

# INSTALLATION PROCESS

## NOTING

Never touch the coal& holder by hand when they're burning. Use tongs please.

Never burn the holder on the coal starter & fire.

All hookah kettles, the water level at least exceeds the silencer.

1.Hookah Charcoal Holder:3~4 pieces of burning charcoal can be used.

2.Silicone Hookah Bowl: Put in a certain amount of flavor to use.

3.Coal Tongs: Clips are used to hold charcoal and flavor.

7.Leather Hookah Hose: The handle part is used for smoking by mouth.

8.Hose Gasket: Prevent air from entering and fix the pipe.

10.Glass Bead: Prevent air from entering, but when one person blows the smoke, remove the glass bead at the end of the smoke blowing.

14.LED Hole: Used to place LED lights.

15.LED Remote: The remote controller controls LED light color and color change mode, and 12 colors are adjustable.

16.LED Light: Three 3A batteries are needed to use it, which should be placed under the lamp position of the pot body.

You can poke holes in the tinfoil with a needle under the tongs.

The complimentary gasket is used for increased friction and better sealing.
