

# Dell System S3048-ON 9.14(2.16) Release Notes

This document contains information on open and resolved caveats, and operational information specific to the Dell Networking OS software and the S3048-ON platform.

**Current Release Version:** 9.14(2.16)

**Release Date:** 2022-08-19

**Previous Release Version:** 9.14(2.14)

Topics:

- [Document Revision History](#)
- [Supported Hardware](#)
- [Supported Software](#)
- [New Dell Networking OS Version 9.14\(2.16\) Features](#)
- [Restrictions](#)
- [Changes to Default Behavior and CLI Syntax](#)
- [Documentation Corrections](#)
- [Deferred Issues](#)
- [Fixed Issues](#)
- [Known Issues](#)
- [Upgrading the sub-components](#)
- [Upgrading ONIE on the S3048-ON](#)
- [Installing Dell Networking OS on the S3048-ON using ONIE](#)
- [Upgrading the S3048-ON Dell Networking OS Image using the Dell Networking OS CLI](#)
- [Uninstalling Dell Networking OS on the S3048-ON](#)
- [Installing a Third Party Operating System](#)
- [Support Resources](#)

 **NOTE:** This document may contain language that is not consistent with current guidelines of Dell Technologies. There are plans to update this document over subsequent releases to revise the language accordingly.

Incorrect behavior or unexpected caveats are listed as the Problem Report (PR) numbers within the appropriate sections.

For more information on hardware and software features, commands, and capabilities, see the Dell Networking website at: <https://www.dellemc.com/networking>.

## Document Revision History

**Table 1. Revision History**

Date	Description
2022-08	Initial release.

# Supported Hardware

The following hardware is supported with this platform:

Hardware
S3048-ON chassis
Forty-eight 10/100/1000Base-T RJ-45 Ports
Four SFP+ optical ports (10 Gbps)
Management Port
USB 2.0 Port
Serial Console Port
Two AC PSUs
Three fan subsystems

 **NOTE:** If all the three fan trays are found to be empty or faulty, the system shuts down after one minute.

# Supported Software

The following software is supported with this platform:

Software	Minimum Release Requirement
Dell Networking OS	9.14(2.16)
ONIE	3.24.1.0-4

 **NOTE:** For information on non-Dell OS versions, refer the *Release Notes for the Hardware Platform S3048-ON*.

# New Dell Networking OS Version 9.14(2.16) Features

The following features are integrated into the Dell Networking 9.14.2 branch through this release:

None

# Restrictions

- Prerequisite steps to upgrade the Dell Networking OS from earlier version to 9.14.2.0 or later:
  - Uninstall the older version of the Open Automation (OA) package
  - Upgrade the Dell Networking OS to 9.14.2.0 or later version
  - Install the following OA packages from the respective upgraded version:
    - SmartScripts
    - Puppet
    - Open management infrastructure (OMI)
    - SNMP MIB

Prerequisite steps to downgrade the Dell Networking OS from 9.14.2.0 or later to the earlier version:

1. Uninstall the OA package of 9.14.2.0 or later version
2. Downgrade the Dell Networking OS to an earlier version
3. Install the respective OA package from an earlier version

For more information about installing, uninstalling and upgrading the Dell Networking OS and OA package, see the respective *Dell System Release Notes*.

- If you downgrade the Dell Networking OS version from 9.14.2.16 to 9.11.0.0 or any older versions, the system displays the following error message even though there is no functional impact:

```
CDB boot error:      C.cdb file format
```

Before downgrading, save the current configuration and then remove the CDB files (`confd_cdb.tar.gz.version` and `confd_cdb.tar.gz`). To remove the files, use the following steps:

```
DellEMC#write memory
DellEMC#delete flash://confd_cdb.tar.gz.version
DellEMC#delete flash://confd_cdb.tar.gz
DellEMC#reload
```

- While deploying the system in the normal-reload mode in BMP configuration, use the `ip ssh server enable` command at the beginning of the startup configuration if the write memory command is used at the end of the configuration.
- REST API does not support AAA authentication.
- The following features are not available in the Dell Networking OS from version 9.7(0.0):
  - PIM ECMP
  - Static IGMP join (`ip igmp static-group`)
  - IGMP querier timeout configuration (`ip igmp querier-timeout`)
  - IGMP group join limit (`ip igmp group join-limit`)
- Half-Duplex mode is not supported.
- When FRRP is enabled in a VLT domain, no flavor of Spanning tree should concurrently be enabled on the nodes of that specific VLT domain. In essence FRRP and xSTP should not co-exist in a VLT environment.

## Changes to Default Behavior and CLI Syntax

The following behavior and CLI changes are applicable to the S3048-ON switch with Dell Networking OS version 9.14(2.16):

None

## Documentation Corrections

This section describes the errors identified in the current release of the Dell Networking OS.

- The `router bgp` command allows you to configure only one L3 interface with an IPv4 address. The Configuration guide does not mention this limitation and will be corrected in the next release of the guide.

## Deferred Issues

Issues that appear in this section were reported in Dell Networking OS version 9.14(2.0) as open, but have since been deferred. Deferred caveats are those that are found to be invalid, not reproducible, or not scheduled for resolution.

