Dear customers,
Thank you for purchasing Afloia Air Purifier.

- Please keep this User Manual for your reference.
- Any questions please contact us service@afloia.com

Top Features of Afloia Air Purifier

- **Remote control with phone**
With the Afloia Home app, you can control your smart air purifier from anywhere.
- **Compatible with Alexa**
You can use your air purifier by voice control.
- **Air Purification**
The air purifier has a 3-stage filtration system (prefilter, carbon filter and high efficient filter). Improved Filter with larger expansion area and longer length than others.
- **Timer Setting**
You can set the timer from 1 to 24 hours depending on preference.
- **Adjustable Fan Speed**
You may choose among 3 levels of fan speed. The fan at the lowest noise level will run quietly, silently cleans the room air during your sleep.
- **7 Color Led Light**
The light is uniquely designed with 7 colors. You can set a color from blue/cyan/green/yellow/orange/red/purple as you like.
- **Filter Replacement Indicator**
The built-in filter replacement indicator reminds user when the filter is needed to be replaced.

Please read the instructions carefully before using the product and keep them properly.

Stage 3	Carbon Filter

Filter Replacement Cycle

We recommend replacing the filter every 3-6 months. However, you may need to change your filters sooner or later depending on use frequency and air quality.

For buying more filters, please visit Aflora website and contact Aflora customer service.

Maintenance

- Ensure the product is unplugged before maintenance.
- Do not immerse the air purifier into water or any liquid.
- Do not use abrasive, corrosive or flammable cleansers (such as bleach or alcohol) to clean any part of the unit.
- Do not wash the filter.
- Do not use a vacuum cleaner to clean the filter.

Cleaning and Storage

- Ensure the air purifier is powered-off and unplugged.
- Use a soft cloth with neutral cleanser to clean away any dust or debris from the surface of the air purifier and air intake/vent.
- If you do not use it for a long time, please turn on the air purifier for a few minutes from time to time to ensure a good performance.
- Please do not drop any water into the air purifier when cleaning the air outlet.

How to Replace Filter

* Note:

- Please remove the packaging from the filter before using it.
- Ensure the air purifier is unplugged before removing or installing the filter.
- Please wipe the dust on the filter regularly, do not wash or use it repeatedly.
- Please do not use other filters that are not designed for this air purifier.

- 1 When the LED light keeps flashing in red, it means the filter needs to be changed.

It flashes red if it is used for the first time.
Operation method: turn on—press the power button until the red light stops flashing—is ok.

- 2 Invert the machine, and rotate the base along the direction marked "OPEN".

- 3 Take out the old filter from the air purifier.

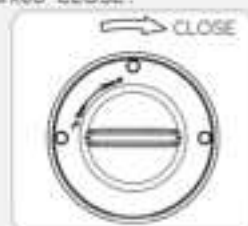

- 4 Remove the packaging around the new filter.

- 5 Install the filter into the machine.

- 6 Then install the base, rotate and tighten the base along the direction marked "CLOSE".

*** Note**

Failure to properly place the filter and base on the air purifier, may result in air purifier not working properly.

Resetting the Filter Replacement Alert

When the air purifier detects that the filter reaches the saturation value, the LED light keeps flashing in red.

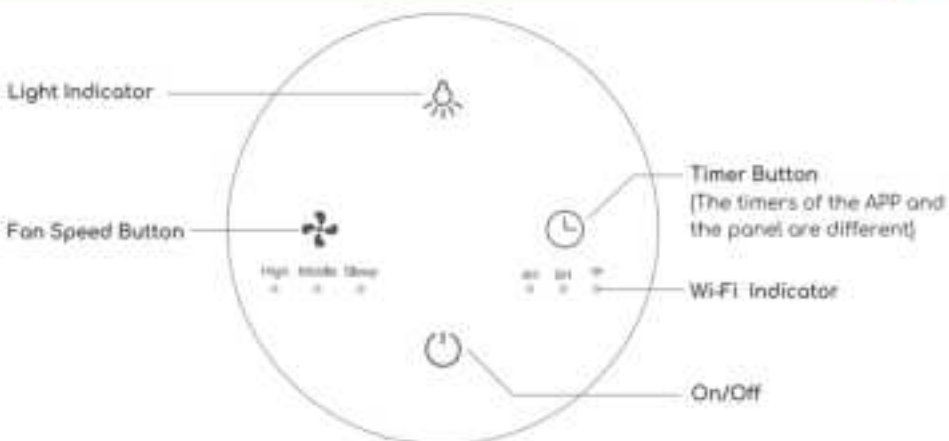

After replacing with a new filter, the FILTER REPLACEMENT ALERT needs to be reset. Please restart the purifier and keep pressing the power button until the light stops blinking.

