USING WINDOWS 10

1. Windows 10 start screen

On the start screen, you may see icons on the desktop that serve as shortcuts to some applications. You can easily open them by simply clicking on them. You may need to log onto a Microsoft account before some programs will run with full compatibility.

You can also click on the Windows icon in the lower-left corner to bring up the Start Menu.

	User icon. Allows you to change account settings, lock the notebook or sign out.
	Opens the Documents folder within 'This PC'.
	Opens the Pictures folder within 'This PC'.
	Opens the Windows Settings app. Allows you to change various aspects of the computer including apps, linked devices, time & language and account information.
	Allows you to Sleep, Shut down or Restart the computer.

2. Start Menu interface

Apps already installed on the computer can be accessed via the Start Menu. Some icons will automatically be added to the right-side section for easier access.

More applications can be added to the computer via the Microsoft Store.

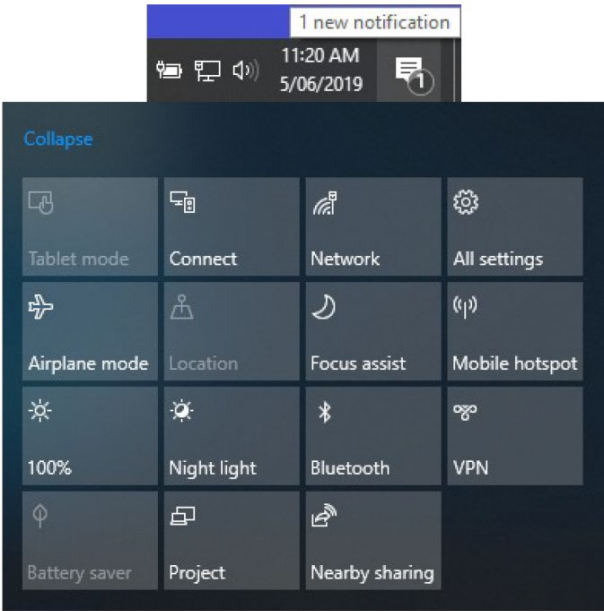

Apps can be uninstalled by right-clicking on the icon in the Start Menu and selecting "Uninstall".

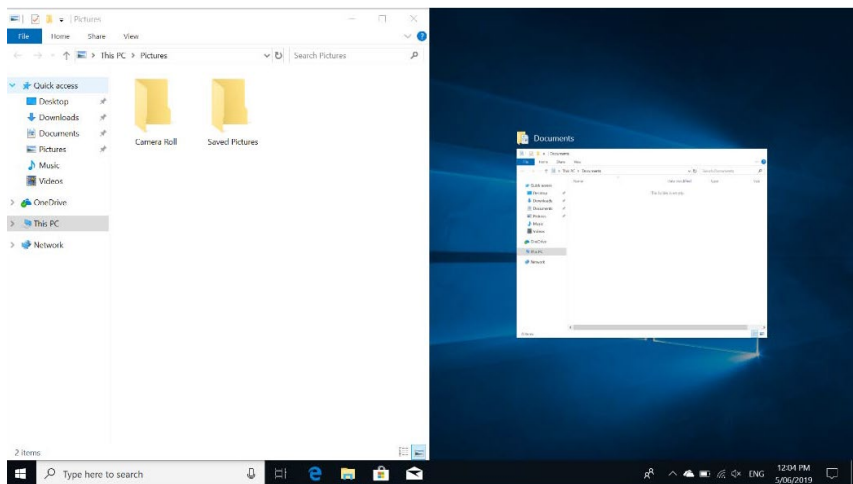

3. Notification Menu

The notification menu is accessible via the icon in the lower-right corner of the task bar. It will show notifications such as updates, emails received and calendar reminders, and allows for quick access to settings like Wi-Fi, Bluetooth, brightness, etc.

4. Multitasking

Drag windows to the left or right sides of the screen and let go when you can see an outline of the window around half of the screen. You can then select another open window to fill the free space on the other half of the screen.

5. Sleep, Restart and Power Off

Select the Windows icon in the lower-left corner, then click on the power icon, then select Sleep, Shut down or Restart.

BASIC TROUBLESHOOTING

My laptop is not turning on/is not charging

- Leave the unit on charge for at least an hour before attempting to turn the unit on.
- The battery may have naturally depleted and may take some time to recharge. If in storage for extended periods of time, it is recommended to periodically charge the unit to keep the battery capacity high, as batteries naturally deteriorate and eventually completely die over time.
- Make note if any lights turn on, or if any internal components like fans turn on.
- Inspect the unit, charging port and power cord for any physical damage. If you notice any damage to the power cord, please do not use it and contact **help.kogan.com**

Wi-Fi connection is not working

- Restart your modem/router, or both if you have separate units.
- Reconnect any range extenders that may be in use.
- Restart the device that is having issues.
- Try moving the device closer to the source.
- If you cannot connect at all, double check that all passwords are correct.
- If you can connect but are getting weak or slow data, try disconnecting the device from the network manually and reconnect.

Screen gets dark when unplugged

- This will be occurring due to your power plan settings.
- You can set your power plan settings through the Control Panel.

I have forgotten my password

- There are several options to reset a Microsoft password.
- Use a password reset disc via USB.
- Reset Microsoft account password online with another device.
- Reset Windows back to the factory default. Please note, this will delete all personal files and settings.
