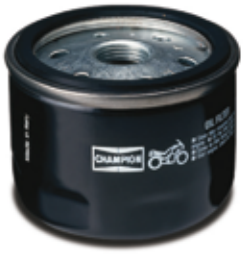
Filters

So why choose Champion?

Champion motorcycle filters are precision-engineered to match or exceed OE standards. They are made from the highest quality materials and manufactured to exacting standards ensuring virtually zero defects. On the road (and off the road) they deliver maximum performance with unrivalled protection.

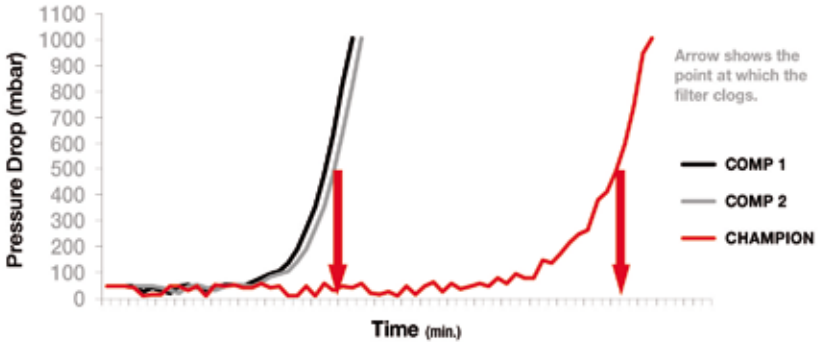


Advantages of choosing Champion

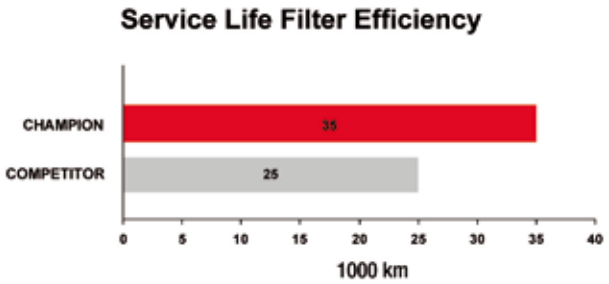
Extended life

Independent tests, (ISO 4548 - oil, and ISO5011 - air) have shown that Champion filters outperform the competition. We guarantee quality across our entire motorcycle filter program.

Life Cycle Efficiency



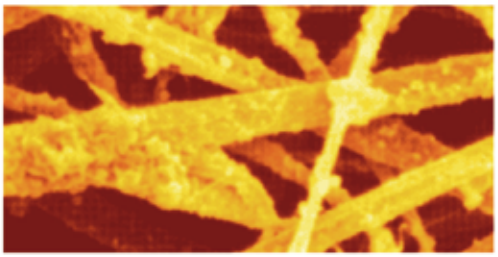
Tests carried out by independent source according to industry standard ISO 4548/4. The graph clearly shows that the Champion filter filters more efficiently than the competitor's filters.



Superior performance

Our filter paper is unique and impregnated with resin that removes even the most damaging contaminants from the oil. Pleated, cured and mechanically joined to guarantee 100% filtration.

- Impregnated with sophisticated fibres ensuring rigidity, good tensile and burst strength
- Layers of fibres integrated across each other give the paper depth and structure
- Filter paper traps particles on the surface and also locks them inside the media allowing far fewer particles through the engine



Reliability with MAXIMUM engine protection

Informazioni Tecniche

Filtri

Perché scegliere Champion?

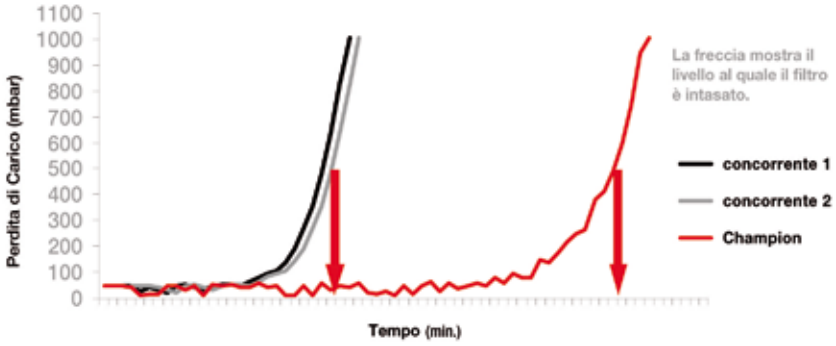
I filtri moto Champion sono progettati con precisione per eguagliare o superare gli standard di primo impianto. Sono realizzati con materiali della massima qualità in conformità a rigorose norme che garantiscono la perfezione. Sulla strada (e fuori strada) assicurano le massime prestazioni con una protezione ineguagliabile.

Vantaggi della scelta Champion

Durata più lunga

Test indipendenti (ISO 4548 per i filtri dell'olio, e ISO5011 per i filtri dell'aria) hanno dimostrato che i filtri Champion surclassano la concorrenza; noi garantiamo inoltre la qualità in tutta la nostra gamma di filtri moto.

Efficienza di Lavoro

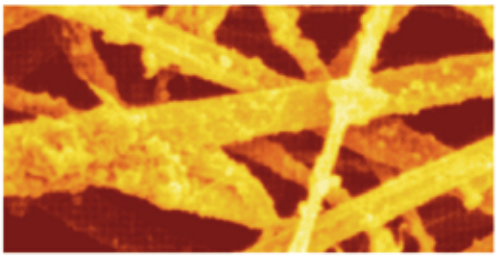


I tests sono sostenuti da un ente indipendente secondo la normativa ISO 4558/4. Il grafico mostra chiaramente che il filtro Champion lavora con più efficienza rispetto agli altri 2 concorrenti.

Prestazioni eccezionali

La nostra carta filtrante è unica nel suo genere e impregnata con una resina che rimuove anche i contaminanti più nocivi dall'olio. Pieghettata, trattata e meccanicamente fissata per garantire un filtraggio al 100%.

- **Impregnata con fibre sofisticate per garantire rigidità, buona resistenza sia a trazione che allo scoppio**
- **Strati di fibre integrati e sovrapposti conferiscono spessor e struttura al filtro**
- **La carta filtro non solo intercetta le particelle sulla superficie, ma le blocca anche all'interno del fluidi lasciando passare nettamente meno particelle verso il motore**



Affidabilità con MASSIMA protezione del motore

Información Técnica

Filtros

¿Por qué elegir Champion?

