Appliances you can rely on

Good kitchen appliances should fit with the people who use them, and we all have different needs, tastes and budgets. At IKEA, we work closely with our suppliers to share our knowledge about life at home, and they share their expertise with us. Together we create appliances to rely on at prices that fit every size of wallet. To make the selection easier for you, we have categorised our appliances into three series offering different price and functionality levels.

Series 300: All the basic functionalities you need in an appliance to simplify your everyday life.

Series 500: Added functionalities to make your appliance more fun and inspiring, and household work easier.

Series 700: All the functionalities you need – and then some, so you can thrive with your appliance. Above and beyond in innovation and design.

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN, 2 year).

Find your ideal set of appliances

Getting a new kitchen involves some decisions. What style are you looking for? What do you need your appliances to do? What’s your budget? To make it easier for you, we have developed our appliances to fit perfectly together as well as with our kitchens. You’ll find more information about every individual appliance on the following pages.

Basically everything you need

In this set you have all the basic functions you need at a price you won’t believe. The design is clean and LAGAN oven, hob and extractor hood all match each other perfectly. For easy cooking and baking, you have everything at hand.

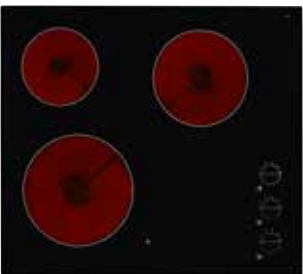

LAGAN oven, white.

504.169.21 199€

LAGAN wall mounted extractor hood, white.

504.013.83 49.99€

LAGAN HGC3K hob.

501.823.52 149€

Plug in and cook!

TILLREDA appliances are easy to use and very easy to place, with a plug-in/plug-out feature that makes them especially suitable for small-sized kitchens. The induction hob heats up fast and is highly energy-efficient - plus it's easy to stow away or hang on the wall to free up counter space for other activities.

The handy microwave oven is easy to place just about anywhere. There's no handle - just push to open. A perfect option when there is no space for a built-in microwave.

TILLREDA portable induction hob, white.
104.867.94 55€

TILLREDA microwave oven, white.
504.867.92 69.99€

Everyday cooking made easy - and more efficient

The appliances in this set offer all the functions you need for everyday use along with a clean and simple design that make them easy to understand and use.

GÖRLIG oven in stainless steel brings a classic, time-less look to your kitchen while the quick and energy-efficient GRUNDAD induction hob will have you cooking meals to perfection in no time. RYTMISK led light strip illuminates the entire worktop adding ambience and an effective work light.

GÖRLIG oven, stainless steel.
204.117.03 249€

RYTMISK wall mounted extractor hood, stainless steel.
404.432.13 199€

GRUNDAD induction hob, IKEA 300, black.
404.670.82 269€

An appetising mix of design and function

If you want a stylish kitchen that stands out, this set in matt black finish is a perfect choice. As all our forced air ovens, EFTERSMAK helps you to cook several dishes simultaneously without compromising on intended

tastes. The extractor hood has a LED lighting strip giving you an even light over the entire hob. Not to mention its bold design, which will be the icing on the cake that turns your kitchen into a modern style statement.

EFTERSMAK forced air oven, black.
704.117.29 499€

EFTERSMAK microwave oven, black.
904.117.71 579€

FOKUSERA wall mounted extractor hood, black.
503.893.38 349€

SMAKLIG induction hob, IKEA 500, black.
504.678.83 499€

Classic elegance on the outside, extra everything on the inside

A classic set with appliances filled with great cooking functions! This is a perfect combination for you who like to cook and bake. The ANRÄTTA forced air oven has a pyrolytic cleaning function burning grease and

food residue to ashes. The flexible bridge zone on the SMAKLIG induction hob adapts to different pot shapes and sizes and the angled BEMÖTA extractor hood makes the area around the hob more accessible.

ANRÄTTA forced air oven with pyrolytic function, stainless steel.
004.117.18 599€

ANRÄTTA micro combi oven, stainless steel.
104.117.65 649€

BEMÖTA wall mounted extractor hood, stainless steel.
903.893.36 549€

SMAKLIG induction hob, IKEA 500, black.
504.678.83 499€

A gourmet kitchen for the food lover

FINSMAKARE is a super modern set with all the functions you could think of. The oven has a steam function which retains the food's taste and nutrients, keeping it moist and full of flavour. With the oven's self-cleaning pyrolytic function you just press a button to burn away

grease and remaining food. The angled fan makes the area around the hob more accessible. And, talking about the fast and energy saving induction hob: the flexible zones adapt to your pots and pans. All in all, a great choice for you who loves to cook.