Maximum Purification Efficiency

- Keep 1 ft / 30cm away from where oxygen is being administered.
- To effectively clean air, keep windows and doors closed while the air purifier is on.
- Keep the inside of the air purifier dry. To prevent moisture buildup, avoid placing in rooms with major temperature changes or underneath air conditioners.

Names and Functions of Control Panel

*** Note**

When the air purifier connects to the power outlet, it will beep for once, the lamp will turn on for 1 second and then turn off, this means that the air purifier is powered on.

Button Description

	On/Off long press the button to reset after replace a new filter.
	Fan Speed Button Select mode--High--Mid--Low/Sleep.
	Timer Button In APP: 24h available. 1-hour increments.1h-2h-3h...24h In Panel: 4/8H timing available (Note: if switch off the timer indicator, the air purifier will work continuously)
	Wi-Fi Indicator Turns on, off, or blinks to indicate pairing status.
	Light Control Button Turns on, off, or flashing mode. At L mode (sleep mode), the light will be automatically turned off. Click the light button, the light will be turned on again.

Connect the Power

- Please confirm that the input voltage is 100-240V 50/60Hz, and ensure that the power plug and your hands are dry before you insert the power cord plug into the outlet.
Note: Contact Customer Service when the power cord or plug is damaged or the power outlet is loose.
- To replace the damaged power cord or plug, please visit Aflaia website and contact service@aflaia.com
- Keep the air purifier away from water, and wet or damp areas.
- Do not use in excessively humid areas.
- Keep the air purifier away from heat sources.
- Do not use where combustible gases, vapors, metallic dust, aerosol (spray) products, or fumes from industrial oil are present.

- ▼ Not following this user manual may result in your device not working.
Please read the following measures accordingly if you are having problems with your device.
If you are still having problems, please contact our Customer Service Centers.

Problem	Checklist	Recommendation
No charger in the box	Did you check the filter?	Please open the bottom cover of the air purifier – take out the filter – get the charger
The product won't work even if I press the Power button.	Are you in a block out?	Check the power supply.
	Is the power cord plugged into the power outlet?	Put the power plug in a power outlet.
No air is blowing out.	Is there material blocking the intake or air vent?	Remove material from vent/intake. Check if plastic packaging has been removed from filter.
	Is the air purifier placed where the intake or blocked preventing air from moving freely?	Remove objects blocking the air purifier or place it elsewhere.
	Air purifier is on but fan does not work.	Unplug from the wall and contact Afoia customer service: service@afolia.com
Loud Noises	Has the plastic bag of the filter been removed?	Remove plastic bag of filter before using the air purifier.
	Is there anything stuck in the fan or air intake/vent?	Please remove any objects you see from the fan intake/vent.
	Is the air purifier tilted on its side?	Make sure the base is level on a flat surface.
	Is the fan really loud?	Set your air purifier to a lower fan speed to reduce the noise.