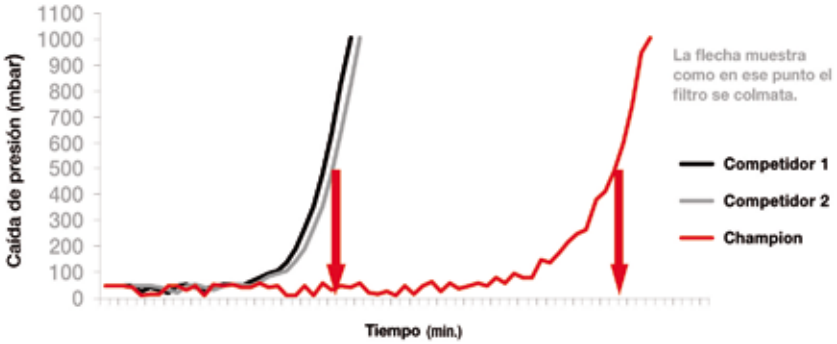
Los filtros Champion para motocicletas están diseñados con la precisión necesaria para alcanzar e incluso supera los estándares marcados por el OE. Construidos con los materiales de la más alta calidad, según los niveles de solicitud más exigentes, aseguran de esta manera su perfección, ofreciendo el máximo rendimiento tanto en aplicaciones para carretera como off-road, aportando siempre las máximas prestaciones.

Las ventajas de elegir Champion

Prolongada vida útil

Los ensayos independientes realizados (ISO 4548 - aceite e ISO5011 - aire) han demostrado que los filtros Champion superan las prestaciones de la competencia. De esta manera podemos garantizar la óptima calidad en toda nuestra oferta en filtros para motocicletas.

Eficiencia en el ciclo de vida

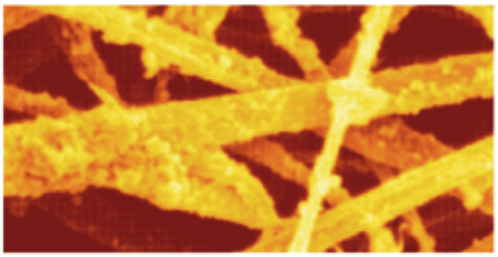


Ensayos realizados por laboratorios independientes aseguran la calidad continua según la normativa ISO 4548/4. El gráfico muestra claramente como los filtros Champion filtran más eficientemente que los filtros de la competencia.

Rendimiento Superior

Nuestro exclusivo papel de filtrado, recubierto e impregnado de resina, elimina los contaminantes más perjudiciales para el motor. Con la tecnología de plegado, endurecido y unido mecánicamente garantizan el 100% de filtrado.

- Impregnado de sofisticadas fibras asegurando su rigidez y una buena resistencia a la tracción y ruptura
- Las capas de fibras integradas, entrelazándose y conformando el espesor y estructura al papel
- El papel de filtro no sólo atrapa las partículas en la superficie, sino también las encierra en el medio impidiendo así que muchas partículas pasen al motor



Fiabilidad con la MÁXIMA protección para el motor

Informations Techniques

Filtres

Pourquoi opter pour les filtres Champion ?

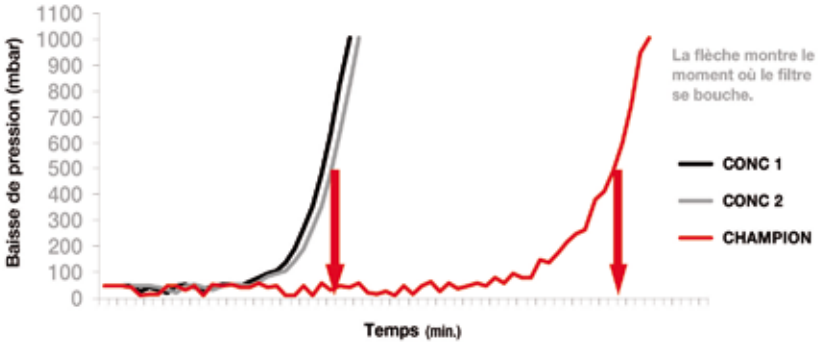
Les filtres pour motos Champion sont développés selon des procédures d'ingénierie qui égalent, voire surpassent, les normes d'origine. Ils sont produits à partir de matériaux de qualité supérieure, en appliquant les normes de fabrication les plus strictes, garantissant l'absence virtuelle du moindre défaut. Sur la route (et en dehors des sentiers battus), ils assurent une performance optimale et une protection inégalée.

Avantages du choix Champion

Durée de vie plus longue

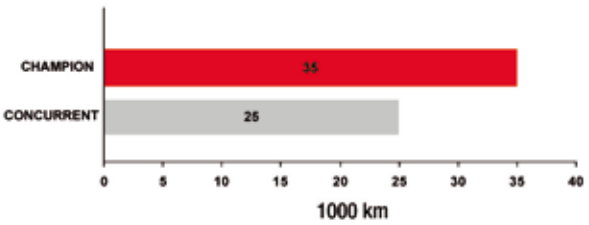
Des tests indépendants (ISO 4548 – pour le filtre à l'huile et ISO5011 – pour le filtre à air) ont démontré que les filtres Champion surclassent la concurrence et nous garantissons en plus de la qualité pour toute notre gamme de filtres motos.

Efficacité tout au long de la durée de vie du filtre



Tests menés par des laboratoires indépendants selon les normes ISO4548/4. Les résultats montrent que les filtres Champion sont plus efficaces que les filtres concurrents.

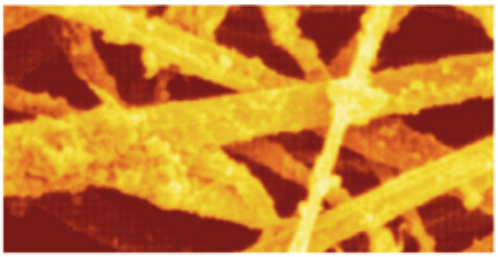
Longévité des filtres



Performance améliorée

Notre papier filtrant est unique et imprégné de résine qui élimine même les contaminants les plus néfastes de l'huile. Gaufré, durci et assemblé mécaniquement pour garantir un filtrage à 100%.

- Imprégné de fibres sophistiquées qui assurent rigidité et excellente résistance à la pression et à l'éclatement
- Le maillage des fibres donne structure et profondeur au papier
- Le papier filtrant capture non seulement les particules en surface, mais il les enferme également à l'intérieur du support, laissant passer nettement moins de particules vers le moteur



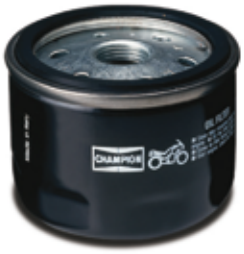
Fiabilité et protection MAXIMUM du moteur

Technische Information

Filter

Warum Champion wählen?

