

## 1. Overview

ChipPro is a quick and easy device programming solution for Microchip's Field Programmable Gate Array (FPGA) devices. The ChipPro Programmer® baseboard hosts a connector to plug into the FlashPro6, our latest programmer that supports Linux® and Windows® platforms, in conjunction with Libero® SoC, FlashPro Express, and SmartDebug software. FlashPro supports all the FPGA devices in PolarFire® SoC, PolarFire, SmartFusion® 2, IGLOO® 2 and RTG4™, and RT PolarFire series. The System-On-Module (SoM) corresponding to each package size and type in Microchip's portfolio of FPGAs can also be connected to the baseboard to program the FPGA package.

### 1.1 Jumper Settings

The ChipPro FPGA device programmer comes with the following default jumper settings:

**Table 1-3.** Jumper Settings

Jumper	Pin	Factory Default
J6, J7	2-3	Short 1-2: Indicates that an FPGA device is not loaded on to the ChipPro SoM, recommended only for board bring-up (without Silicon) Short 2-3: Indicates that an FPGA device is loaded on to the socket of the ChipPro SoM board
J26	1-2	Open

.....continued

Jumper	Pin	Factory Default
J17, J18, J19, J20	1-2	Short 1-2: Enables the SPI programming header Short 2-3: Enables the SPI Flash DB connector
J21	1-2	Enables SPI
J22	1-2	Configures I/O
J23	1-2	Reserved

## 1.2 Running the Demo

To familiarize with the FlashPro programmers and the corresponding device support before getting started with ChipPro, refer to the following documents.

- [FlashPro Express Device Support](#)
- [FlashPro Express User Guides](#)

To run the demo, perform the following steps:

1. Connect the socketed ChipPro SoM board (for the device and package type of your project) to the baseboard (align with J3 and J4 Connectors on the ChipPro baseboard).
2. Insert the FPGA device (must correspond to the ChipPro SoM mentioned in the previous step) to be programmed, into the socket on the ChipPro SoM. Ensure that the polarity of the FPGA device and the socket matches.
3. Connect the 12V power supply to J5.
4. Connect the USB port on the FlashPro6 programmer to a PC, using the USB cable provided with the programmer.
5. Connect the JTAG port, on the FlashPro6 programmer, to the ChipPro baseboard using the J27 FlashPro header on the baseboard.
6. Turn ON the **SW1** switch by sliding.
7. Open the FlashPro Express Programming software on the PC; navigate and select the appropriate programming file to program the device.

## 2. Software and Licensing

Starting from Libero SoC v11.5 release, FlashPro Express is also installed as part of [Libero SoC](#). Libero SoC requires a license to create and program the device. FlashPro Express Standalone is also available as part of the [Programming and Debug](#) tools. No additional licenses are required for the FlashPro Express Standalone software.

### Documentation Resources

## Microchip FPGA Support

Microchip FPGA products group backs its products with various support services, including Customer Service, Customer Technical Support Center, a website, and worldwide sales offices. Customers are suggested to visit Microchip online resources prior to contacting support as it is very likely that their queries have been already answered.

Contact Technical Support Center through the website at [www.microchip.com/support](http://www.microchip.com/support). Mention the FPGA Device Part number, select appropriate case category, and upload design files while creating a technical support case.

Contact Customer Service for non-technical product support, such as product pricing, product upgrades, update information, order status, and authorization.

- From North America, call **800.262.1060**
- From the rest of the world, call **650.318.4460**
- Fax, from anywhere in the world, **650.318.8044**

## Microchip Information

### The Microchip Website

Microchip provides online support via our website at [www.microchip.com/](http://www.microchip.com/). This website is used to make files and information easily available to customers. Some of the content available includes:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip design partner program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

### Product Change Notification Service

Microchip's product change notification service helps keep customers current on Microchip products. Subscribers will receive email notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, go to [www.microchip.com/pcn](http://www.microchip.com/pcn) and follow the registration instructions.

### Customer Support

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Embedded Solutions Engineer (ESE)
- Technical Support

Customers should contact their distributor, representative or ESE for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in this document.

Technical support is available through the website at: [www.microchip.com/support](http://www.microchip.com/support)

### Microchip Devices Code Protection Feature

Note the following details of the code protection feature on Microchip products:

- Microchip products meet the specifications contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is secure when used in the intended manner, within operating specifications, and under normal conditions.
- Microchip values and aggressively protects its intellectual property rights. Attempts to breach the code protection features of Microchip product is strictly prohibited and may violate the Digital Millennium Copyright Act.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of its code. Code protection does not mean that we are guaranteeing the product is “unbreakable”. Code protection is constantly evolving. Microchip is committed to continuously improving the code protection features of our products.
