# How to install EdiSmart Android APP

To install EdiSmart APP you need to allow install apps from unknown source first.

To do that please go to **Settings** and in search field look for **Unknown**.
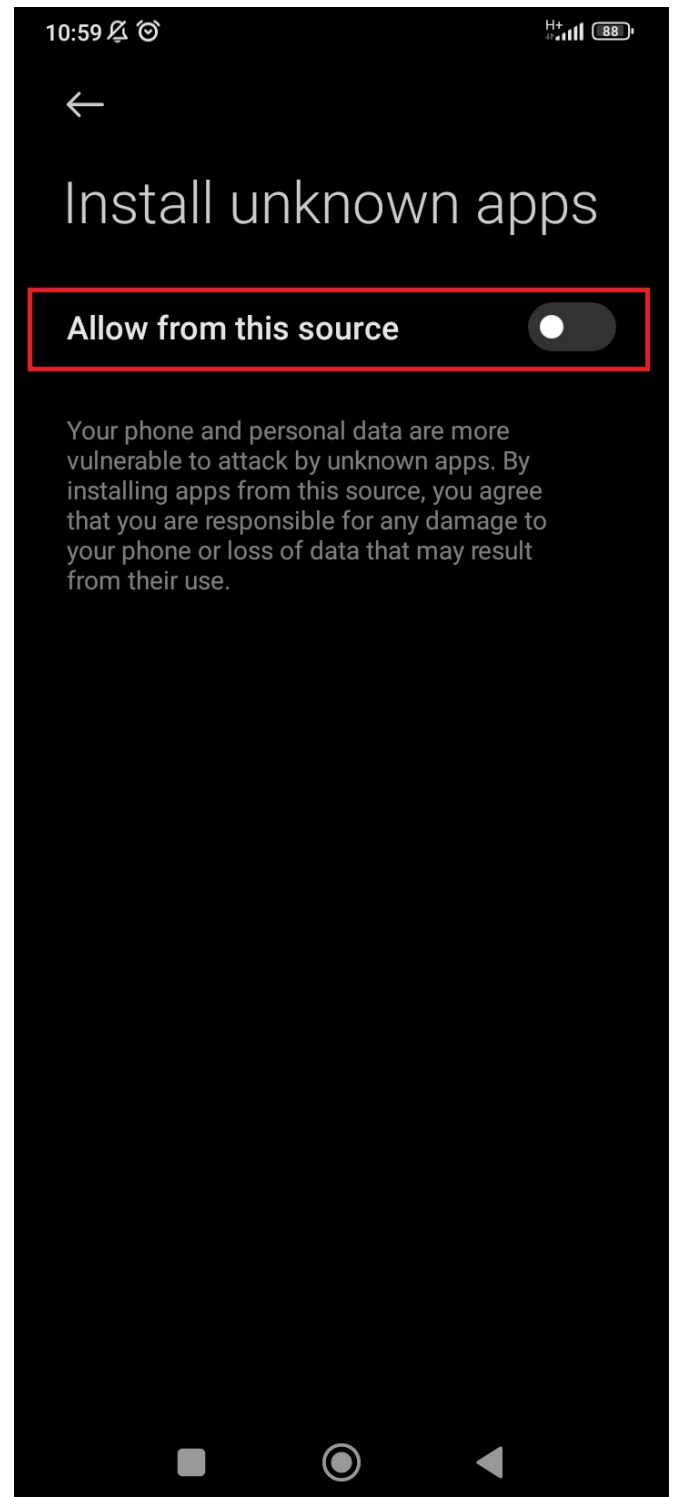

Tap **Install unknown apps**.

In Special app access please find and tap **Install unknown apps**.

In Install unknown apps please find and tap **File Manager**.

Please enable **Allow from this source**.

