English

Thank you for purchasing this Audio-Technica omnidirectional condenser lavalier microphone. Please read the instructions in this manual before using.

Features

- Newscaster-style miniature mic is perfect for video use
- Ideal for aerobics/dance/sports instructors
- Dual-mono 1/8" output plug connects to a video camera, DSLR or handheld audio recorder's stereo 1/8" input to record audio on both left and right channels
- Smartphone adapter connects microphone and a pair of headphones to most smartphones
- Omni pickup pattern offers full coverage

User Instructions

Inserting Battery and Connecting Microphone

- Unscrew the power module cover. Insert battery, matching the polarity markings inside the module. Screw module back together.
- Plug the cable's dual-mono 1/8" output plug into the mic jack on your amplifier, wireless transmitter, video camera, DSLR or recording device. (When using with equipment that includes a built-in mic, consult that device's user guide for instructions on disabling its mic.)
- When using with a smartphone, plug the cable's 1/8" plug into the smartphone adapter's mic jack, then plug adapter's plug into the smartphone. Headphones can also be used with the adapter. (The ATR3350 requires its own battery even when using with a smartphone.)

Turning On

- Turn on amplifier, transmitter, camera or recording device.
- Slide microphone switch into the ON position.
Slide to OFF position to turn microphone off.

Using Tie Clip

- Snap microphone into the holder on the tie clip.
- Clip mic onto clothing so that it is about 6" below the user's chin.
Make sure that mic won't rub against or become covered by a piece of clothing.

Tips

When using the microphone for vocals, sing or speak across the mic windscreen rather than directly into the mic to reduce popping caused by sudden breath blasts. To prevent feedback, hold or position the mic fairly close to the sound source; ie (mouth) but refrain from overcrowding the mic. The mic should always be located behind or aimed away from the loudspeaker to minimize pickup of loudspeaker's sound.