Champion Motorradfilter sind präzisionsgefertigt, um den Ansprüchen der Originalhersteller zu entsprechen oder sie zu übertreffen. Sie werden aus Materialien höchster Qualität und gemäß anspruchsvollen Standards hergestellt und gewährleisten so praktisch Störungsfreiheit. Auf der Straße (und im Gelände) erbringen sie maximale Leistungen mit beispiellosem Schutz.

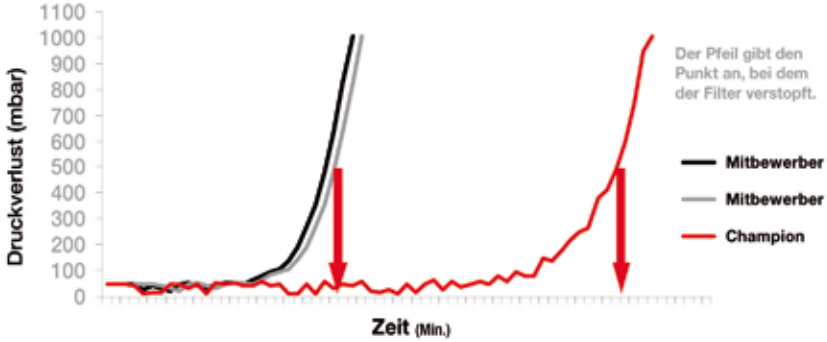


Vorteile von Champion

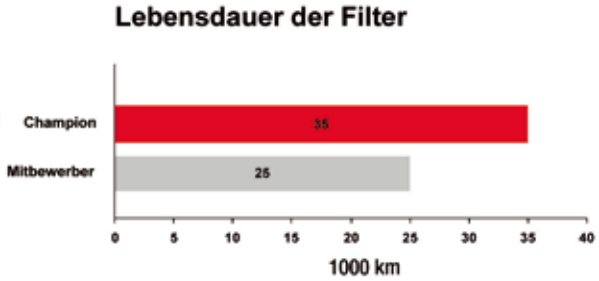
Längere Lebensdauer

Unabhängige Tests, (ISO 4548 - Öl, und ISO5011 - Luft) haben gezeigt, dass Champion-Filter die Konkurrenz leistungsmäßig übertreffen, und wir garantieren Qualität für unser gesamtes Motorradfilter-Programm.

Wirkungsgrad im Lebenszyklus



Der Test wurde von einem unabhängigen Institut gemäß dem Industriestandard ISO4548/4 durchgeführt. Das Diagramm zeigt deutlich, dass Champion wirksamer filtert als die Mitbewerber.



Überlegene Leistung

Unser Filterpapier ist einzigartig und imprägniert mit Harz, das sogar die schädlichsten Schadstoffe aus dem Öl beseitigt. Gefaltet, ausgehärtet und mechanisch verbunden, um 100% Filtration zu garantieren.

- **Imprägniert mit hochentwickelten Fasern, die Steifigkeit, gute Zug- und Druckfestigkeit gewährleisten**
- **Miteinander integrierte Faserschichten verleihen dem Papier Tiefe und Struktur**
- **Das Filterpapier fängt nicht nur Partikel auf der Oberfläche, sondern schließt auch Partikel innerhalb des Mediums ein, wodurch viel weniger Partikel in den Motor gelangen**

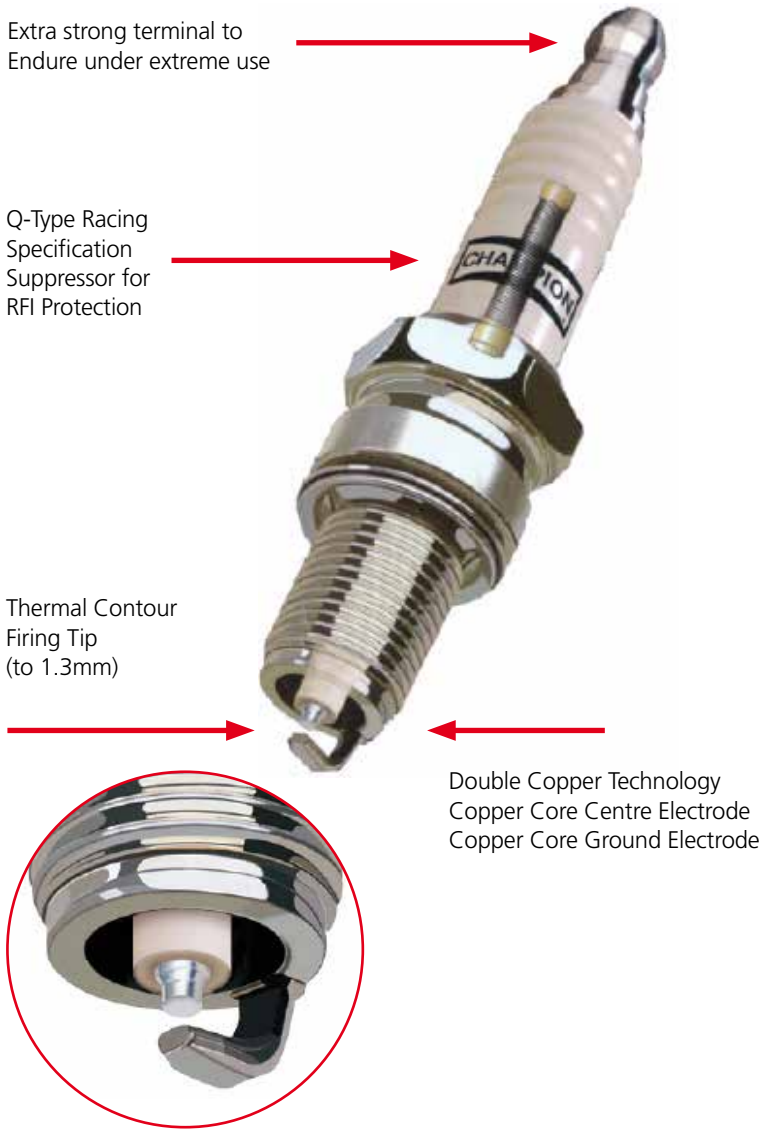
POWERSPORT ™

Fine-wire centre electrode and V-trimmed ground electrode produces the sharpest spark focus.
Long life and performance that far exceeds conventional plugs.