Problem	Checklist	Recommendation
Coming out nasty smell	Has the plastic bag of the filter been removed?	Remove plastic bag of filter before using the air purifier.
	Is the air purifier in a place with a lot of smoke and odor?	The performance of the air purifier may decrease over time if there is excessive smoke and odor in the area. To remedy this, please air out the room before using the air purifier.
	Should I clean or replace my filter?	Check the filter replacement indicator and clean or replace the filter if necessary.
	Do you smell plastic?	It is common that in the first uses the smell of plastic will be emitted. It will eventually go away. If not, please contact service@a-floa.com
	Is there a burning smell?	Turn off your air purifier, unplug it from the wall and contact service@a-floa.com
The air purifier is not purifying the area well.	The air purifier may be placed in an area with no ventilation, or there is an obstacle near it.	Ventilate the room and then use the product. Use the product in an area not exceeding its coverage limit. (Avoid placing the device where it is well-ventilated like a door or window)
	Is there any dust in the pre-filter?	Wipe the Pre-Filter
	Are there any objects blocking the air intake/vent?	Please remove any objects from the intake/vent.
	Have you removed the filter from its packaging?	The plastic bag of the filter may not have been removed, so please open the cover and check if the plastic bag is removed.
	Is the filter dusty? Maybe it is time to replace the filter.	Change the filter if it looks like it needs to be replaced.
	Is intake/vent dusty?	Clean the air vent/intake.
The filter replacement alert is still blinking after I changed the filter.	Have you reset the filter change button?	Turn on – keep pressing the power button – red light disappears—is ok

Note : If these suggestions do not work accordingly, please contact Aflora customer service and await instructions. Do not disassemble, repair or fix anything by yourself.

Aloia Home App Setup

1. To download the Aloia Home app, scan the QR code or search "Aloia Home" in the Apple App Store or Google Play Store.

2. Open the Aloia Home app, Log In or Sign Up.
3. Follow the in-app instructions to set up your smart air purifier.

Connect with your phone

The device can be automatically connected within two minutes after Wi-Fi is turned on.

1. Turn on the air purifier and hold the Wi-Fi indicator for 5 seconds, the indicator will blink fast, which means Wi-Fi of the machine is turned on.
 2. Turn on Wi-Fi and Bluetooth of your mobile device, open the Aloia Home APP within two minutes, then the device will be automatically detected. Enter Wi-Fi password to finish the connection.
- If successful, Wi-Fi indicator keeps on, otherwise, the indicator keeps blinking.

Turn to manual connection if auto connection fails after Wi-Fi has been on 2 minutes

Step 1:

When the Wi-Fi indicator blinks fast:

Make sure **Wi-Fi** of your mobile device be ON---Open Aloia Home APP, click to add Device---Add manually---Small home appliances---**air purifier (Wi-Fi)**---operate according to the APP prompts.

(Note: Only available for 2.4G network. Please switch to 2.4G network if currently under 5G.)

Step 2:

If the connection is still unsuccessful after following Step 1, please hold the Wi-Fi indicator for another 5 seconds. Then the Wi-Fi indicator will **blink slow**.

Make sure **Wi-Fi and Bluetooth** of your mobile device be ON---Open Aloia Home APP, click to add Device---Add manually ---Small home appliances---**air purifier (Bluetooth+Wi-Fi)**---operate according to the APP prompts.

Note:

- Status of Wi-Fi indicator & its meaning:

- * On & no blinking—Successful connection;
- * Blinking fast—Wi-Fi of the air purifier is turned on;
- * Blinking slow—Wi-Fi and Bluetooth of the air purifier are turned on;
- * Off—Wi-Fi and Bluetooth of the air purifier are turned off;

You can respectively switch from Blinking fast, Blinking slow and Off by hold the Wi-Fi indicator each 5 seconds.

- The Wi-Fi indicator will not blink while the machine is powered on or turned on.
- The connection will be cut off when power or network becomes off. Please restart to connect your device and the air purifier after the power and network get right.

APP Connection FAQ

Q1: When the Wi-Fi indicator blinks slow, a message is displayed showing that the Smartlife network cannot be connected or found

A: It may be slow to connect to Afoia Home App on mobiles for the first time. Please exit the App and reconnect, which should be finished within 2 minutes.

Q2: When the Wi-Fi indicator blinks slow, password is needed for the connection to Smartlife

A: Click Settings on your device, go to "Afoia Home", find the Local Network and switch it on.