FINSMAKARE forced air oven with pyro/steam function.
504.117.30 **799€**

FINSMAKARE microwave combi with forced air.
504.117.68 **749€**

FINSMAKARE wall mounted extractor hood.
503.891.40 **549€**

HÖGKLASSIG induction hob, IKEA 700, black.
404.678.26 **599€**

Ovens

Our ovens are beautifully crafted to meet all your cooking demands and needs. They come with a wide range of functions and integrated accessories to make any cooking experience easier and more fun. Whether you are looking for advanced cooking functions or convenient self-cleaning programmes, we have the right oven for you. Simply choose the one that suits the way you cook and place it where you want to make working in your kitchen easier.

When choosing an oven, consider the following:

01

How often do you use your oven, and for what kind of food? We have everything from very simple, easy-to-use ovens to more advanced with lots of different functions.

02

How much food do you cook at the same time? Our ovens come in sizes from 56 to 72 litres.

03

What style do you prefer? No matter if your kitchen goes in a more modern or classic style, we have ovens that will match perfectly.

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).

Tips

Did you know that smoothly sliding oven rails make cooking a lot simpler, and safer? To load and unload food without getting burned is a piece of cake as you get a better grip on the ovenware – when using oven gloves, that is. And it'll be a snap to pull out the food to check the temperature, stir or lubricate, too.

Did you know that you can clean the oven and keep it as new with close to zero effort from your part? With the self-cleaning pyrolytic function you heat up the oven to burn all grease and food residue to ashes. All you have to do is to wipe it out afterwards.

Types

Ovens

Ideal for you who wants an easy to use oven, including top and bottom heat and all the basic functions you need for cooking and baking.

Forced air ovens with self-cleaning/ pyrolytic function

Ideal for you who love to cook but not the clean. These ovens have the same functions as forced air ovens, plus they're easy to keep clean. Just press a button to burn grease and food residue to ashes and wipe it out with a clean cloth.

Forced air ovens

Ideal for you who loves to cook. A fan spread the heat fast and evenly, letting you cook different dishes at the same time without mixing flavours.

Forced air ovens with steam function

Ideal for you who love to cook healthy food. This type of oven has the same functions as forced air ovens, but with the addition of the steam function. The combination of steam and heat retains more taste and nutrients, while making the food soft and moist on the inside and crisp and brown on the outside.

Key features

Spacious inner dimensions with up to 5 cooking levels ensure you have plenty of room for your food. Choose between ovens with volumes ranging from 55 to 72 litres.

Smooth-sliding rails let you load and unload food without getting burned as you get a better grip on the ovenware. Pull your food out to fast and steady check the temperature, stir or lubricate.

Get the roast just right every time using the integrated **meat thermometer** with temperature sensor.

A built-in modern-looking **clock** is ideal for keeping an eye on the time while you're cooking.

An easy to use and keep clean **touch control** adds a modern touch to any kitchen.

Anti-finger print finish makes it easy to keep the stainless-steel surface sparkling clean day in and day out.

With **pre-set cooking programs** you can choose the proper setting for different food, dishes and recipes – and get the same yummy result every time.

Child-safety

Our oven doors have a child-safety lock to make it safe for kids to be in the kitchen and take part in all the activities.

Main cooking functions

Top and bottom heating is ideal for cooking dishes with a crispy finish and for slow cooking of casseroles.

With the **steam** function you combine steam and hot air to get optimal humidity and heat levels, keeping food soft and moist on the inside, and crisp and brown on the outside.

The **self-cleaning pyrolytic** function makes it easier for you to clean the oven. Grease and food residue are burned to ashes that you easily clean out with a cloth.

The **fan forced air convection** spreads the heat quickly and evenly, allowing you to cook or bake several dishes simultaneously without flavours spreading between them.

With the **grill** function that distributes heat evenly over your food, you get that tasty, finger-licking surface on meat and vegetables, as well as a nice golden-brown colour on your gratins.

The **bread/pizza baking** function gives your food a more intense brown outside and a mouth-watering crispy bottom.

The special **pastry** function can help you to get the perfect moist topping on your baked cookies and pies.

The **warming program** enables you to keep food warm without becoming overcooked or burnt.

The fast **quick pre heat** function warms up the oven quickly.

Thaw your food seven times faster using the **quick defrost** function.

OVENS

LAGAN A

Oven

199€

White. 504.169.21

Microwave ovens

When the hustle of everyday life leaves you with the need for speed, a microwave or microwave combi oven is a perfect choice in every way. They are quick, energy efficient and perfect for reheating or defrosting. And with today's technology, we've got models that you can rely on completely for your cooking and baking needs. Just place any of them with a matching oven – it will look great and give you cooking flexibility.

When choosing a microwave oven, consider the following:

01

How often do you use your micro, and for what kind of food? We have everything from very simple, easy-to-use micros to more advanced microwaves/microwave combi ovens with lots of different functions.

02

How much food do you cook at the same time? With a microwave combi oven you can have all in one or get an extra oven when the big family comes to visit.

03

What style do you prefer? No matter if your kitchen goes in a more modern or classic fashion, we have micros that will match perfectly.