CHAMPION POWERSPORT ™ DESIGN



THERMAL CONTOUR FIRING TIP

Projected Core Nose

- Extended nose projection of the plug creates a longer path for heat to travel.
- The plug stays hot during periods of prolonged idling…preventing cold fouling.
- The plug stays cool at High RPM due to the Charge Cooling effect of the incoming Air/Fuel mixture.
- This gives POWERSPORT a much more dynamic heat range over standard plugs.

All of these characteristics allow you to use only one powersport code in replacement of different standard codes (see the table)

POWERSPORT ™

EN

Power Boost Firing End
Fine-wire projected electrode design delivers more power and maximum fouling protection. V-trimmed ground electrode keeps spark concentrated through all engine demands.

'Q' - Suppressor
Wire-wound low-ohm resistor enables full ignition energy to reach the cylinder where it is needed most.

Thermal Contour Firing Tip
Modifies electrode heat transfer to prevent deposits while idling and plug overheating during high-speed operation.

I

Punta di accensione che aumenta la potenza
L'elettrodo sporgente a filo sottile consente maggiore potenza e la massima protezione dagli imbrattamenti. L'elettrodo di massa a V mantiene la scintilla concentrata in presenza di qualsiasi fabbisogno del motore.

Soppressore 'Q'
La resistenza a filo a spirale a basso valore ohmico consente a tutta l'energia della scintilla di raggiungere il cilindro laddove è piu necessaria.

Punta di accensione a contorno termico
Modifica il trasferimento di calore degli elettrodi impedendo la formazione di depositi al regime di minimo e il surriscaldamento della candela agli alti regimi.

E

Extremo de encendido que aumenta la potencia
El diseno de electrodo proyectado de fi lamento fi no proporciona mas potencia y una maxima proteccion contra la incrustacion. El electrodo de tierra terminado en 'V' mantiene concentrada la chispa durante todas las exigencias del motor.

Supresor 'Q'
Resistor de hilo bobinado de baja resistencia que permite la llegada de la maxima energia de encendido al cilindro donde sea mas necesario.

Punta de encendido de contorno térmico
Modifi ca la transferencia termica de los electrodos para impedir la formacion de depositos al ralenti y el recalentamiento de la bujia durante la operacion a alta velocidad

F

Pointe d'allumage plus robuste
L'electrode saillante a fi l fi n favorise plus de puissance et une protection maximale contre l'encrassement. L'electrode de masse en V concentre parfaitement l'etincelle, peu importe les exigences du moteur.

Dispositif antiparasite de type 'Q'
La resistance a bobine a induction a faible resistance ohmique permet a toute l'energie de l'etincelle d'atteindre le cylindre, la ou elle est le plus necessaire.

Pointe d'allumage à contour thermique
Modifi e le transfert de chaleur afin de prevenir l'accumulation de depots au ralenti et la surchauffe de la bougie lors de la conduite a haute vitesse.

D

Zündung mit Power Boost
Ein mit Feindraht geschutztes Elektrodendesign ergibt mehr Leistung und maximalen Schutz vor Verschmutzung. Die V-beschnittene Masseelektrode halt die Zundkerze wahrend samtlicher Motoranforderungen konzentriert.

'Q'-Entstörer
Drahtgewickelter Widerstand mit geringem Ohm ermoglicht, dass die vollstandige Zundungsenergie den Zylinder erreicht, wo sie am meisten benotigt wird.

Zündungsspitze mit thermischer Kontur
Modifi ziert den Warmetransfer der Elektrode, um Ablagerungen wahrend des Leerlaufs und die Uberhitzung der Kerze im ochgeschwindigkeitsbetrieb zu vermeiden.

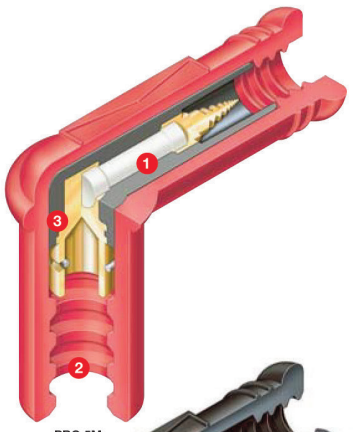
Features & Benefits / Caractéristiques et avantages / Características y ventajas / Caratteristiche e vantaggi / Produkteigenschaften und -vorteile

90° Resistor Boot / Capuchon résistant a 90° / Capuchón rectangular con resistencia / Cappuccio resistivo da 90° / 90° -abgewinkelter Widerstandsstecker

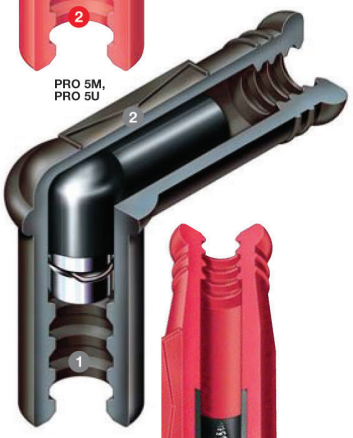
1. **5 k resistor** - suppresses interference (RFI) / Résistance de 5 k pour éliminer les interférences / Resistencia de 5 k – excelente supresión de interferencias / Resistore a 5 k per sopprimere le radiointerferenze / 5 k Widerstand – unterdrückt Störeinflüsse.
2. **Ribbed seals on both ends** - gives superior water tight connection / Joints nervurés aux deux extrémités pour une imperméabilité maximale / Nervaduras interiores en ambos extremos – asegura una conexión firme y resistente a la humedad / Nervature di tenuta su entrambi i lati – per una perfetta impermeabilità / gerippte Klemmanschlüsse an beiden Enden – verhindert zuverlässig das Eindringen von Feuchtigkeit.
3. **Silicone jacket** - provides superior heat resistance (up to 250°C) / Revêtement extérieur en silicone pour une résistance à la chaleur optimale (jusqu'à 250°C) / Cuerpo de silicona – mejor resistencia a altas temperaturas (hasta 250°C) / Rivestimento esterno in silicone – garantisce un'ottimale resistenza al calore (Fino a 250 gradi) / Silikon – Zündkerzenstecker – extrem hitzebeständig (bis zu 250°C)



PRO 5M, PRO 5U

90° Non-Resistor Boot / Capuchon non résistif, coudé à 90° / Capuchón rectangular sin resistencia / Cappuccio non resistivo da 90° / 90° -abgewinkelter Stecker (ohne Widerstand)

