VT05EUS06040 Rechargeable battery information:

Zhuhai Great Power Energy Co., Ltd. Li-ion battery, 3.6V, 2600mAh, 9.36Wh; Model: ICR18650-2.6Ah-3.6V-1S1P The power adapters are intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, under-the-table or cabinet

For pluggable equipment, the socket-outlet shall be installed near the equipment and shall be easily

Unplug this product from the wall outlet before cleaning
Do not use liquid or aerosol cleaners. Use a damp cloth Do not cut off the power adapters to replace them with other plugs, as this causes a hazardous situation.

 Do not allow anything to rest on the power cords. Do not install this product where the cords may be walked on or crimped.

This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply in your home, consult your dealer or local power company.

Do not overload wall outlets or use an extension cord. Do not place this product on an unstable table, shelf, stand or other unstable surfaces. This product should not be placed in any area where

proper ventilation is not provided. Slots and openings in the back or bottom of this product are provided for ventilation. To protect them from overheating, these openings must not be blocked by placing the product on a soft surface such as a bed, sofa or rug. This product should never be placed near or over a radiator or heat

IMPORTANT SAFETY INSTRUCTIONS

Never push objects of any kind into this product through the slots because they may touch dangerous voltage points or create a short circuit. Never spill liquid of any kind on the product.

18. To reduce the risk of electric shock, do not disassemble this product, but take it to an authorized service facility. Opening or removing parts of the product other than specified access doors may expose you to dangerous voltages or other risks. Incorrect reassembling can cause electric shock when the product is subsequently used.

You should test the sound reception every time you turn on the units or move one of the components. 20. Periodically examine all components for damage. There is a very low risk of privacy loss when using certain electronic devices, such as baby monitors, cordless telephones, etc. To protect your privacy, make sure the product has never been used before purchase, reset the baby monitor periodically by powering off and then powering on the units, and power off the baby monitor if you will not use it for

some time.

2. Children should be supervised to ensure that they do not play with the product.

The product is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

SAVE THESE INSTRUCTIONS

Use and store the product at a temperature between 32°F and 104°F. Do not expose the product to extreme cold, heat or direct sunlight. Do not put the product close to a

eating source. Batteries should not be exposed to excessive heat such as bright sunshine or fire. Warning—Strangulation Hazard—Children have STRANGLED in cords.

Keep this cord out of the reach of children (more than 3 ft (0.9m) away). Do not remove this tag.

Never place the baby unit(s) inside the

baby's crib or playpen. Never cover the baby unit(s) or parent unit with anything such as a towel or a blanket. parent unit with anything such as a towel or a blank Other electronic products may cause interference with your baby monitor. Try installing your baby monitor as far away from these electronic devices as possible: wireless routers, radios, cellular telephones, intercoms, room monitors, televisions, personal computers, kitchen appliances and cordless telephones.

Precautions for users of implanted cardiac pacemakers Cardiac pacemakers (applies only to digital cordless

devices):
Wireless Technology Research, LLC (WTR), an independent research entity, led a multidisciplinary evaluation of the interference between portable wireless devices and implanted cardiac pacemakers. Supported by the U.S. Food and Drug Administration, WTR recommends to physicians Pacemaker patients

Should keep wireless devices at least six inches from the Should NOT place wireless devices directly over the

WTR's evaluation did not identify any risk to bystanders with pacemakers from other persons using wireless devices.

Electromagnetic fields (EMF) This VTech product complies with all standards regarding electromagnetic fields (EMF). If handled properly and according to the instructions in this user's manual, the

oroduct is safe to be used based on scientific evidence

WHAT'S IN THE BOX

CONNECT THE BABY MONITOR

■ NOTES

The rechargeable battery in the parent unit is built-in.

Use only the power adapters supplied with this product Make sure the baby monitor is not connected to a switch-controlled electric outlet.

Connect the power adapters in a vertical or floor mount position only. The adapters' prongs are not designed to hold the weight of a baby monitor, so do not connect them to any ceiling, under-thetable, or cabinet outlets. Otherwise, the adapters may not properly connect to the outlets.

Make sure the parent unit, the baby units and the power adapter cords are out of reach of children.

SOUND SENSITIVITY AND SOUND ACTIVATION

Adjust the sound sensitivity of the baby unit

You can choose to hear sounds from the baby unit all the time, or to hear sounds that exceed a certain level. You can use the parent unit to adjust the microphone sensitivity of your baby unit. The higher the sensitivity level, the more sensitive the baby unit is in detecting sounds that transmit to the parent unit. The VOX sensitivity level is preset to the highest level.

VOX Sensitivity Level	Highest I	High	Medium	Low	Lowest I
DESCRIPTION	The parent unit speaker is constantly on, and you will hear all sounds (including background noises) from your baby's room.	The parent unit speaker turns on for soft babbling and louder sounds from your baby. It remains quiet when your baby sleeps soundly.	The parent unit speaker turns on for loud babbling and louder sounds from your baby. It remains quiet when your baby makes soft sounds.	The parent unit speaker turns on for crying and louder sounds from your baby. It remains quiet when your baby makes soft sounds.	The parent unit speaker turns on for loud crying or screeching sounds from your baby. It remains quiet when your baby makes soft sounds.

Sound activated screen

When sound activation is on, the parent unit screen stays off to save power when the baby unit detects no sound. Once the baby unit detects sounds that are louder than the chosen sound sensitivity level, the parent unit screen turns on automatically. It will then turn off again after 50

The dim mode is to help you save the parent unit power. Your parent unit display will dim automatically after 10 minutes of inactivity, in which there is neither key pressed nor alert received from the baby unit.

■ Note

· While the screen is dimmed, any keypress or alert message will trigger the screen to return to the preset brightness level. After 10 minutes of inactivity, it will resume to dim mode.

NIGHT VISION

The baby unit has infrared LEDs that allow you to see your baby clearly at night or in a dark room. When the baby unit being viewed detects low light levels, the infrared LEDs are switched on automatically. The images from the baby unit are in black and white, and 2 ppears on the screen.

■ Notes

It is normal to see a short white glare on your parent unit screen as the baby unit is adapting to the dark environment. When the infrared LEDs are on, the

mages are in black and white. This is

- Depending on the surroundings and other interfering factors, like lighting, objects, colors and backgrounds, the display resolution may vary. Adjust the baby unit's angle or place the baby unit a a higher level to prevent glare and blurry

you would like to view

Items to purchase You will need to purchase the following items separately to mount your baby unit:

2 screws 2 anchors

 The types of screws and anchors you need depend on the composition of the wall.

· Check for reception strength and camera angle before drilling the holes.

Use a pencil to mark two holes in parallel Make sure they are the same distance apart as the wall mount holes on the baby unit.

If you drill the holes into a stud, go to step 3. If you drill the holes into an object other than

a stud, insert the wall anchors into the holes. Tap gently on the ends with a hammer until the wall anchors are flush with the wall.

Insert the screws into the holes and tighten the screws until only 1/4 inch of the screws are exposed.

Align the wall mount holes on the baby unit with the screws on the wall. Slide the baby unit down until it locks into place.

Adjust the camera angle.

FREQUENTLY ASKED QUESTIONS

Below are the questions most frequently asked about the baby monitor

Why does the baby monitor not respond normally?	 Try the following (in the order listed) for common cure: Disconnect the power to the baby units and the parent unit. Wait a few seconds before connecting power back to the baby units and the parent unit. Turn on the baby units and the parent unit. Wait for the parent unit to synchronize with the baby units. Allow up to one minute for this to take place.