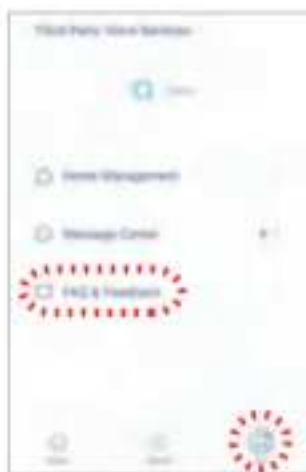

Q3: It is slow to add devices when the indicator blinks fast

A: Please exit the App and try again. Please use a faster network, or switch to another connect mode (See Step 2 of manual connection on Page 9)

Q4: Why is my air purifier not working as instructed?

A: Please ensure that the machine is normally connected to the power supply and stable network connection.

You can find more FAQ details from "FAQ & Feedback" in the account profile "Me", as follows.

With More Devices

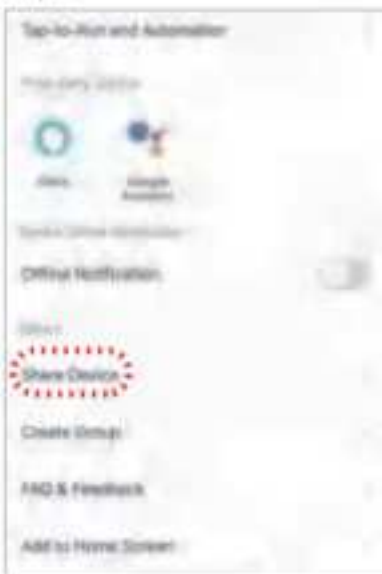

Please use "Share Device" if connecting with more devices is needed. The same Kilopius can be shared to a number of mobile devices.

Step 1: When connecting the device with the first phone, (see steps CONNECT WITH YOUR PHONE)

Step 2:

Step 3:

PLEASE NOTE: This air purifier has already been added on one Mobile devices, it cannot be added directly on another Mobile devices. This will cause the air purifier on the original Mobile devices to go offline.

Only Work with 2.4G Hz WiFi Network

1. Select 2.4GHz WiFi network

Note: Only available for 2.4G network, Please switch to 2.4G network if currently under 5G.

2. When the mobile phone is connected to the air purifier, the WiFi indicator remains on.

If the WiFi indicator flashes, it means that it has been disconnected from the previous mobile phone (the air purifier has changed Web environment or a new phone is connected to the air purifier)

Set Up Your Schedule (Auto Switch)

You can set the fixed time every day to turn on/off the machine.

Steps: Setting--Schedule--Add--Save

*If a timer still can be activated after removal or change, please reset the timer to update cloud APP data, or remove the air purifier from APP, add again and reset a timer.

Customize Your Smart Life

Go in the "Smart" page and click "+" or "Create Scene" of "Automation" to start creating one-click execution commands and smart Settings.

*Set the operation mode of Kilopius according to weather changes, which is very worry-free and convenient.

*If the scene does not work as set, please remove the air purifier from APP and add again first, and then retry to create a scene.

Quickly bind Alexa

Voice control: The kiloplus is compatible with Amazon Alexa , so you can use your air purifier without having to lift a finger

Step 1:

Step 2:

Step 3:

Scan QR code to get instructional video for Kiloplus

Caution

We recommend replacing the filter every 3-6 months. However, you may need to change your filters sooner or later depending on use frequency and air quality.

For buying more filters, please visit Aflora website and contact Aflora customer service.

Safety Instructions

- Ensure the product is unplugged before maintenance/Maintenance cleaning/Moving the device/ Changing the filter. Risk of injury due to electric shock.
- Do not immerse the air purifier into water or any liquid.
- Do not use abrasive, corrosive or flammable cleansers (such as bleach or alcohol) clean any part of the unit.
- Do not block the air intake or outlet.
- Do not use any spray cans with flammable contents near to the air purifier.
- Do not use a vacuum cleaner to clean the filter.
- Use a soft cloth with neutral cleanser to clean away any dust or debris from the surface of the air purifier and air intake/vent.
- If you do not use it for a long time, please turn on the air purifier for a few minutes from time to time to ensure a good performance.
- Do not use the device near a smoke detector. Air blowing towards a smoke detector could delay the alarm or not trigger at all.
- Only use the air purifier in living quarters and within the specified technical parameters.
- Do not expose the air purifier to direct sunlight, a naked flame or heat.