1. **Ribbed seals on both ends** - gives superior water-tight connection / Joints nervurés aux deux extrémités pour une imperméabilité maximale / Nervaduras interiores en ambos extremos – asegura una conexión firme y resistente a la humedad / Nervature di tenuta su entrambi i lati – per una perfetta impermeabilità / gerippte Klemmanschlüsse an beiden Enden – verhindert zuverlässig das Eindringen von Feuchtigkeit
2. **Silicone jacket** - provides superior heat resistance (up to 250°C) / Revêtement extérieur en silicone pour une résistance à la chaleur optimale (jusqu'à 250°C / Cuerpo de silicona – mejor resistencia a altas temperaturas (hasta 250°C) / Rivestimento esterno in silicone – garantisce un'ottimale resistenza al calore (Fino a 250 gradi) / Silikon – Zündkerzenstecker – extrem hitzebeständig (bis zu 250°C)



PRO 0U

180° Resistor Boot / Capuchon résistif, droit / Capuchón recto con resistencia / Cappuccio resitivo da 180° / 180°-Widerstandstecker

Suitable for competition/trial use / convient pour compétition et trial / Apropiado para uso en competición y trial / Indicato per competizione e per uso fuori strada: motocross, trial ecc / passend für Motorräder und Motorsport

1. **5 kΩ resistor** - suppresses interference (RFI) / Résistance de 5 kΩ pour éliminer les interférences / Resistencia de 5 kΩ – excelente supresión de interferencias / Resistore a 5 kΩ per sopprimere le radiointerferenze / 5 kΩ Widerstand – unterdrückt Störeinflüsse
2. **Ribbed seals on both ends** - gives superior water tight connection / Joints nervurés aux deux extrémités pour une imperméabilité maximale / Nervaduras interiores en ambos extremos – asegura una conexión firme y resistente a la humedad / Nervature di tenuta su entrambi i lati – per una perfetta impermeabilità / gerippte Klemmanschlüsse an beiden Enden – verhindert zuverlässig das Eindringen von Feuchtigkeit)
3. **Silicone jacket** - provides superior heat resistance (up to 250°C) / Revêtement extérieur en silicone pour une résistance à la chaleur optimale (jusqu'à 250°C / Cuerpo de silicona – Mejor resistencia a altas temperaturas (hasta 250°C) / Rivestimento esterno in silicone – garantisce un'ottimale resistenza al calore (Fino a 250 gradi) / Silikon – Zündkerzenstecker – extrem hitzebeständig (bis zu 250°C)

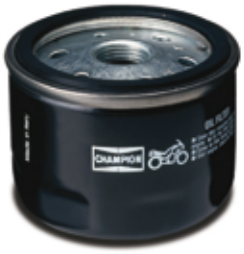
Filters

So why choose Champion?

Champion motorcycle filters are precision-engineered to match or exceed OE standards. They are made from the highest quality materials and manufactured to exacting standards ensuring virtually zero defects. On the road (and off the road) they deliver maximum performance with unrivalled protection.

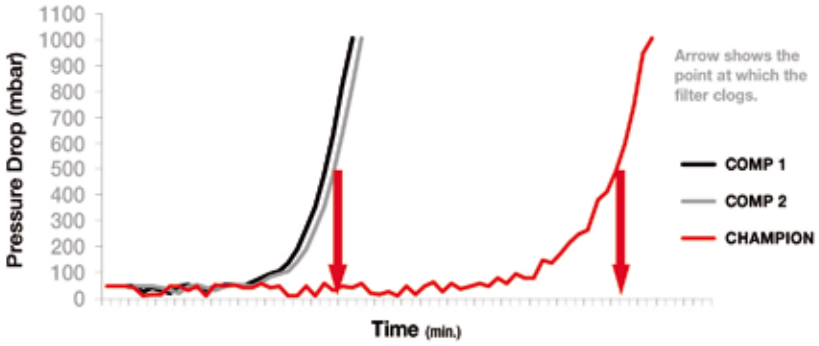


Advantages of choosing Champion

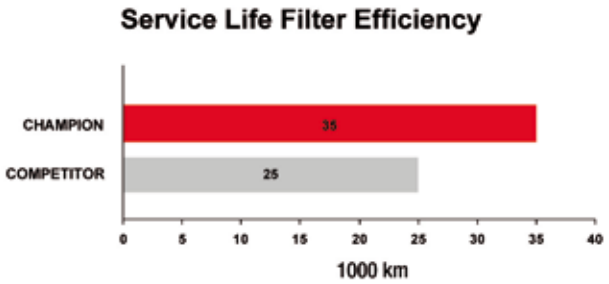
Extended life

Independent tests, (ISO 4548 - oil, and ISO5011 - air) have shown that Champion filters outperform the competition. We guarantee quality across our entire motorcycle filter program.

Life Cycle Efficiency



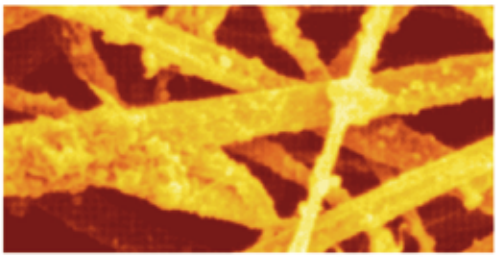
Tests carried out by independent source according to industry standard ISO 4548/4. The graph clearly shows that the Champion filter filters more efficiently than the competitor's filters.



Superior performance

Our filter paper is unique and impregnated with resin that removes even the most damaging contaminants from the oil. Pleated, cured and mechanically joined to guarantee 100% filtration.

- Impregnated with sophisticated fibres ensuring rigidity, good tensile and burst strength
- Layers of fibres integrated across each other give the paper depth and structure
- Filter paper traps particles on the surface and also locks them inside the media allowing far fewer particles through the engine



Reliability with MAXIMUM engine protection

Informazioni Tecniche

Filtri

Perché scegliere Champion?

