Office Hours: Monday~ Friday 9:00 am~5:30 pm (PST)

Location: 2235 E 4th St Ste F Ontario, CA 91764 United States.

Installation Video

Before installing, you can watch a video to make your installation easier.

1. Please turn off the power of the vehicles before you install the led bulbs.
2. For Nissan 300ZX 1993~1994 and for Hyundai ioniq LIMITED 2019, we don't recommend you use them on map light.
3. For Mercedes-Benz Sprinter 2500/3500, M-Class, GLA-Class, we don't recommend you use them on the license plate light.
4. For Dodge, Jeep Renegade/Cherokee, Mercedes-Benz, and GTI MK7, Passat, Jetta, Tiguan, we don't recommend you use them on the license plate light and parking light.

1.Q: The size of the lamps is not correct, the base is too thick to insert.

How can I get proper size lamps for my car?

A: Some LED bulbs are not in a 1:1 ratio with the halogen bulbs. The large base is for better heat dissipation and prolonging the life of the lamps. You can try to push a bit hard to get them in. If the lamps are still not suitable for installation, please contact the Customer Service.

2.Q: Do you meet the four phenomenons below?

- (1) Errors or flash on instrument panel;
- (2) After a period of use: off/flashing/darkening;
- (2) The bulb breaks or the lamp bead falls off after receiving the bulb;
- (4) The bulb does not turn on.

A: The above situation may be the decoding problem of cars, or the product quality problem caused by violent transportation. Please contact our customer service in time, and we will provide you with corresponding after-sales service to replace or refund.

3.Q: False Compatibility, this LED Bulb doesn't fit my vehicle?

- A: (1) Open the shopping link of the product, enter your model in the fitment at the top, and it will prompt whether it is suitable.
- (2) Contact us directly by email.

IV **PRODUCT SPECIFICATIONS**