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).

Sustainability

Oven cooking doesn't have to take ages, or use lots of energy. With our microwave combi ovens, you get a forced air oven and a microwave oven all in one. It means faster baking, grilling and roasting, as well as quick defrosting and warming. Less time waiting

around and more time enjoying great home cooking with the people you love. Less time in the oven saves you electricity, too, for smaller bills and a more sustainable life at home.

Tips

Did you know that cooking time is significantly shortened if you combine the micro function with forced air in a microwave combi oven, compared to an ordinary oven? The combination allows you to get a perfect result every time, while saving both time

and energy.
Did you know that placing a built-in microwave in a high or wall cabinet, is a smart use of space – but also a way to create an ergonomic and smooth workflow that's just right for you.

Types

Microwave ovens

Ideal for you who fast and easily want to heat up or thaw food and beverages. Some of our models also include a crisp function allowing you to cook food.

Microwave combi ovens

This is a microwave oven and forced air oven in one, ideal for you who hunger for versatility but don't want two conventional ovens. You can use it as a microwave oven for quick warming or defrosting and as an oven for grilling, baking and roasting. Even better, you can combine both to save time and energy – without compromising the taste.

Key features

A built-in modern-looking **clock** is ideal for keeping an eye on the time while you're cooking. Use the timer when you want total control over the cooking time.

An easy to use and keep clean **touch control** adds a modern touch to any kitchen.

Anti-finger print finish makes it easy to keep the stainless-steel surface sparkling clean day in and day out.

Child-safety

Our oven doors have a child-safety lock to make it safe for kids to be in the kitchen and take part in all the activities.

Microwave functions

The **crisp** function allows you to bake pizza, pie and other dishes faster than in an ordinary oven. The function is also great for frying food such as eggs, bacon, sausages and hamburgers.

With the **grill** function that distributes heat evenly over your food, you get that tasty, finger-licking surface on meat and vegetables, or a nice golden-brown colour on your gratins.

In a hurry? Use the **quick start** to heat up your food and beverages in a jiffy.

Thaw your deep-frozen food faster. The **defrost** function is ideal for meat and poultry, fish, vegetables and bread.

Oven functions

The **top and bottom heating** is ideal for cooking dishes with a crispy finish and for slow cooking of casseroles.

The **fan forced air convection** spreads the heat quickly and evenly, allowing you to cook or bake several dishes at once without flavours spreading between them.

The **bread/pizza baking** function gives your food a more intense brown outside and a crispy bottom.

The **special pastry** function can help you to get the perfect moist topping on your baked cookies and pies.

The **warming program** enables you to keep food warm without becoming overcooked or burnt.

With **pre-set cooking programs** you can choose the proper setting for different dishes and recipes – and get the same yummy result every time.

Microwave ovens

TILLREDA

Microwave oven

69.99€

A time and energy
saving combo

The combination of forced air and
microwaves in our microwave
combi ovens reduces both cooking
time and energy consumption.

Hobs

A cook's best friend, the kitchen hob is central to everyday cooking. Our energy-saving induction hobs deliver fast and precise cooking results, are very easy to use and include all the functions you may need. Each has its own unique features and a variety of sizes – choose between one to several flexible zones – to perfectly suit your kitchen and your cooking style.

When choosing a hob, consider the following:

01

How often do you use your hob? We have everything from mobile one-zone hobs to high-end gas and induction hobs.

02

How much food do you cook at the same time? You can choose to have a small hob with 1 or 2 zones to extra wide hobs for large pots and pans.

03

What type of chef are you? If you're the one who wants total control choose an induction or gas hob. You can also choose hobs with flexible zones, which adapts to the shape of the pot or pan.

Free
5
Year
Guarantee

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).

Sustainability

Save time and energy while you cook! Like to cook but don't always have enough time? Induction hobs heat up your pots and pans in a super efficient way. That means faster cooking and more time

to sit and enjoy great home cooked meals with family or friends. Because induction hobs only heat your cookware, they use less electricity and they're safer.

Types

Induction hobs

Induction hobs are up to 50% faster and 40% more energy efficient. With just one touch you can select features and regulate the heat in an instant.

Glass ceramic hobs

Glass ceramic hobs are practical and easy to operate. Some have adjustable cooking zones that can be adapted to the size and shape of your cookware.

Gas hobs

Gas hobs are more than a professional-looking feature for ambitious cooks, they provide quick heat control needed for searing and frying.

Induction hob with integrated extractor

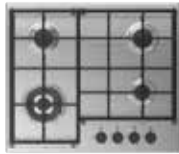

With an integrated extractor there's no need for a hood over the cooking area – perfect for a kitchen island, giving you an overview. The integrated extractor automatically adjusts the extraction capacity to the heating level on the hob.

Key features

A **portable** hob is perfect for smaller kitchens or wherever you need an extra cooking zone. It's easy to move around and can be stowed away when not in use to free up counter space for other activities. Just plug it in wherever you need it.

