hollowed-out structure. It has 3 front cold shoes and 2 rear cold shoes that allow simultaneously mounting microphone, LED light, monitor, and other accessories. ARRI 3/8" -16 locating holes support Monitor Mount 2903, 2348 to attach monitors; 1/4 "-20 threaded holes support Magic Arm 2070 for monitors and Remote Control 2924 for recording. An Allen Wrench helps tighten the locking screw, making it easy to assemble and disassemble.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.