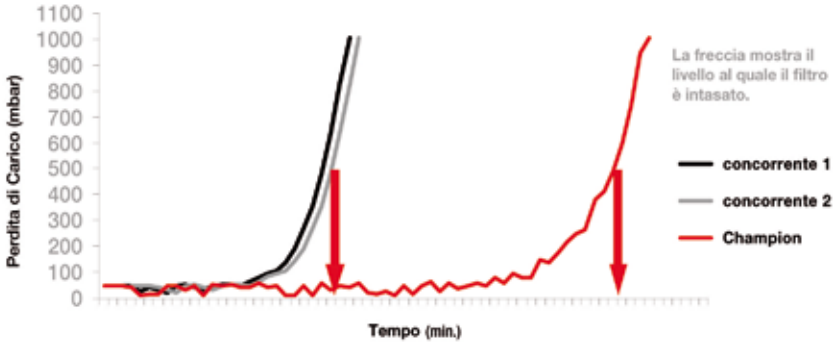
I filtri moto Champion sono progettati con precisione per eguagliare o superare gli standard di primo impianto. Sono realizzati con materiali della massima qualità in conformità a rigorose norme che garantiscono la perfezione. Sulla strada (e fuori strada) assicurano le massime prestazioni con una protezione ineguagliabile.

Vantaggi della scelta Champion

Durata più lunga

Test indipendenti (ISO 4548 per i filtri dell'olio, e ISO5011 per i filtri dell'aria) hanno dimostrato che i filtri Champion surclassano la concorrenza; noi garantiamo inoltre la qualità in tutta la nostra gamma di filtri moto.

Efficienza di Lavoro

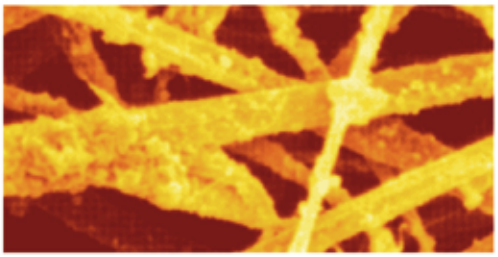


I tests sono sostenuti da un ente indipendente secondo la normativa ISO 4558/4. Il grafico mostra chiaramente che il filtro Champion lavora con più efficienza rispetto agli altri 2 concorrenti.

Prestazioni eccezionali

La nostra carta filtrante è unica nel suo genere e impregnata con una resina che rimuove anche i contaminanti più nocivi dall'olio. Pieghettata, trattata e meccanicamente fissata per garantire un filtraggio al 100%.

- **Impregnata con fibre sofisticate per garantire rigidità, buona resistenza sia a trazione che allo scoppio**
- **Strati di fibre integrati e sovrapposti conferiscono spessor e struttura al filtro**
- **La carta filtro non solo intercetta le particelle sulla superficie, ma le blocca anche all'interno del fluidi lasciando passare nettamente meno particelle verso il motore**



Affidabilità con MASSIMA protezione del motore

Información Técnica

Filtros

¿Por qué elegir Champion?

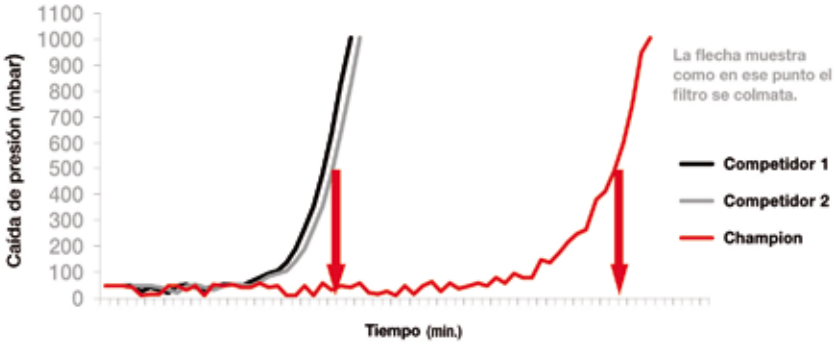
Los filtros Champion para motocicletas están diseñados con la precisión necesaria para alcanzar e incluso supera los estándares marcados por el OE. Construidos con los materiales de la más alta calidad, según los niveles de solicitud más exigentes, aseguran de esta manera su perfección, ofreciendo el máximo rendimiento tanto en aplicaciones para carretera como off-road, aportando siempre las máximas prestaciones.

Las ventajas de elegir Champion

Prolongada vida útil

Los ensayos independientes realizados (ISO 4548 - aceite e ISO5011 - aire) han demostrado que los filtros Champion superan las prestaciones de la competencia. De esta manera podemos garantizar la óptima calidad en toda nuestra oferta en filtros para motocicletas.

Eficiencia en el ciclo de vida

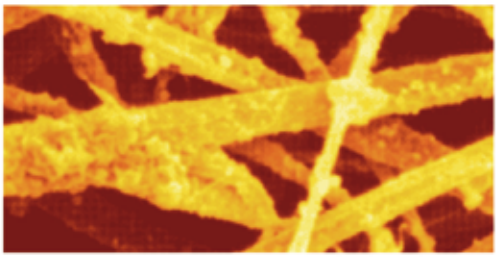


Ensayos realizados por laboratorios independientes aseguran la calidad continua según la normativa ISO 4548/4. El gráfico muestra claramente como los filtros Champion filtran más eficientemente que los filtros de la competencia.

Rendimiento Superior

Nuestro exclusivo papel de filtrado, recubierto e impregnado de resina, elimina los contaminantes más perjudiciales para el motor. Con la tecnología de plegado, endurecido y unido mecánicamente garantizan el 100% de filtrado.

- Impregnado de sofisticadas fibras asegurando su rigidez y una buena resistencia a la tracción y ruptura
- Las capas de fibras integradas, entrelazándose y conformando el espesor y estructura al papel
- El papel de filtro no sólo atrapa las partículas en la superficie, sino también las encierra en el medio impidiendo así que muchas partículas pasen al motor



Fiabilidad con la MÁXIMA protección para el motor

Informations Techniques

Filtres

Pourquoi opter pour les filtres Champion ?

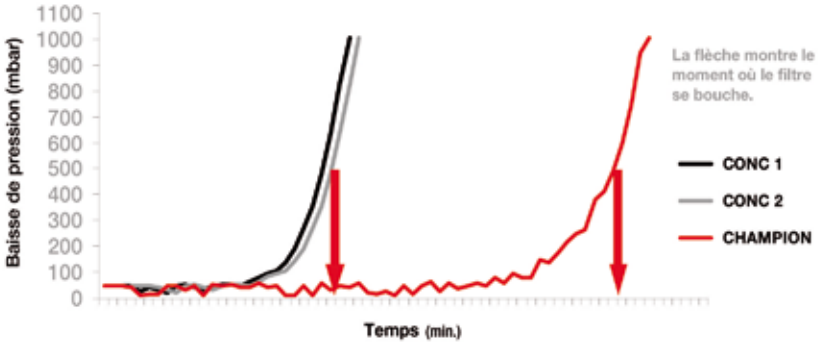
Les filtres pour motos Champion sont développés selon des procédures d'ingénierie qui égalent, voire surpassent, les normes d'origine. Ils sont produits à partir de matériaux de qualité supérieure, en appliquant les normes de fabrication les plus strictes, garantissant l'absence virtuelle du moindre défaut. Sur la route (et en dehors des sentiers battus), ils assurent une performance optimale et une protection inégalée.