Depending on your needs and how much food you cook at the same time, choose a hob with **enough cooking zones**. We have hobs with 1, 2, 3, 4 and 5 zones. Also think about the width of the hob: the bigger the hob is, the more space you'll have for pots and pans.

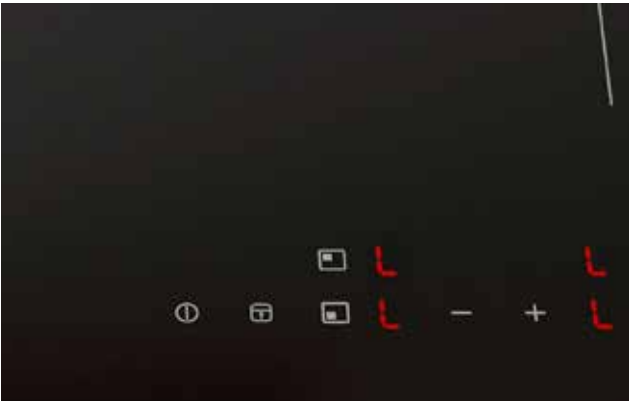

The **bridge** function gives you the flexibility to use larger and different pots for special recipes or occasions as it allows you to connect 2 cooking zones into 1 large one when needed.

Vary the cooking surface by using the **flexible heating zones**. You can use them together or separately, and adapt them to pots and pans in different shapes and sizes.

When you press the **pause** function, all activated zones are paused – and when you press the pause button again, the zones will come back to the same temperature as before. That way you can suspend the cooking process if you're interrupted, and re-start again in an instant.

When you press and hold the **child lock** button, you can't start the hob or change the temperature. To unlock the hob, press the child lock button again for 4 seconds. This is also a good function to use when you're cleaning the hob surface and don't want to switch on any zones.

The **touch and press control panel** allows you to regulate the heat easily and precisely by just touching the + and – symbols.

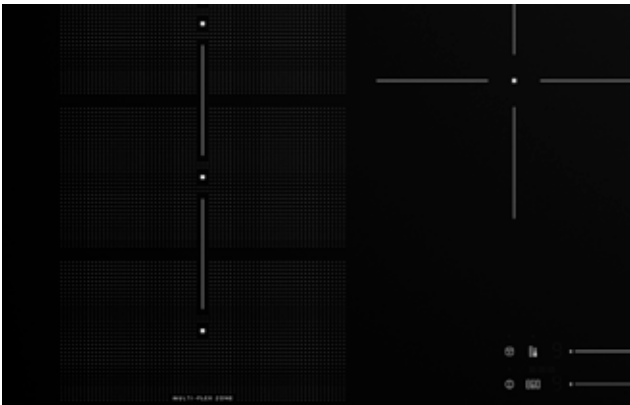

Just slide your finger on the **touch and slide control panel** and the heat will adjust accordingly. With just one touch you can select features and regulate the heat in an instant.

Get excellent control when you cook with the **individual timers** allowing you to time each zone separately. Ideal for boiling eggs, rice or pasta.

The **power booster** delivers additional power to a single cooking zone, perfect for boiling water. The booster can be set with just one touch.

If you like cooking, you'll love the **pre-set cooking mode**. Adjust to low, medium or high heat simply by moving the pot or pan on the multi-flex zone. The hob will remember the power settings next time you activate the function.

Gas hob key features

Depending on your needs and how much food you cook at the same time, choose a gas hob with **enough burners**. We have hobs with 1, 2, 3 and 4 burners.

No matches needed! All our gas hobs have **electronic ignitions**. Just push and turn the knob to start the hob.

If you like to wok food, the **wok burner** will make you smile. It's designed especially for the shape of wok pans and the cast iron support keeps the pan firmly in place.

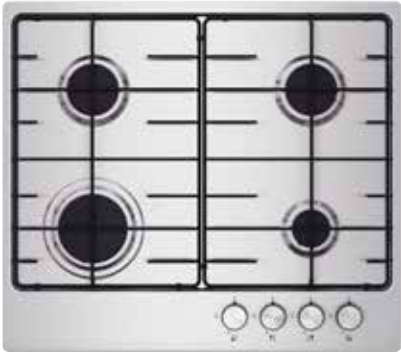

Gas hobs

SMÅKOKA

Extractor hoods

An extractor hood helps keep your kitchen air clean and free from smells, steam and grease. Our models now come with different air caption capacities, which means they have all been optimised to only extract the air that needs to leave the house, while keeping warm or cool air inside. And since an extractor hood is also an important visual element in any kitchen, we have a wide range of wall-mounted, built-in, or ceiling-mounted models to suit different room settings and needs.

When choosing an extractor hood, consider the following:

01

How wide is your hob? The width of the hood should be as wide or wider.

