

Use and Care Manual

Installation: There are no height restrictions, and it can be installed in a variety of locations, such as walls, fences, door eaves, and house eaves. After finding a suitable installation location, fix the bottom of the light pole to complete the installation. The entire process can be completed independently without the assistance of others.

Cleaning: You can wipe the surface of the light pole with a clean soft cloth to remove dust and stains. Avoid using sharp or rough tools for cleaning to prevent scratching the surface of the light pole.

Inspection: Regularly check the fixing condition of the light pole to ensure it is stable and not loose. At the same time, check whether the surface of the light pole is damaged or deformed. If there are any abnormalities, deal with them in a timely manner.

Storage: When the light pole is not needed, it can be disassembled. Due to its compact size, disassembly and storage are very convenient. Please store the disassembled light pole in a dry and ventilated place to avoid moisture or other damage.