Avantages du choix Champion

Durée de vie plus longue

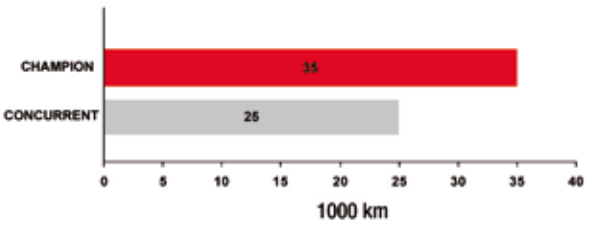
Des tests indépendants (ISO 4548 – pour le filtre à l'huile et ISO5011 – pour le filtre à air) ont démontré que les filtres Champion surclassent la concurrence et nous garantissons en plus de la qualité pour toute notre gamme de filtres motos.

Efficacité tout au long de la durée de vie du filtre



Tests menés par des laboratoires indépendants selon les normes ISO4548/4. Les résultats montrent que les filtres Champion sont plus efficaces que les filtres concurrents.

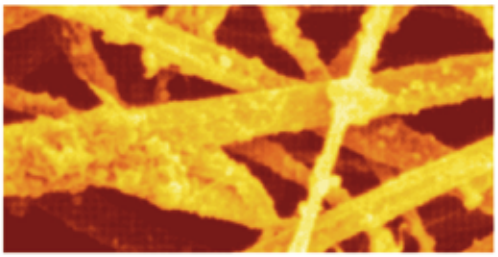
Longévité des filtres



Performance améliorée

Notre papier filtrant est unique et imprégné de résine qui élimine même les contaminants les plus néfastes de l'huile. Gaufré, durci et assemblé mécaniquement pour garantir un filtrage à 100%.

- Imprégné de fibres sophistiquées qui assurent rigidité et excellente résistance à la pression et à l'éclatement
- Le maillage des fibres donne structure et profondeur au papier
- Le papier filtrant capture non seulement les particules en surface, mais il les enferme également à l'intérieur du support, laissant passer nettement moins de particules vers le moteur



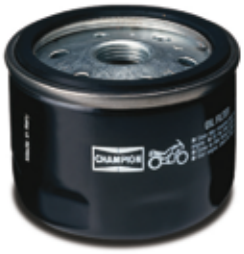
Fiabilité et protection MAXIMUM du moteur

Technische Information

Filter

Warum Champion wählen?

Champion Motorradfilter sind präzisionsgefertigt, um den Ansprüchen der Originalhersteller zu entsprechen oder sie zu übertreffen. Sie werden aus Materialien höchster Qualität und gemäß anspruchsvollen Standards hergestellt und gewährleisten so praktisch Störungsfreiheit. Auf der Straße (und im Gelände) erbringen sie maximale Leistungen mit beispiellosem Schutz.

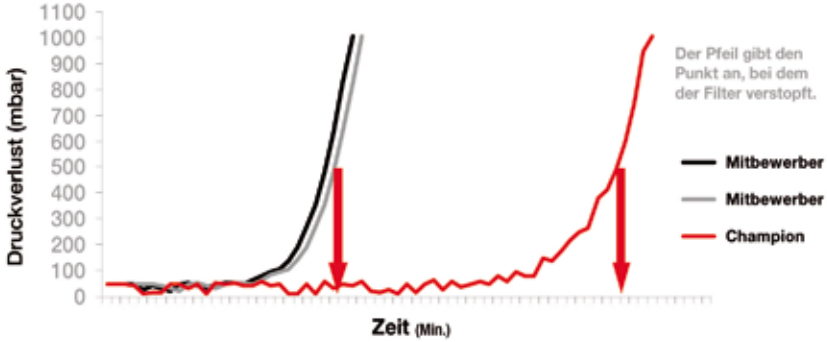


Vorteile von Champion

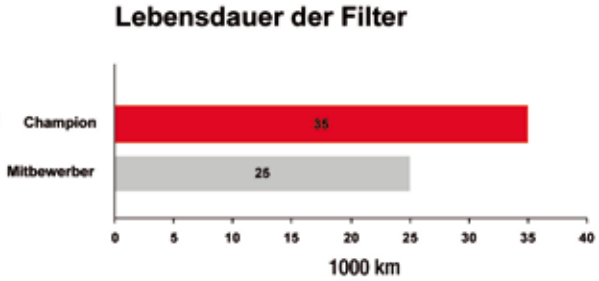
Längere Lebensdauer

Unabhängige Tests, (ISO 4548 - Öl, und ISO5011 - Luft) haben gezeigt, dass Champion-Filter die Konkurrenz leistungsmäßig übertreffen, und wir garantieren Qualität für unser gesamtes Motorradfilter-Programm.

Wirkungsgrad im Lebenszyklus



Der Test wurde von einem unabhängigen Institut gemäß dem Industriestandard ISO4548/4 durchgeführt. Das Diagramm zeigt deutlich, dass Champion wirksamer filtert als die Mitbewerber.



Überlegene Leistung

Unser Filterpapier ist einzigartig und imprägniert mit Harz, das sogar die schädlichsten Schadstoffe aus dem Öl beseitigt. Gefaltet, ausgehärtet und mechanisch verbunden, um 100% Filtration zu garantieren.

