Alpha Stand Setup

- Loosen the knob of the Alpha stand and spread its legs on the floor (as per your requirement).

- Secure the legs with the help of knobs at the top and bottom.

- Loosen the knob to adjust the stand height as per your need and tighten the knob back, as shown in the image.

NOTE: The Alpha Stand has 3 sections to adjust the height with quick & secure locking knobs. The central main post of the stand is adjustable, through which you can change its height as you require.

- Mount the Lights on Alpha Stand and properly secure with the provided knob as shown in the picture.

- Alpha Camera Stand also supports photo equipment & lighting accessories like reflectors, softboxes, lights, utility trays, workstations, and many more.

NOTE: The Stand has 5/8" baby pin mount on the top to attach the camera stabilizer system & gimbals with their support accessories.

Alpha Stand Adjustable Leg Setup

- **NOTE:** When heavy weight is placed on the Alpha Stand, it may bend slightly (about 2°). To counter this, the stand comes with an adjustable leg.
- Loosen the knob of the Alpha Stand to begin the adjustment process.

- Pull the stand upwards gently to extend the adjustable leg.
- Once extended, tighten the knob to secure the position.

- The adjustable leg is now fully extended, and the stand will realign to a straight position, as shown in the image.

**YOUR PROAIM ALPHA DOCKING UNIVERSAL SUPPORT STAND
ALL DRESSED UP AND READY TO GO!**
