
Matrice 350 RTK Quick Start Guide

Matrice 350 RTK

The MATRICE™ 350 RTK (M350 RTK) is a powerful industrial drone platform with an advanced flight controller system, 6 Directional Sensing and Positioning system and FPV camera. To enhance reliability and safety, it also supports CSM Radar - an additional obstacle detection component that can be mounted on top of the drone. It features several advanced flight functions including return-to-home, obstacle sensing, AI spot-check and more. The built-in AirSense provides awareness of nearby aircraft within the surrounding airspace to ensure safety.

Its airframe design gives it an IP55 Ingress Protection, in accordance with the global IEC 60529 standard. The mechanical design, along with quick-release landing gears and mounted folding arms, makes it easy to transport, store, and prepare for flight. The safety beacons on both the top and the bottom of the aircraft allow the aircraft to be identified at night or in low light conditions. The auxiliary lights help the vision positioning system achieve better performance at night or in low light conditions, improving aircraft takeoff, landing and flight safety.

M350 RTK is compatible with many of DJI's DGC2.0 connector gimbals, supporting multi-gimbal system, which can support up to three independent gimbals to meet the needs of different scenarios.

It is equipped with many expansion ports to broaden its applications. The M350 RTK has a built-in DJI™ D-RTK™ 2, which provides more accurate heading data for positioning. An advanced power management system along with dual batteries ensures power supply and enhances flight safety. Without a payload, the M350 RTK has a flight time of up to 55 minutes.
