

HIDVCAM Camera User Guide

Version:V2.0

Download and install the APP HIDVCAM

For Android phones, search for "HIDVCAM" through the Google Play Store and download and install it.

For iPhones, search for "HIDVCAM" through the App Store to download and install.

Scan the QR code to download "HIDVCAM"APP.

Introduction to camera indicator light status:

1. Near-field AP hotspot mode: Blue light is on constantly and green light is flashing

slowly (device is not connected to the network).

2. Remote networking mode: Both blue and green lights are on constantly (device is connected to the network).

3. Blue light is on constantly and green light is off (can't detect network. Check if the network is normal).

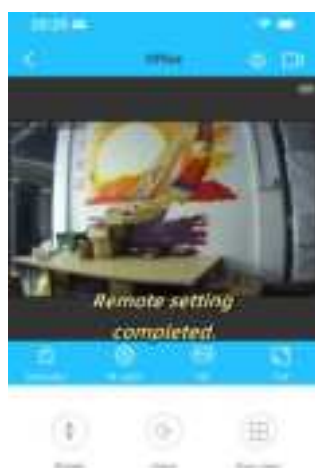

Key functions:

ON/OFF key: Power on and off key (press and hold for 3 seconds to power on when in shutdown state. Press and hold for 3 seconds to power off when in working mode).

Reset (R) key: Press and hold for 5 seconds to restore factory settings (for models without R key, press MODE key).

User registration and login

Open the installed HIDVCAM and register and log in. Support registration and login with Facebook, Twitter, Line, and email. (For a better experience, please allow the permissions required by the APP.)

Use the camera in the absence of a WIFI network:

Open the phone settings >>> Select the wireless network starting with "IPC" for connection >>> After the connection is completed, open HIDVCAM >>> Pull down to refresh the camera list.

To ensure that your recorded videos are not lost, it is recommended that you activate the cloud storage function.

1. Cloud videos can be viewed in the APP's playback. Videos that can't be stolen.
2. Cloud recording triggered by dynamics. Real-time intelligent monitoring.
3. Data is encrypted and uploaded to ensure the security of video files.
4. Unlimited storage space.

Warning:

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the

following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator & your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Thanks!
