### Travel Compliance Letter for ResMed Therapy Devices

To whom it may concern, ResMed respiratory assistive devices (ventilators, respirators, and CPAP machines) are medical devices prescribed for use on or by the order of a physician and are cleared for sale by the U.S. Food and Drug Administration, a branch of the Federal Government of the United States of America, and the Australian Therapeutics Goods Administration.

The devices do not contain any parts or materials known to cause or interfere with the safe operation of a commercial aircraft.

The U.S. Department of Transportation (DOT) Final Rule, "Non-discrimination on the Basis of Disability in Air Travel" (73 FR 27614 which updates Title 14 CFR Part 382), effective May 13, 2009, provides important new requirements for the accommodation of passengers with respiratory assistive devices.

Specifically, respiratory assistive devices may be used on board an aircraft, without further testing by the carrier, provided they have been tested for electromagnetic compatibility (EMC) in accordance with the current version of RTCA/DO-160, Section 21, Category M.

ResMed has successfully completed testing for the respiratory assistive devices described in this letter.

**The**

**devices listed below comply with RTCA/DO-160G, Section 21, Category M, and are considered FAA compliant.** This information may be engraved on the device or a sticker label applied to the device; either method for identifying FAA compliance is acceptable and in accordance with DOT Regulations.
