

Connect Your Room Thermostat To Alexa®

Before connecting your room thermostat to Alexa®, ensure you have downloaded the ESi Centro app. Create an account with your new ESi Centro app and log in. Follow the instructions on the ESi Centro app to pair your thermostat to your Centro account.

If you have thermostat models ES RTP4R FW (Atlantic), ES RTP4 Touch, ES RTP8 (Cirrus) or RF Kit you will also need to install the ESWIFIHUB to allow Alexa® to work with your ESi Centro account.

Download the Amazon® Alexa® app from your usual app store. Open the Alexa® app and create an account if necessary.

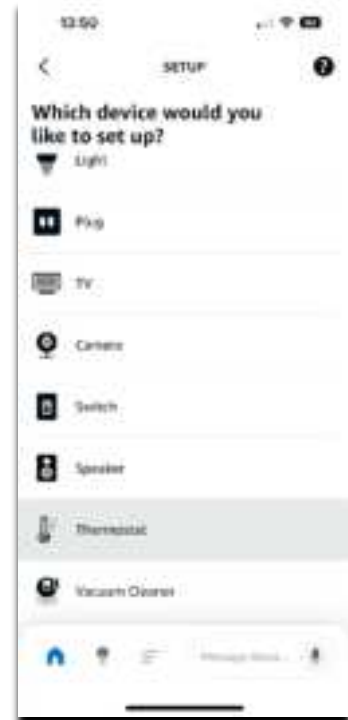

Tap the + icon at the top of your phone screen.

Tap **Device**

Scroll down until you see **Thermostat**.
Tap on **Thermostat**.

On the next page, scroll down to **Other**. Tap on **Other**.

Tap the **Wi-Fi** option.

Tap the blue text which says **Smart Home Skills**

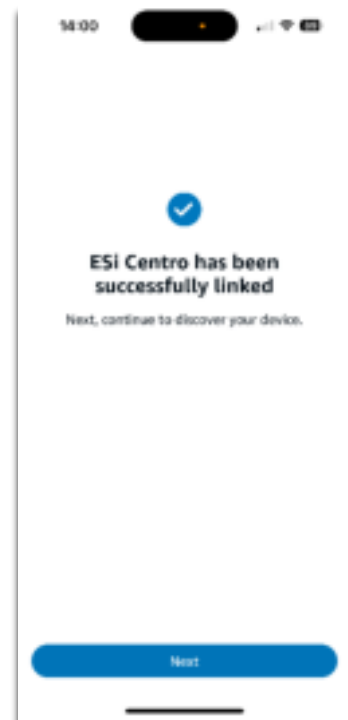

On the next screen, tap in the search bar that shows **Search Alexa Skills**

In the search bar, type **ESi** & press **search**.
esi centro will show as the search result. Tap on **esi centro**

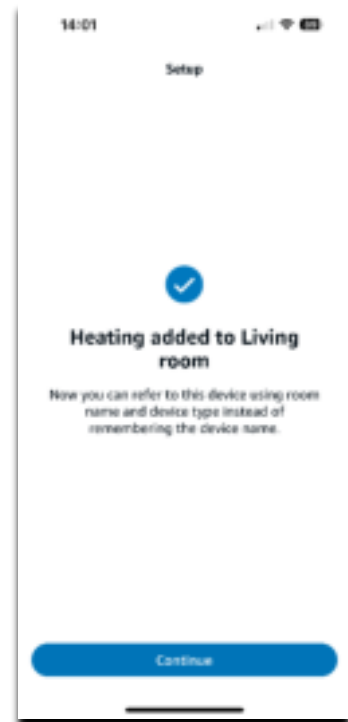

Tap **ENABLE TO USE**

Tap **Next**.

Select the area where your thermostat is situated. Tap **Add To Group**

Tap **Continue**. Your ESi Centro app can now be used with your Alexa© app.

If you have a second thermostat, you will need to follow the above steps for each device.