In order to allow installation of the APP from this source, please tick **I'm aware of the possible risks, and assumed all possible consequences voluntarily.** and then tap **OK**.
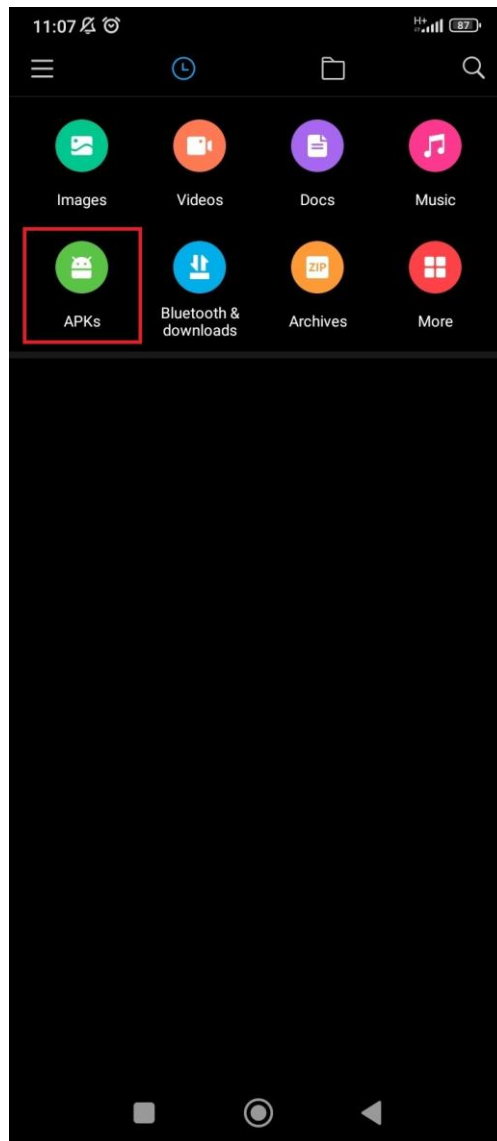

Now you can download and install EdiSmart APP.

To download EdiSmart APP, please follow instructions on Edimax website or use link below

https://www.edimax.com/edimax/mw/cufiles/files/faq/app/EdiSmart/EdiSmart_V2.0.17.1019.apk

