

## Record Configuration

1. Open the nvr back cover and connect the hard disk to the motherboard and install the hard disk to the back of the nvr

2. Log into the nvr web side and go to the storage page, select the drive and format it.

The screenshot shows the 'Record Schedule' tab in the CamStudio Configuration window. The window has a sidebar on the left with icons for Local, System, Network, VideoCard, Image, PTZ, Event, and Storage. The main area displays a grid for scheduling recordings. The days of the week are listed on the left: Mon, Tue, Wed, Thu, Fri, Sat, and Sun. The times of day are listed at the top: 0, 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, and 24. The grid is color-coded: blue for Continuous, green for Motion, orange for Motion (Alarm), and purple for Event. The 'Motion' option is selected for all days. The 'Save' button is at the bottom. Red arrows and numbers 1, 2, 3, and 4 point to the 'Event' button, the 'Motion' dropdown, the 'Delete All' button, and the 'Save' button respectively.