02

What does your kitchen look like? If you have an open plan in your home, make sure to choose a hood with low noise level.

03

Valve or charcoal filter? Find out if you can connect the extractor hood to a valve that leads the air out of the building. If not, you need to connect the extractor hood to a charcoal filter, which takes away the grease and odour from the air and lets it out in to the room again.

Free
5
Year
Guarantee

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).

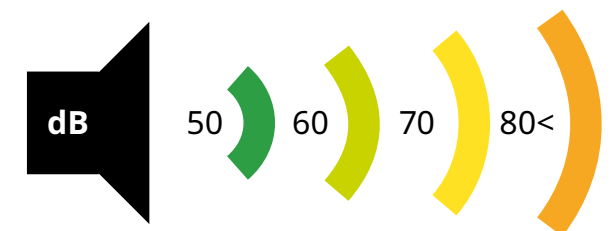

Sound levels

Sound levels for appliances are measured in decibels (dB). Our appliances have been tested to determine and measure this.

For extractor hoods the operating speed or installation type can influence sound levels.

Decibel levels are listed in the product information. Compare decibel levels and choose the hood that's suitable for your needs and comfort.

Extractor hood types

Built-in extractor hood
If you want a completely uniform and streamlined kitchen, choose a built-in extractor hood with a front that match the rest of your kitchen.

Wall-mounted extractor hoods
Our wall-mounted extractor hoods come in many shapes, styles and sizes. Choose a unique piece or one that match the rest of your appliances and the kitchen. Just make sure it has the same size or is wider than your hob for optimal performance.

Ceiling-mounted extractor hoods
A ceiling-mounted extractor hood is the perfect solution if you have the ability to cook food on a kitchen island.

Extractor hood features

All our extractor hoods have energy efficient **LED lighting**. This type of lighting normally lasts as long as the extractor hood does, and it illuminates the entire hob to make cooking easier.

When you cook a lot of food and the smoke is thick in your kitchen, the **booster** function will come to your rescue. It has a higher speed than max speed and can be turned on for maximum 6 minutes to dissolve heavy cooking fumes.

With **dimnable lighting** you decide how strong the light on your hob should be. Choose a stronger light when cooking, and a cosy mood light when eating.

An easy to use and keep clean **touch control** adds a modern touch to any kitchen.

Built-in extractor hoods

LAGAN 
Wall mounted extractor hood
49.99€
White. 504.013.83

A kitchen hood with LED lighting and all the basic functions you need. Can be mounted in a wall cabinet for a uniform look in the kitchen. Combine with LAGAN oven and LAGAN hob.

Extraction rate in exhaust mode: 669 m³/h.
Noise level at max exhaust speed: 57 dB (A).
Extraction rate in recirculation mode: 384 m³/h.
Noise level at max recirculation speed: 69 dB (A).

Installation

For ducted installation: Please use NYTTIG TUB 150.
For recirculation installation: Please use charcoal filter NYTTIG FIL 440.
For this installation also NYTTIG TUB 150 is required.

Measurements

Width: 69.8 cm.
Depth: 45.0 cm.
Height in exhaust mode: 77.0-101.4 cm.
Height in recirculation mode: 77.0-108.3 cm.
Width of chimney: 31.0 cm.
Depth of chimney: 25.0 cm.
Cord length: 1.3 m.
Motor power: 260W.

FULLSTÄNDIG A+

Wall mounted extractor hood

449€

White. 703.893.37

This hood has a different design that gives character to any kitchen. And it still fits almost everywhere. A LED lighting strip gives even lighting – making cooking more comfortable.

Key features

- ☒ LED lighting
- ☐ Booster function
- ☐ Dimmable lighting
- ☐ Touch control

Performance

Energy class: A+ (from E to A++).
Extraction rate in exhaust mode: 640 m³/h.
Noise level at max exhaust speed: 63 dB (A).
Extraction rate in recirculation mode: 383 m³/h.
Noise level at max recirculation speed: 68 dB (A).

Installation

For ducted installation: Please use NYTTIG TUB 150.
For recirculation installation: Please use charcoal filter NYTTIG FIL 440.
For this installation also NYTTIG TUB 150 is required.

Measurements

Width: 79.8 cm.
Depth: 49.8 cm.
Height in exhaust mode: 75.6-102.3 cm.
Height in recirculation mode: 75.6-109.5 cm.
Width of chimney: 24.0 cm.
Depth of chimney: 25.0 cm.
Cord length: 1.3 m.
Motor power: 260W.

BEMÖTA A++

Wall mounted extractor hood

549€

Stainless steel. 903.893.36

Energy-efficient hood with a design that makes working by the hob easier. The booster function especially reduces strong smells, and the LED lighting strip gives you even and comfortable work lighting.

