What's in the Box?

- 1* Translator
- 1* Data Cable
- 1* Charging Head
- 1* Protective Case
- 1* Lanyard
- 1* Instruction Manual

Before Using

Device Charging:

We suggest charging the device before using, normally 2 hours for fully charged.

- Charge at room temperature, try to avoid charging in a hot and overheated environment.
- Don't mention contact with fire and other heat sources.
- Don't charge and store in a humid environment.

- When charging is complete or not charging, disconnect the charger from the device and unplug the charger from the power outlet.
- Don't use unrecognized or incompatible power supplies, chargers, which may cause fire, explosion or other hazards.
- Only supports 5V 1A, does not support fast charging.

WIFI Connecting:

- Please prioritize using online translation, it only can connect to the WIFI or mobile HotSpot.
- Route WIFI choose a wireless network in the 2.4GHz band.
- Mobile HotSpot:
 - ① The android mobile HotSpot need to set 2.4GHz.
 - ② The Apple mobile phone need to turn on maximum compatibility in Apple mobile phone HotSpot settings.

WIFI Connecting Steps:

- **Settings -- WLAN -- Open, then connect your WIFI .**

Please note: 5G wifi are not supported.

System Language Settings:

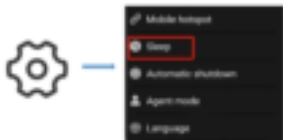

- **Settings -- Language -- select your language**

Sleep Setting:

- **Settings -- Sleep, then set the sleep time you want.**

When you receive the translator, it is set to run for 1 minute and then automatically turn off the screen, you can reset it according to your needs.

Main Function

Warm reminder

The red voice input button corresponds to the original language while the blue button corresponds to the target translation language.

Be sure to tap the corresponding button and speak the appropriate language of your choice when you use the relevant translation functions. Otherwise it will lead to translation error.

Online Translation

Before using, make sure your network is connected successfully

- **Language Selection:** At the top of the online translation interface, select the original language and target language respectively.
- **Voice Input:** Long press the voice input button (red /blue), start "talking" when you hear "Di" , red for the original language and blue for the target language.
- Please make sure to say the corresponding language selected. Otherwise it will not be recognized.

- After releasing your hands, the voice is automatically recognized and parsed, and translated into the set target language and broadcast by voice. Tap screen to replay the conversation.
- Long press the text records to Delete or Empty.

Offline Translation

Using Offline Translations has limited responsiveness and accuracy, and we recommend using online translations in preference.

- **Before using Offline Translation, please connect to the Internet and download the language offline package.**
- Language Selection: Click the language bar at the top

of the Voice Translation screen. Select the original language and target language from the displayed list .

- Voice Input: Long press the voice input button(red/blue), start “talking” when you hear “Di” .
- Please make sure say the corresponding language selected. Otherwise it will not be recognized.
- After releasing your hands, the voice is automatically recognized and translated to the target language.

Photo Translation

Notes

Online Translation supports 75 languages, Offline Translation supports 41 languages.

- **Language Selection:** Tap the language bar at the top of the photo translation screen to select the original language and the target language.

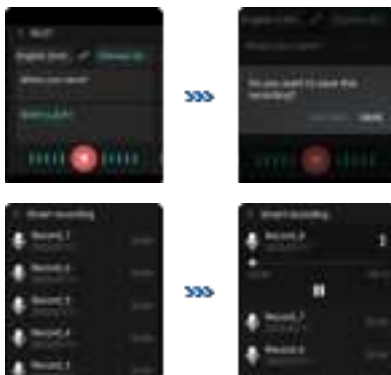

- **Take Photo:** Aim the camera at the text you want to translate, then tap the screen to focus. Press the Take Photo button to take a photo. Adjust the recognition range and finally click on Confirm.
- **Translation Completed:** When the analysis is completed, the translation results will be displayed on the screen. You can click and listen to the results.

Smart Recording

- **Language Selection:** Choose the original language and the target language.
- **Recording:** Press the microphone image button  or the voice input button  once to start recording. And press the button  again to stop recording. Then select whether to save the recording.
- **Translate Recordings:** Tap the button in the upper right corner  to display the list of recordings. Click

on the saved record to bring up the play button and expand button . Click the expand button  can display the audio recording original text and the translated text.

Group Translation

Notes

Please connect to the network before using the function.

- Group Translation is the formation of multiple translators into a group.
- You can invite multiple people to join the group and communicate in different languages within the group.
- Up to 500 people per group. Click "Create" and input the

recognized, emitted, and converted. And then the translated voice will be played automatically.

- You can click the button in the upper right corner to bring up the scanning interface. After scanning the code through Google, Paypal or other code scanning software, you can receive the translation results synchronously, download and copy the original and translated text, etc.

Input Translation

Notes

Please set the language settings before entering the text and add the original language to the keyboard.

- **Language Selection:** Select the original and target languages in the display list separately.

- **Input and Translate:** You can enter text on the keyboard in the original language and translate it into the target language you want.
- **Setting:** Click the button  in the upper right corner, you can setting the "Languages / Preferences / Theme / Text correction / Glide typing / Voice typing / Dictionary / Search / Advanced, etc."

Phone Translation

Notes

Before using, please ensure that your network is successfully connected.

- The Phone Translation function connects cell phones and translators to form a group by scanning a code.
- **Scan the Code:** After scanning the code through Google, Paypal or other code scanning software, you can add phone translation to mobile. You can also share the code to others to join the group.
- **Input and Translate:** You can choose to text or voice the original language on your phone, the translator will automatically translate it into the target language and play. Likewise, if you choose the translator to input the original language, you can listen the translation on the phone.

- **Setting:** Click the button  in the upper right corner, you can “Share / Select language / Destroy and exit / Advanced settings”.

Language Learning

- **Language Selection:** Tap the language bar at the top of the language learning screen to select your original language and the target learning language.
- **Talking:** Long press the voice input button, say what you want to practice when you hear “Di” .When you release your hand, the target learning content will be displayed on the screen.
- **Learning:** Click the arrow  to enter the following interface. Long press one of the voice button to follow the target learning content. Release your hand and your learning results and scores will be displayed on the screen. You can listen to standard pronunciation and your pronunciation repeatedly.

Exchange Rate Conversion

- You can perform real-time exchange rate conversion between multiple currencies (for reference only).

Notes

Before using, please ensure that your network is successfully connected.

Unit Conversion

- Conversion between length, volume, weight and temperature.

Xiaobei AI

- Turn on your Xiaobei AI Assistant and start a pleasant journey

Notes

Before using, please ensure that your network is successfully connected.

Translation Tips

- Please speak at a normal speed.
- Make sure the voice recognition is correct.
- Please place the microphone at a distance controlled to within 30 cm from your mouth for clear recognition and translation.
- Please try to speak in a standard voice, reduce the use of dialects, and speak complete sentences.
- When translating, press and hold the voice input button until you see the microphone icon and then speak.
- Repeated interruptions or joining two words together will cause the translation to fail.
- The network environment may affect the response speed of translation or cause translation failure.
