

AIR-TO-AIR PORTABLE AIR CONDITIONER

PAC A100 ECO

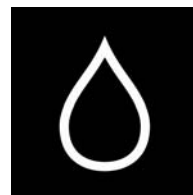

LOW GLOBAL WARMING IMPACT

This ECO models do not contain gases (CFC/HCFC) dangerous to the ozone layer or with a marked greenhouse effect (HFC). The air-conditioner uses a completely natural and non-toxic fluid: R 290.

NO DRIP TECHNOLOGY

De'Longhi recycles the condensate, pumping the water over the condensing coils, the coils cool much faster than by air alone. This creates greater performance and efficiency with the added bonus of never needing to empty the tank. Making these units ideal for high humidity environments.

WINDOW KIT

A window kit is supplied to allow you to vent the hot air efficiently outside the room. Window kits are adjustable and suit most sliding windows.

24Hr ELECTRONIC TIMER

Your home should be an oasis, so De'Longhi have integrated timers in all of their units. This enables the unit to switch on while you are out, making your home cool and comfortable for when you get home.

Pinguino PAC A100 ECO

- **Maximum Cooling capacity: 2,85 kW.**
- **Energy Efficiency Capacity: 3.16**
- Dehumidifies while conditioning.
- Fan Only function.
- Separate Dehumidifying function.
- Wide LCD control panel display.
- Auto Fan Function: the unit automatically chooses the most suitable fan speed in the actual room.
- 3 fan speeds to ensure the maximum power or the minimum noise level.
- The **remote control** allows an easy setting of all the functions and parameters of the unit.
- SLEEP and SMART functions for use during the night and to let the unit automatically choose the best operation mode.
- Handles and castors.

TECHNICAL DATA

Size (hxxwxd)	mm	773x463x383
Weight	Kg	33
Refrigerant gas		R290
Rated Voltage/Frequency	V/Hz	220-240/50
Max Cooling capacity	kW	2.85
Input power	W	900
Air flow min-max	m ³ /h	250-340
Dehumidifying Function	l/24h	35 Ltr
APN No		8004399511521