Key features

- ☒ LED lighting
- ☒ Booster function
- ☒ Dimmable lighting
- ☐ Touch control

Performance

Energy class: A++ (from E to A++).
Extraction rate in exhaust mode with booster function: 700 m³/h.
Extraction rate in exhaust mode: 380 m³/h.
Noise level at max exhaust speed: 60 dB (A).
Extraction rate in recirculation mode: 380 m³/h.
Noise level at max recirculation speed: 78 dB (A).

Installation

For ducted installation: Please use NYTTIG TUB 150.
For recirculation installation: Please use charcoal filter NYTTIG FIL 500.
For this installation also NYTTIG TUB 150 is required.

Measurements

Width: 69.8 cm.
Depth: 38.1 cm.
Height in exhaust mode: 81.5-106.5 cm.
Height in recirculation mode: 91.2-118.5 cm.
Width of chimney: 30.0 cm.
Depth of chimney: 20.0 cm.
Cord length: 1.0 m.
Motor power: 270W.

FINSMÅKARE

Wall mounted extractor hood

549€

Black. 503.891.40

A clean, modern design with an easy-care glass surface. The extractor hood's angle makes the hob area more accessible and two dimmable LED lighting strips give even light – so it's easier to cook.

Key features

- ☒ LED lighting
- ☒ Booster function
- ☒ Dimmable lighting
- ☒ Touch control

Fridges and freezers

Yes, an IKEA fridge or freezer keeps your food fresh for longer, but they do so much more to help make your life a little nicer. There are plenty of features for storing and enjoying your food in the best way possible—like, a chill mode for glass bottles, fan cooling for consistent temperatures, electronic displays for settings and functions, and fast freezing (just to name a few). And, all IKEA fridges and freezers are energy efficient, rated A+ to A+++

When choosing fridges and freezers, consider the following:

01

How much food do you normally store in your fridge and/or freezer. How many are you in the family? How often do you shop? We have different sizes and capacities to choose between.

02

Do you need any specific function or accessories to simplify storing and organising your fridge/freezer? We can offer interiors for every need.

03

What style do you prefer and what works in your kitchen? Choose between freestanding appliances creating a design statement in your kitchen, or integrated adding to a streamlined and uniform look.

Free
5
Year
Guarantee

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).

Sustainability

Did you know that we throw away approximately 25% of all food we buy? That's like dumping one bag of groceries in every four straight into the bin! IKEA fridges and freezers are full of smart ideas to help you keep food good, for longer. Wasting less food saves you money and time at the shops.

Tips

Did you know that you can keep your food fresh for longer with an in-built fan? The fan circulates the cool air and keeps the temperature consistent throughout the whole fridge. And as the temperature is the same everywhere, you can store your food and beverage exactly where you want it.

Did you know that defrosting and scraping ice is nothing but a bad memory? The no frost function automatically regulates the humidity levels and prevents ice and frost from spreading.

Fridge and freezer types

Integrated
If you want a uniform expression, **integrate** your fridge/freezers behind the same fronts as the rest of your kitchen.

Integrated under worktop
If you have a small kitchen, or doesn't cook that much, you can have a convenient integrated fridge/freezer between to base cabinets **under the worktop**.

Freestanding
Should you prefer your fridge/freezer to be a unique piece in your kitchen, choose **freestanding** options. Plus, they hold more than integrated fridges/freezers without taking up more kitchen space.

Fridge and freezer functions

A built-in **cooling fan** spreads the air and maintains a consistent temperature throughout, allowing you to make use of the entire space and store all types of food and beverages anywhere.

You'll never ever have to defrost or scrap ice again! The **no frost** function automatically regulates the humidity levels to prevent frost and ice to spread on food or in the fridge.

The **touch control panel** makes it easy to select the right functions and temperature settings, whether you are cooling dessert, freezing fresh vegetables or going on vacation.

Anti-finger print finish makes it easy to keep the stainless-steel surface sparkling clean day in and day out.

More functions

Vacation mode allows you to keep the empty fridge closed while you're away without a bad odour forming.

The **fast cooling** mode allows you to quickly cool down fresh food and beverage, perfect after major groceries shopping.

With **fast freeze** you can quickly reduce the temperature to lock in the freshness and nutrients of food, even in large amounts.

With **bottle chill mode**, an alarm sounds at the end of the cool down time. Perfect if you want to chill glass bottles in the freezer or to cool food.

Integrated fridges

SVALNA **F**
IKEA 300 Integrated fridge
299€
304.964.76

A small fridge for smaller-sized kitchens. Combines well with DJUPFRYSA freezer.

Functions

- ☐ Fan – cooling
- ☐ Fast cooling
- ☐ Vacation mode
- ☒ Led light
- ☐ Touch control

Noise level: 40 dB (A).
Connection cable included.

Volume/litres: 341/171.

Measurements

W83.3×D65.5×H189.8 cm.

