

PowerPie 20000mAh
Instructions

Model: PowerPie P20/P20K
Power Bank

Product Description

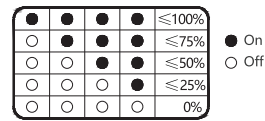

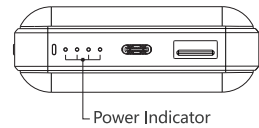

The ELECJET PowerPie uses a USB-C & USB-A dual port design. The USB-C port provides a maximum 45W PD (PPS) Output and the USB-A provides a maximum 18W QC 3.0 Output. The PowerPie also supports charging two devices at once.

Introduction

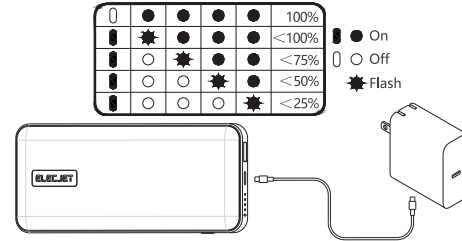

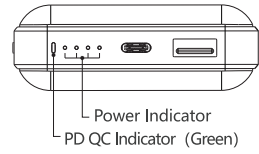

Indicator

Press the side button and the power indicator will show the remaining power.

Re-Charging the PowerPie

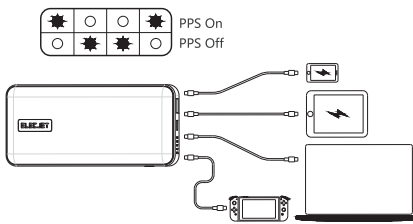

1. It is recommended to use ELECJET or other high-quality USB-C PD chargers and cables (rated at 45W or above) for the fastest and safest charging of the PowerPie .
2. Connect your USB-C cable to your charger and to the PowerPie 's USB-C port. Turn the charger on.
3. The Power indicator lights will begin to flash. As charging progresses the lights will stay solid one by one.
4. The PowerPie automatically detects the type of charger it is connected to and applies the correct charging protocol. The PD QC (fast charging) Indicator will illuminate when it is in use.
5. When the PowerPie is fully charge the four Power Indicator lights will be solid and the PD QC Indicator will turn off.

Charging your devices

1. Please use a USB Cable that is correctly rated for fast charging your devices.
2. The USB-C port provides up to 45W PD Output. It can charge laptops, tablets, mobile phones, game consoles or other devices supporting the PD protocol through using a USB-C cable.
3. The USB-A port provides up to 18W QC Output. It can charge tablets, mobile phones or other electronic devices through using a USB-A cable.
4. The PowerPie supports pass through charging – whilst the PowerPie is being recharged through the USB-C port, the USB-A port can be used to charge another device (up to 18W).
5. When charging small current devices below 200mA (Bluetooth headphones, smart watches etc.), double-press the side button to start the "enhanced" mode, the Power Indicator lights will flash simultaneously and charging will start.

Note: When a device is connected to the USB-C port and is charging at 45W, the USB-A port will only provide up to 10W output. Press the Side Button continually for 5 times within 3 seconds to open or shut the function of PPS.

Specifications

Model	PowerPie P20/P20K
Battery	Lithium-ion battery
Capacity	20,000mAh 3.7V/ 74Wh
Rated Capacity	11,500mAh 5V (TYP 3A)
Temperature	0-45°C, < 75% RH
Input	USB-C: 5V/3A, 9V/3A, 12V/3A, 15V/3A, 20V/2.25A, Max 45W
Charging	Use PD adapter above 5-20v 45W needs about 150 minutes
Output	USB-C PD: 5V/3A, 9V/3A, 12V/3A, 15V/3A, 20V/2.25A, (PPS): 3.3-11V/4.05A, 3.3-16V/2.8A, Max 45W USB-A: 5V/3A, 9V/2A, 12V/1.5A, Max 18W USB-C + USB-A: Max 55W
Fast charging protocols	USB-C: PD3.0 / PPS USB-A: Apple 2.4A / Samsung AFC / Huawei SCP / Huawei FCP / QC3.0
Dimension	155 x 70 x 24.6 mm (6.10 x 2.1 x 0.96 in)
Weight	390g (13.75oz)

Caution

- Do not disassemble or refit the device!
- Do not short circuit the device!
- Avoid dropping the device!
- Do not expose the device to liquid or fire!
- Avoid using and storing in extreme temperatures (High & Low).
- Do not use in humid environments.
- Keep the USB port away from metal objects such as keys to prevent short circuits.
- To ensure the service life of the battery, please charge the product at least once every 3 months.
- When the power is less than 25%, please charge as soon as possible.
- Keep out of the reach of children and animals.

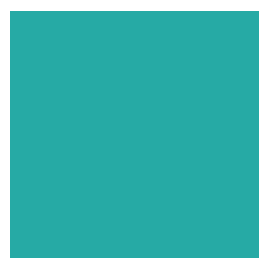

Packing list

- PowerPie Power Bank
- USB-C to USB-C cable
- Storage bag
- Instructions

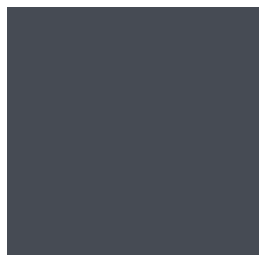

Warranty

12 months from the date of purchase.
