5. Reassemble for next use.

TROUBLESHOOTING

• Rice is too dry/hard after cooking.

If your rice is dry or hard/chewy when the cooker switches to **Keep Warm**, additional water and cooking time will soften the rice. Depending on how dry your rice is, add ½ to 1 cup of water and stir thoroughly. Close the lid and press the **White Rice** button. When cooker switches to **Keep Warm** mode, open the lid and stir the rice to check the consistency. Repeat as necessary until rice is soft and moist.

• Rice is too moist/soggy after cooking.

If your rice is still too moist or soggy when the cooker switches to **Keep Warm**, use the serving spatula to stir the rice. This will redistribute the bottom (moist) part of the rice as well as release excess moisture. Close the lid and allow to remain on **Keep Warm** mode for 10–30 minutes as needed, opening the lid and stirring periodically to release excess moisture.

6.

Note:

- Do not use harsh abrasive cleaners, scouring pads or products that are not considered safe to use on nonstick coatings.
- We recommend hand washing the inner pot with warm, soapy water to lengthen its lifespan and avoid damage overtime. If washing in a dishwasher, a slight discoloration to the inner pot may occur. This is cosmetic and will not negatively affect performance.
- Any other servicing should be performed by Aroma® Housewares.

Helpful Hints:

The provided rice cooker cup is the equivalent to a ¾ standard U.S. cup.

Note:

- Because of different varieties of rice, results may vary. Refer to these troubleshooting tips to help you achieve the desired consistency.

COOKING RICE & GRAIN

1. Using the provided measuring cup, add rice or grain to the inner pot.
2. Rinse to remove excess starch. Drain.
3. For white rice, fill with water to the line that matches the number of cups of rice being cooked. For brown rice or other grains, refer to the "Rice/Grain & Water Measurement Tables" on pages 8 and 9.
4. Place the inner pot into the cooker and close the lid securely.
5. Plug the power cord into an available 120V AC wall outlet.
6. Press the (b)/**Keep Warm** button to turn on the cooker.
8. Press **White Rice**, **Brown Rice**, or **Steam** depending upon the type of grain being cooked.
9. The cooker will now begin heating. The cooking indicator light will illuminate and the display will show a chasing pattern.
10. The cooker will count down the final 10 minutes of cook time.
11. Once grain is finished, the cooker will beep and automatically switch to **Keep Warm**.
12. For best results, stir the grain with the serving spatula to distribute any remaining moisture.
13. When finished serving, turn the cooker off by pressing (b)/**Keep Warm** and unplug the power cord.

Note:

- Before placing the inner pot into the cooker, check that it is dry and free of debris. Adding the inner pot when wet may damage the cooker.
- If it appears the cooker is not heating up immediately on the **Brown Rice** setting, this is due to a low-heat soak cycle that precedes the cooking cycle to produce better results.
- Food should not be left in the cooker on **Keep Warm** for more than 12 hours.

Helpful Hints:

If you misplace the measuring cup, a ¾ standard U.S. cup is an exact replacement.

To add more flavor to rice, try substituting water for a favorite meat or vegetable broth or stock. The ratio of broth/stock to rice will be the same as water to rice.

For approximate rice and grain cooking times and suggested water ratios, see the "Rice/Grain & Water Measurement Tables" on pages 8 and 9.

- This chart is only a general measuring guide, rice/water measurements may vary.
- **Do not place more than 4 cups of uncooked rice (3 cups of brown rice) into this appliance at one time.** The maximum capacity of this unit is 4 cups of uncooked rice (3 cups of brown rice) which yields 8 cups of cooked rice (6 cups of brown rice).

Note:

- When cooking barley, you must use the **Delay Timer** for 4 hours in combination with the **Grains** function. The additional soaking time will ensure optimal flavor and texture.
- For best results when cooking barley or bulgar, let both grains sit on **Keep Warm** for 10 minutes before serving.

Helpful Hints:

Smaller foods may be placed on a heat-resistant dish and then placed onto the steam tray. Parchment paper or aluminum foil may be used as well.
