PREMIUM TECHNOLOGY

EVERFRESH+™ WITH ACTIVE FRESH BLUE LIGHT

Our EverFresh+ with Active Fresh Blue Light technology keeps fresh food fresher three times longer than the average refrigerator – for up to 30 days! Our technology retains vitamins and nutrients that simulates natural lighting conditions, extending the photosynthesis process of fruits and vegetables in your refrigerator.

IONGUARD®

Advanced IonGuard® technology creates a fresh air environment inside your refrigerator to protect and preserve foods longer and eliminate odor transfer.

FREEZE GUARD

Beko Freeze Guard technology uses an inverter compressor and electronic temperature control system to ensure the freezer continues to work in ambient temperatures as low as 5° F, without any loss of performance.*

*The fridge compartment will not work properly in low temperatures, so we recommend you only use the freezer compartment in low ambient temperatures.