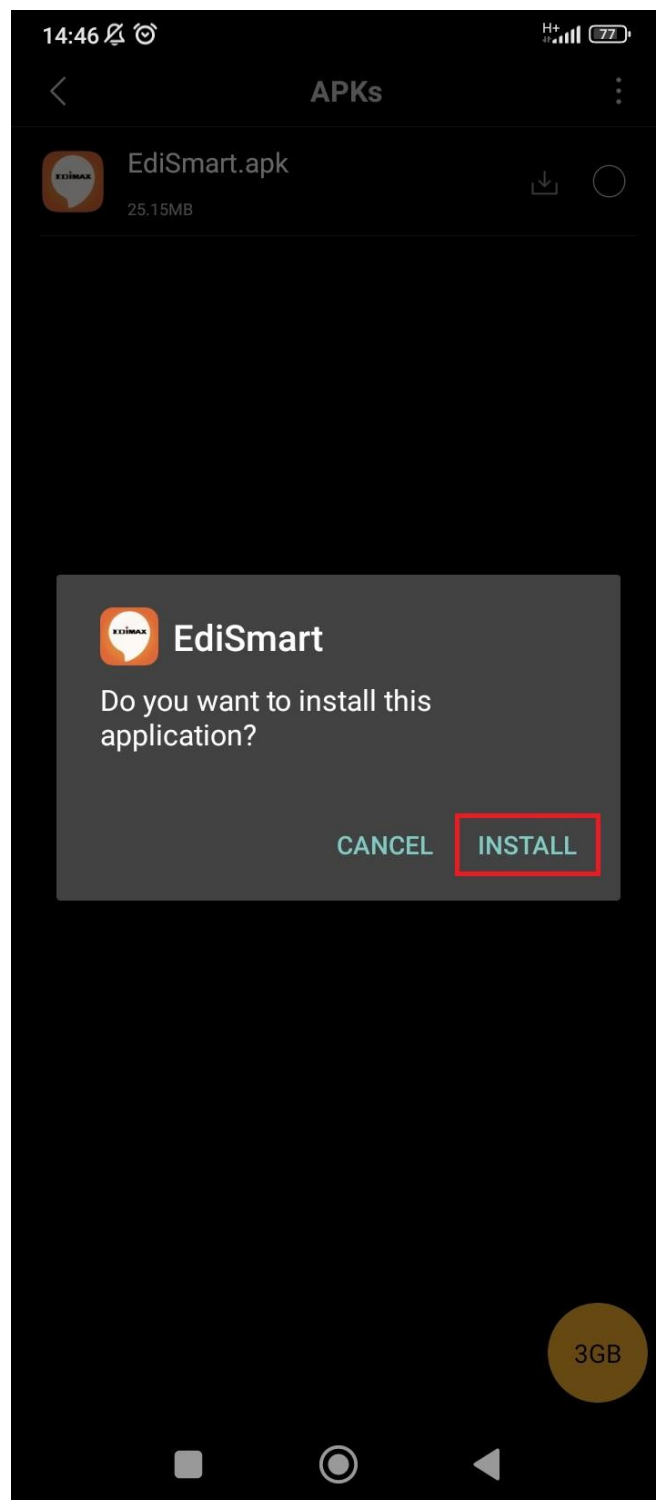

Please open **File Manager** after downloading the file. Downloaded EdiSmart APP can be found in APKs.
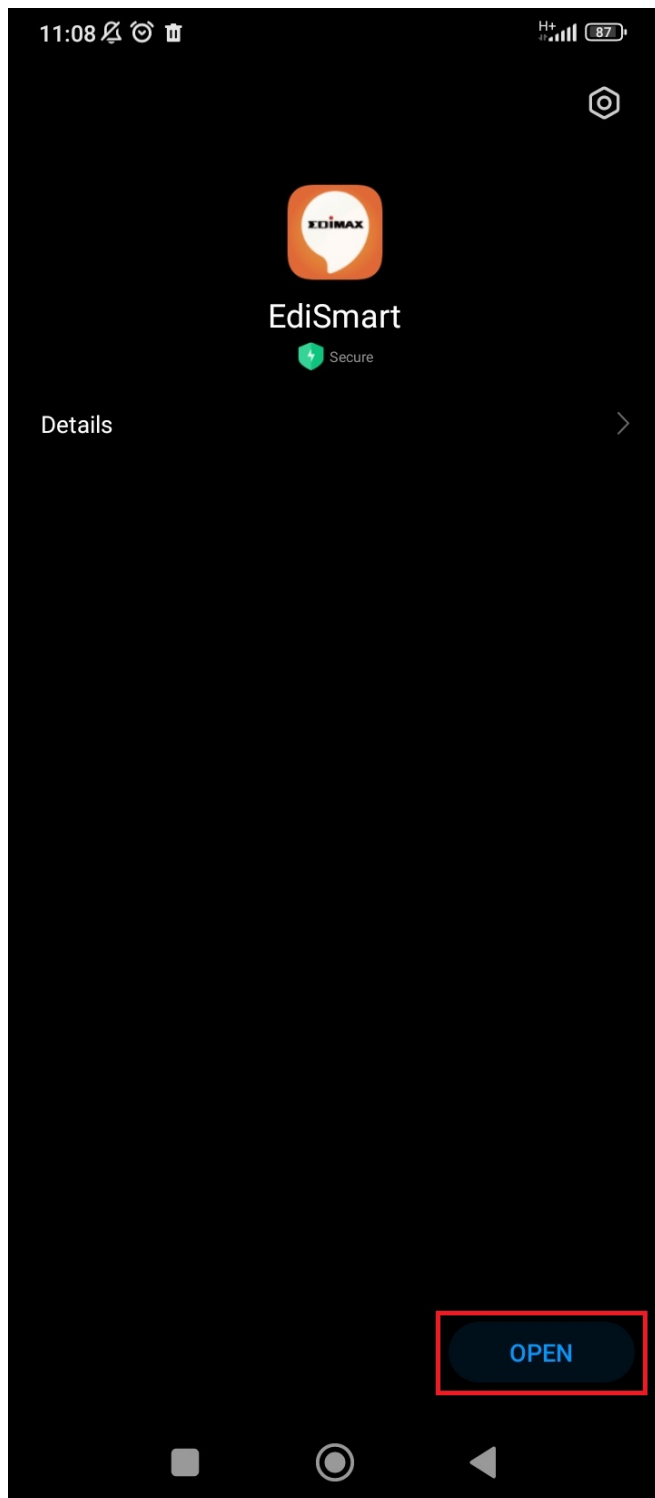

Tap downloaded EdiSmart APK file.

Tap **Install** to install EdiSmart app.

After installing you can open app clicking **Open** or EdiSmart icon in home screen.

Please remember to disable **Allow from this source** for **File Manager** after installing EdiSmart APP.
