Product parameters

Model	HX-XDD01
Rated input	AC100-240V
Rated Frequency	50/60Hz
Wattage(W)	20
Luminous flux(lm)	2000
IP rating	IP40
CCT	3000K-6500K
Lamp life(L70B50)	30000H
Material	ABS+PC
Working Temperature:	-25℃-40℃

Product Size

11.8In
0.98In

Troubleshooting

1. This light, is it splash-proof rated or can be used safely in the shower?
This ceiling light is IP40 rated, dustproof but not waterproof. It is recommended for use in semi-indoor and indoor spaces such as foyers, staircases, storage rooms, closets, laundry rooms，checkrooms, etc.
2.Do I need to install extra light bulbs?
Ceiling light is LED type. It doesn't need extra bulbs. LED is the new technology to replace the traditional type of flouresent bulbs.

3.What is the night lighting mode of this ceiling lamp?
The brightness of the light will become lower, the light will become warmer, and the light output will become lower. The color temperature is 3000K and the brightness is 10%.
4.Can I set my own lighting color temperature?
Of course, you can set the color temperature of your ceiling fixtures from warm white to daylight white asdesired. The color temperature adjustment on the remote control is ±500K once.
5.What are the parameters of brightness?
The brightness is 20%/50%/100% respectively. When you choose the night light mode, the brightness is 10% of the color temperature 3000K.
6.How long can this ceiling light be timed?
The timer is 30 minutes/1H respectively, select the button on the remote control according to your need, after that, the light will turn off when the time is up.
7.Can two or more lights be paired with one remote control?
One remote control cannot control more than one light at the same time, this remote control is required to pair the code to control the ceiling light. If the remote control is coded to another lamp, it cannot control the previously coded lamp.
8.How do you make it keep your color settings? What color will this ceiling light be when I restart it?
This dimmable remote controlled ceiling light can remembers your settings the last time it was turned off, so when you turn it on again, it retains yourlight settings.
9.Can I install it myself, or do I need to hire a professional?
It can be installed by yourself, it is very easy to install, only 3 steps are needed to complete the installation (1) Turn off the switch and connect the wires. (2) Install the base under the ceiling. (3) Rotate the ceiling light to the mounting base.
Of course the option of enlisting the help of a professional is a good one!
10.I got a defective lamp, how can I get a new one?
Thank you for your inquiry. It's our pleasure to help you. Please contact us for further assistance.
Customer Service: support004@keepsmile.vip
Thank you for your choice!

Please read this safety direction carefully before installing or using this product and keep this user manual for further reference
1.Attention!Before starting the installation work.make sure that the mains power line is voltage-free.The switch must be "OFF".
2.Installation and maintenance work may only be carried out by a qualified electrician in accordance with local safety regulations.
3.The stranded wire must not be welded.It should be used with wire sleeves or insulated ends.
4.All energized line.including the pre-assembled luminaires.must be firmly screwed on or completely plugged in,as the good connection is a prerequisite for a long lifespan under the high currents.
5. The lamp may be hot in operation, and can only be touched or replaced after the lamp has cooled.
6.Do not install or place near heaters.fireplaces.candles or other heat sources.Keep the lamp well ventilated when it is on.
7.Children shall not play with the product.
8.To protect yourself from the risk of electric shock.do not place the cord or main body in water or any other liquid.
9.The manufacturer's instructions need to be used appropriately.Consult installation instructions!Always pay attention to the technical data on the product.We reserve the right to change technolog

Note: This side be upward to ceiling

❶ Please confirm direction of the baseplate before installation

❷ Secure base plate
A. Use tapered tapping screws for solid ceiling
B. Use flat head screws for wire boxes

❸ Connect the AC cables. L/N
Lamp is made of insulating plastic, so no need for ground wire,red wire stand for two kinds of connectors
A:Twist wire connector: Turn the switch on until 90°, connect the cable, turn off the switch
B:Wire nuts: Tighten the AC cable and the L/N cable clockwise, then screw in the Wire nuts

❹ Push wire nuts upwards

❺ Rotate the lamp clockwise and install onto base plate, the finish installation

Notes on Connecting Cables:
1. When connecting the cable with the quick cable connector,please make sure to turn on the switch to 90 before connecting the cable. If the switch is not turned on to 90%,the cable will not be connected securely and there is a risk of fire,burns,or electric shock.
2. When using the wire nut to connect the cable,you need to tighten the cable first,and then screw it into the wire nut
