

# FAUCON OCTAGON AUTOMATIC

WATER PROTECTION  
GLASS

10 ATM / 100 M  
SAPPHIRE COATED

## MOVEMENT

CLOCKWORK

AUTOMATIC

## SIZE

CASE WIDTH  
STRAP WIDTH

37 MM  
20 MM

## HOW TO

THE CROWN HAS TWO POSITIONS THAT  
IT CAN BE PUSHED INTO

### 1. POSITION: WIND

When the crown is pushed all the way in,  
rotate it clockwise to wind and activate  
the automatic watch movement.

### 2. POSITION: TIMESETTING

## IMPORTANT

To ensure optimal timekeeping, wind the  
watch 10-15 times upon receipt and wear  
it, keeping the watch in motion. If the  
watch is left idle for a day, it should be  
wound again. Continuous operation of  
the watch is preferred for the best  
results.

**PLEASE DON'T WIND THE CROWN MORE  
THAN 15 TURNS.**

*Overwinding may cause damage to the  
mechanism, potentially leading to a  
malfunction of the power reserve.*