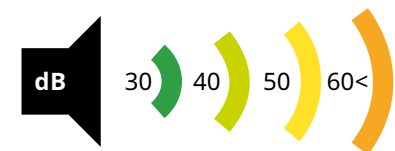

Dishwashers

Compared to hand washing that usually requires three times as much water, a dishwasher saves both water and energy. Our integrated dishwashers are designed to be fitted with your choice of door to match the rest of your kitchen, and come with tall interiors with space for lots of dishes and special features like the automatic door opener function: towards the end of the program, the door opens and stays ajar, letting the dishes dry quickly. All our dishwashers are also energy efficient, rated A++ to A+++, so you can save money and live a more sustainable life at home.

When choosing a dishwasher, consider the following:

01

What space do you have available and how many are you in the family? We can offer you dishwashers in different sizes and volumes.

Sound levels

Sound levels for appliances are measured in decibels (dB). Our appliances have been tested to determine and measure this. For dishwashers the operating program or installation type

02

Are there any specific functions that are important to you? Perhaps to have 3 levels of storage, which increase the storage space? That way you can get more dish out of the way and enjoy a clean kitchen.

can influence sound levels. Look for the decibel (dB) level of an appliance listed in the product information and choose the dishwasher that's suitable for your needs and comfort.

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).

Sustainability

Sit down, relax and save water! Let the dishwasher do the job while you can unwind after dinner or do something else you love. A dishwasher uses less water and energy than washing dishes by hand. Simply put, you'll save both

time and money while making your life at home more sustainable, too.

Tips

Did you know that all our dishwashers are integrated? You can have them with the same front as the rest of your kitchen to keep a uniform look throughout.

Did you know that you can dry the dish faster while using less energy? It's called AutoOpen! During the drying phase at the end of the washing program, the dishwasher door is automatically opened and the dishes dry better. Clever, isn't it?

Dishwashers functions

With our **water efficient** dishwashers, lots of dishes will be sparkling clean with just a small amount of water.

All our dishwashers are **fully integrated** to match the rest of your kitchen.

Our dishwashers have **different sizes** for different needs and kitchens. They're 45 cm or 60 cm wide, and you can choose between models with 2 or 3 levels – 3 levels hold more.

With **adjustable baskets** you can make room for plates and glasses of different sizes.

Soft plastic spikes and clever holders keep glassware in place and reduce the risk of breakages. While cutlery baskets that let you stand utensils up mean better cleaning and easier sorting and putting away.

Towards the end of the program, the **auto open** function automatically opens the door so that the dishes dry as quickly as possible.

The **delayed start** function allows you to run the dishwasher when you want. Our machines have delay options from 3 up to 24 hours.

Led lighting in the dishwasher provides a nice and convenient light when you put in and take out the dishes.

With the **beam on floor** function, a beam of light shines on your floor when the dishwasher is running.

The **time beam on floor** function projects a beam of light on the floor telling you the remaining time of the washing program.

Programs

- AUTO**
For all types of load – crockery, cutlery and pots and pans.
- ECO WASH**
A more sustainable, water-saving option. For normally dirty crockery and cutlery.
- RAPID WASH**
Perfect if you're in a hurry or have a lot of dishes. For recently used crockery and cutlery.
- INTENSIVE WASH**
For all types of load – crockery, cutlery and pots and pans – when they're really dirty!
- NORMAL WASH**
Great for normally dirty crockery and cutlery.
- SILENT WASH**
Extra quiet – ideal for open plan homes or when your dishwasher is close to where you eat. For normally dirty crockery and cutlery.
- WINEGLASS WASH**
For delicate crockery and glassware that's not too dirty.
- PRE WASH**
This is a pre wash for very dirty crockery.

Optional features

- DRY PLUS**
A higher temperature during the final rinse and an extended drying phase ensure the drying performance, even for plastics.
- EXTRA HYGIENE**
A higher temperature (70°C) for at least ten minutes during the last rinse provides an extra good hygienic and disinfecting result.
- SAVE TIME**
Shortens the washing time by up to about 66 percent, depending on the program you choose.
- SAVE ENERGY**
Reduces water and energy consumption.
- INTENSIVE ZONE**
Extra intensive washing in the lower basket, perfect for very dirty dishes such as pans and baking dishes.
- HALF-LOAD**
Use this program with small loads. The running time is shortened, energy and water consumption are reduced. It is recommended to add less detergent than with a full load.
- MACHINE CARE**
This program performs dishwasher maintenance by cleaning the interior of the dishwasher using hot water.

Guarantee appliances

FREE

5

Year Guarantee

How long is the guarantee valid?

This guarantee is valid for five (5) years from the original date of purchase of the IKEA appliance from IKEA. LAGAN and TILLREDA appliances have a two (2) year guarantee, valid from the original date of purchase. The original sales receipt is required as proof of purchase. If service work is carried out under guarantee, this will not extend the guarantee period for the appliance, or for the new parts.

What is covered under this guarantee?

