## ▼ Introduction

The MOCREO H2 Hub is a plug-shaped device designed to manage MOCREO BLE Sensors. Its main function is to connect to Wi-Fi and act as a bridge between the Sensors and the Cloud Server. The unique plug design of the H2 Hub allows it to be plugged into an outlet without obstructing other devices.

With the H2 Hub, you can easily control your MOCREO Sensors and power your devices. Expand your monitoring system by adding more MOCREO Sensors to the H2 Hub and monitor various factors like temperature, humidity, water leakage, and more.
