

Induction Cooktop, 83cm, 4 Zones with Integrated Ventilation

Series 9 | Minimal

Black Glass

A true two-in-one appliance, this cooktop combines the precision of induction cooking with powerful extraction in one seamless, stylish cooktop.

- Seamless kitchen integration, without the need for overhead ventilation
- Four cooking zones, including simple pairing of two zones to create a SmartZone
- With nine fan speeds plus boost, select the perfect extraction rate for your cooking

- Minimal style, sleek black glass finish to suit any kitchen design

DIMENSIONS

Height	217mm
Width	830mm
Depth	515mm

FEATURES & BENEFITS

Seamless integration

Offering true design freedom, this cooktop can be placed anywhere – eliminating the need for bulky overhead ventilation and helping to create a seamless flow between kitchen and living spaces. Installed raised or flush, it’s perfect for islands, or homes with high ceilings.

Elegant design

The subtle black glass and durable matte black detailing blend elegance with durability. With premium styling, these cooktops seamlessly blend with other appliances for a cohesive, considered kitchen design.

Precise control

Fisher & Paykel induction cooktops offer extremely accurate temperature control from very high to very low heats, so you can sear, sauté and temper like a pro. Touch&Slide controls react immediately when you adjust the temperature, so you can go from a boil to a simmer in seconds.

Effective extraction

Designed for busy homes, the integrated ventilation works effectively and unobtrusively in the background. Featuring nine fan speeds, plus a boost function, for quickly removing odours and steam.

Safety of induction

Induction cooktops only start heating your pot or pan once you’ve placed it on the surface and stop as soon as you remove it – so they are safer for everyone.

Ease of use

Designed for simple removal, the grease filter tray effectively captures spills, while the single glass cooking surface can be easily wiped clean. A flush ventilation grille allows pots to effortlessly slide across the cooktop surface.

Superior efficiency

Less heat is wasted during induction cooking because only the cookware is heated, not the cooktop surface. This makes induction cooking more energy-efficient than electric or gas cooktops.

SPECIFICATIONS

Accessories

Recirculation kit	82236 KRCID834 (optional)
Replacement recirculation filter	50182 FRO-DD (optional)