The guarantee covers faults of the appliance, which have been caused by faulty construction or material faults from the date of purchase from IKEA. This guarantee applies to domestic use only. The exceptions are specified under the headline “What is not covered under this guarantee?”

Which appliances are covered under this guarantee?

The free five-year (5) guarantee is valid for all domestic IKEA kitchen appliances and covers defects in materials and workmanship.

Which appliances are not covered under this guarantee?

All appliances purchased from IKEA before 1st of August 2007. For appliances named LAGAN and TILLREDA, a guarantee is valid for two years from the date of purchase.

What will IKEA do to correct the problem?

The designated service company will examine the product and decide, at its sole discretion, if it is covered under this guarantee. If considered covered, the designated service company through its own service operations, will then, at its sole discretion, either repair the defective product or replace it with the same or a comparable product. Within the guarantee period, the costs to remedy the fault e.g. repairs, parts, labour and travel will be covered, provided that the appliance is accessible for repair without special expenditure. On these conditions the EU guidelines (Nr. 99/44/EG) and the respective local regulations are applicable. Replaced parts become the property of IKEA. If the designated service company repairs or replaces the appliance under the terms of this guarantee, the designated service company will re-install the repaired appliance or install the replacement, if necessary. The operation is covered if the product is easily accessible for repair. If the product is installed in a not standard built-in solution the customer has to make the product accessible before the service visit.

Who will execute the service?

The designated service company will provide the service through its own service operations or authorized service partner network.

What is not covered under this guarantee?

- Deliberate or negligent damage, damage caused by failure to observe operating instructions, incorrect installation or by connection to the wrong voltage, damage caused by chemical or electro-chemical reaction, rust, corrosion or water damage including but not limited to damage caused by excessive lime in the water supply, damage caused by abnormal environmental conditions.
- Consumable parts including batteries and lamps.
- Non-functional and decorative parts which do not affect normal use of the appliance, including any scratches and possible colour differences.
- Accidental damage caused by foreign objects or substances and cleaning or unblocking of filters, drainage systems or soap drawers.
- Damage to the following parts: ceramic glass, accessories, crockery and cutlery baskets, feed and drainage pipes, seals, lamps and lamp covers, screens, knobs, casings and parts of casings. Unless such damages can be proved to be due to production faults.
- Cases where no fault could be found during a technician's visit.
- Repairs not carried out by our appointed service providers and/ or an authorised service contractual partner or where non-original parts have been used.
- Repairs caused by installation which is faulty or not according to specification.
- The use of the appliance in a non-domestic environment i.e. professional use.
- Transportation damages. If a customer transports the product to their home or other address, IKEA is not liable for any damage that may occur during transport. However, in case of IKEA delivery of the product to the customer's delivery address, then eventual damages to the product that occurs during this delivery will be covered by IKEA, (but not under this guarantee). For claims under this last particular condition the customer should contact IKEA Customer Service at www.IKEA.gr
- Cost for carrying out the initial installation of the IKEA appliance.

These restrictions do not apply to fault-free work carried out by a qualified specialist using our original parts in order to adapt the appliance to the technical safety specifications of another EU country.

How country law applies: This guarantee gives you specific legal rights, and is in addition to your statutory legal rights.

Area of validity: For appliances which are purchased in one EU country and taken to another EU country, the services will be provided in the framework of the guarantee conditions normal in the new country. An obligation to carry out services in the framework of the guarantee exists only if the appliance complies and is installed in accordance with:

- the technical specifications of the country where the guarantee claim is made.
- the assembly and installation instructions and safety information that come with the appliance.

How to reach us for before buying if you need advice: If you have any questions about our appliances, please contact IKEA Customer Service at www.IKEA.gr.

How to reach us if you need service support after buying: Please ring the number given in the documentation that comes with the product. To make sure that we can give you the best assistance, please read the Instructions for Use carefully before contacting us. Please also have the IKEA article number for your appliance at hand before calling us. You'll find this 8 digit number on your receipt as well as on the rating plate of the appliance.

Services

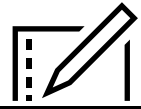

Our broad service offer gives you the freedom to design your own price tag by choosing not only the products that suits your budget but also deciding how much you want to do yourself and how much you want us to do for you.

Below you'll find all the services you need to plan and by your entire kitchen – and how much each of them costs. For more details about our services, talk to a co-worker at your local IKEA store or visit us at IKEA.gr

Delivery

Whether you're shopping in store or online, and no matter how big the purchase, we'll do the heavy lifting and bring it to your home or business.

The IKEA home planner

Design the METOD kitchen of your dreams in a 3D environment and get a price on every detail as well as the total kitchen. Print out your drawings and product list at home, or save to the IKEA website. At the IKEA store you can discuss your design and get lots of advice and guidance from our kitchen experts. Learn more at IKEA.gr

Planning and consultation

Even on big projects, the little things matter. Discuss your ideas with our team of design professionals and we'll help nail them down in detail.

More information and guidance
