

Firmware Installation Guide

(Updating from a USB disk)

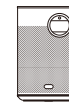

1 Necessary Components

USB disk
(FAT32 Format)

PC

Projector
(Supports firmware updates
and battery is over 50%)

2 Update Steps: How to perform a force brush

① Charge the projector to over 50% and keep it plugged in;

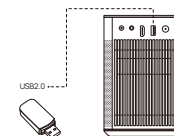

② Download the firmware via the provided link from a PC and copy it to any USB disk;

Note: (It should be formatted to FAT32)

③ Please note: the firmware needs to be pasted to the root directory of the USB disk, not into any folders;

④ Plug the USB disk into the projector;

⑤ When the projector is in Off mode (please don't turn on the projector), long-press the "-" & "+" buttons on the projector at the same time for 5-7 seconds; release it when you hear the fan operating strongly.

⑥ You'll see an Android robot and a progress bar; Then, the system will update automatically.