- **Imprägniert mit hochentwickelten Fasern, die Steifigkeit, gute Zug- und Druckfestigkeit gewährleisten**
- **Miteinander integrierte Faserschichten verleihen dem Papier Tiefe und Struktur**
- **Das Filterpapier fängt nicht nur Partikel auf der Oberfläche, sondern schließt auch Partikel innerhalb des Mediums ein, wodurch viel weniger Partikel in den Motor gelangen**

COLD TYPE
Plug operates at higher temperatures
& dissipates heat quickly

HOT TYPE
Plug operates at lower temperatures
& retains more heat, dissipates slowly

For guidance only, use application data for correct recommendations

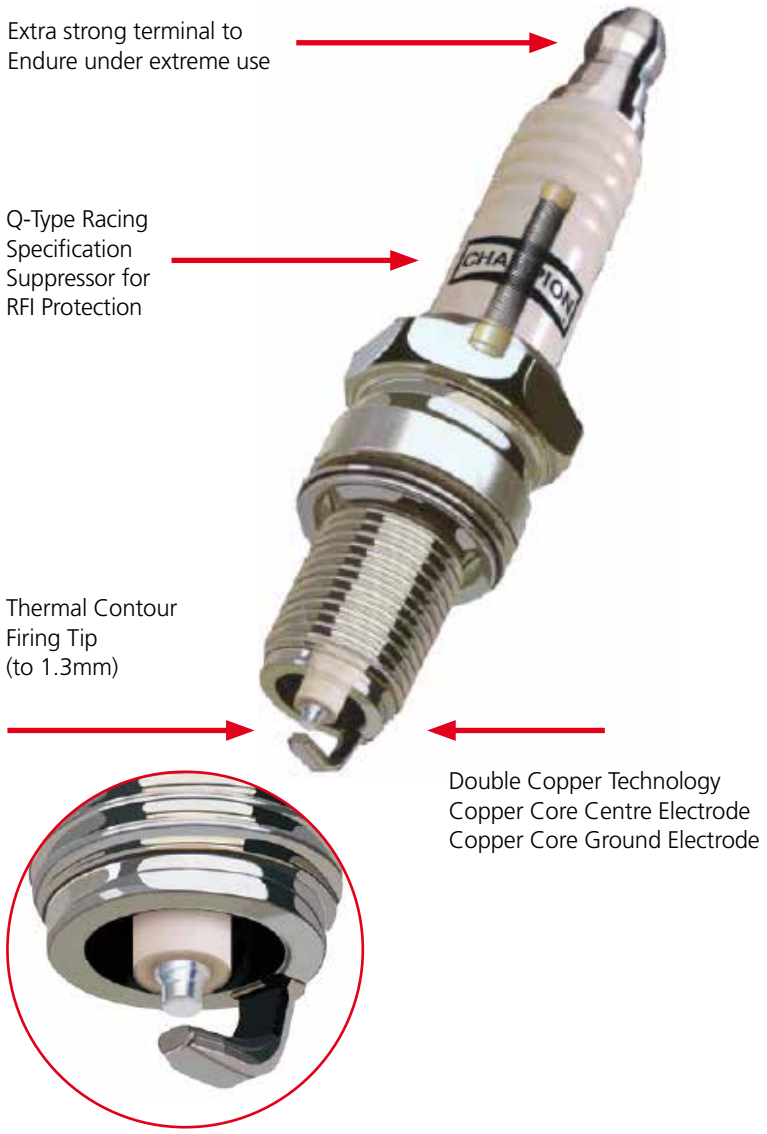
POWERSPORT ™

Fine-wire centre electrode and V-trimmed ground electrode produces the sharpest spark focus.
Long life and performance that far exceeds conventional plugs.

CHAMPION POWERSPORT ™ DESIGN



THERMAL CONTOUR FIRING TIP

Projected Core Nose

- Extended nose projection of the plug creates a longer path for heat to travel.
- The plug stays hot during periods of prolonged idling…preventing cold fouling.
- The plug stays cool at High RPM due to the Charge Cooling effect of the incoming Air/Fuel mixture.
- This gives POWERSPORT a much more dynamic heat range over standard plugs.

All of these characteristics allow you to use only one powersport code in replacement of different standard codes (see the table)

POWERSPORT ™

EN

Power Boost Firing End
Fine-wire projected electrode design delivers more power and maximum fouling protection. V-trimmed ground electrode keeps spark concentrated through all engine demands.

'Q' - Suppressor
Wire-wound low-ohm resistor enables full ignition energy to reach the cylinder where it is needed most.

Thermal Contour Firing Tip
Modifies electrode heat transfer to prevent deposits while idling and plug overheating during high-speed operation.

I

Punta di accensione che aumenta la potenza
L'elettrodo sporgente a filo sottile consente maggiore potenza e la massima protezione dagli imbrattamenti. L'elettrodo di massa a V mantiene la scintilla concentrata in presenza di qualsiasi fabbisogno del motore.

Soppressore 'Q'
La resistenza a filo a spirale a basso valore ohmico consente a tutta l'energia della scintilla di raggiungere il cilindro laddove è piu necessaria.

Punta di accensione a contorno termico
Modifica il trasferimento di calore degli elettrodi impedendo la formazione di depositi al regime di minimo e il surriscaldamento della candela agli alti regimi.

E

Extremo de encendido que aumenta la potencia
El diseno de electrodo proyectado de fi lamento fi no proporciona mas potencia y una maxima proteccion contra la incrustacion. El electrodo de tierra terminado en 'V' mantiene concentrada la chispa durante todas las exigencias del motor.

Supresor 'Q'
Resistor de hilo bobinado de baja resistencia que permite la llegada de la maxima energia de encendido al cilindro donde sea mas necesario.

Punta de encendido de contorno térmico
Modifi ca la transferencia termica de los electrodos para impedir la formacion de depositos al ralenti y el recalentamiento de la bujia durante la operacion a alta velocidad

F

Pointe d'allumage plus robuste
L'electrode saillante a fi l fi n favorise plus de puissance et une protection maximale contre l'encrassement. L'electrode de masse en V concentre parfaitement l'etincelle, peu importe les exigences du moteur.

Dispositif antiparasite de type 'Q'
La resistance a bobine a induction a faible resistance ohmique permet a toute l'energie de l'etincelle d'atteindre le cylindre, la ou elle est le plus necessaire.

Pointe d'allumage à contour thermique
Modifi e le transfert de chaleur afin de prevenir l'accumulation de depots au ralenti et la surchauffe de la bougie lors de la conduite a haute vitesse.

D

Zündung mit Power Boost
Ein mit Feindraht geschutztes Elektrodendesign ergibt mehr Leistung und maximalen Schutz vor Verschmutzung. Die V-beschnittene Masseelektrode halt die Zundkerze wahrend samtlicher Motoranforderungen konzentriert.

'Q'-Entstörer
Drahtgewickelter Widerstand mit geringem Ohm ermoglicht, dass die vollstandige Zundungsenergie den Zylinder erreicht, wo sie am meisten benotigt wird.

Zündungsspitze mit thermischer Kontur
Modifi ziert den Warmetransfer der Elektrode, um Ablagerungen wahrend des Leerlaufs und die Uberhitzung der Kerze im ochgeschwindigkeitsbetrieb zu vermeiden.