Deferred issues are reported using the following definitions.

Category	Description
<b>PR#</b>	Problem Report number that identifies the issue.
<b>Severity</b>	<p><b>S1</b> — Crash: A software crash occurs in the kernel or a running process that requires a restart of AFM, the router, switch, or process.</p> <p><b>S2</b> — Critical: An issue that renders the system or a major feature unusable, which can have a pervasive impact on the system or network, and for which there is no work-around acceptable to the customer.</p>

Category	Description
	<p><b>S3</b> — Major: An issue that affects the functionality of a major feature or negatively effects the network for which there exists a work-around that is acceptable to the customer.</p> <p><b>S4</b> — Minor: A cosmetic issue or an issue in a minor feature with little or no network impact for which there might be a work-around.</p>
<b>Synopsis</b>	Synopsis is the title or short description of the issue.
<b>Release Notes</b>	Release Notes description contains more detailed information about the issue.
<b>Work around</b>	<p>Work around describes a mechanism for circumventing, avoiding, or recovering from the issue. It might not be a permanent solution.</p> <p>Issues listed in the “Closed Caveats” section should not be present, and the work-around is unnecessary, as the version of code for which this release note is documented has resolved the caveat.</p>

## Deferred S3048–ON 9.14(2.0) Software Issues

Issues that appear in this section were reported in Dell Networking OS version 9.14(2.0) as open, but have since been deferred. Deferred caveats are those that are found to be invalid, not reproducible, or not scheduled for resolution.

The following issues have been deferred in the Dell Networking OS version 9.14(2.0):

None.

## Fixed Issues

Fixed issues are reported using the following definitions.

Category	Description
<b>PR#</b>	Problem Report number that identifies the issue.
<b>Severity</b>	<p><b>S1</b> — Crash: A software crash occurs in the kernel or a running process that requires a restart of AFM, the router, switch, or process.</p> <p><b>S2</b> — Critical: An issue that renders the system or a major feature unusable, which can have a pervasive impact on the system or network, and for which there is no work-around acceptable to the customer.</p> <p><b>S3</b> — Major: An issue that affects the functionality of a major feature or negatively effects the network for which there exists a work-around that is acceptable to the customer.</p> <p><b>S4</b> — Minor: A cosmetic issue or an issue in a minor feature with little or no network impact for which there might be a work-around.</p>
<b>Synopsis</b>	Synopsis is the title or short description of the issue.
<b>Release Notes</b>	Release Notes description contains more detailed information about the issue.
<b>Work around</b>	<p>Work around describes a mechanism for circumventing, avoiding, or recovering from the issue. It might not be a permanent solution.</p> <p>Issues listed in the “Closed Caveats” section should not be present, and the work-around is unnecessary, as the version of code for which this release note is documented has resolved the caveat.</p>

## Fixed S3048–ON 9.14(2.16) Software Issues

 **NOTE:** Dell Networking OS 9.14(2.16) includes fixes for caveats addressed in the previous 9.14 releases. Refer to the respective release notes documentation for the list of caveats fixed in the earlier 9.14 releases.

The following caveats have been fixed in Dell Networking OS version 9.14(2.16):

**PR# 170307**

**Severity:** Sev 3

**Synopsis:** In certain scenarios, when SSH daemon crashes the switch becomes inaccessible.

**Release Notes:** In certain scenarios, when SSH daemon crashes the switch becomes inaccessible.

**Workaround:** None

## Known Issues

Known issues are reported using the following definitions.

Category	Description
<b>PR#</b>	Problem Report number that identifies the issue.
<b>Severity</b>	<p><b>S1</b> — Crash: A software crash occurs in the kernel or a running process that requires a restart of AFM, the router, switch, or process.</p> <p><b>S2</b> — Critical: An issue that renders the system or a major feature unusable, which can have a pervasive impact on the system or network, and for which there is no work-around acceptable to the customer.</p> <p><b>S3</b> — Major: An issue that affects the functionality of a major feature or negatively effects the network for which there exists a work-around that is acceptable to the customer.</p> <p><b>S4</b> — Minor: A cosmetic issue or an issue in a minor feature with little or no network impact for which there might be a work-around.</p>
<b>Synopsis</b>	Synopsis is the title or short description of the issue.
<b>Release Notes</b>	Release Notes description contains more detailed information about the issue.
<b>Work around</b>	<p>Work around describes a mechanism for circumventing, avoiding, or recovering from the issue. It might not be a permanent solution.</p> <p>Issues listed in the “Closed Caveats” section should not be present, and the work-around is unnecessary, as the version of code for which this release note is documented has resolved the caveat.</p>

## Known S3048–ON 9.14(2.16) Software Issues

The following caveats are open in Dell Networking OS version 9.14(2.16):

None.

## Upgrading the sub-components

Ensure to upgrade the sub-components in the following order and reload the switch, where necessary, before proceeding with the next sub-component upgrade.

1. [Upgrade the BIOS or Boot-selector](#) - using the `upgrade boot bootselector-image stack-unit 1 booted` command.
2. [Upgrade the GRUB or Bootflash](#) - using the `upgrade boot bootflash-image stack-unit 1 booted` command.
3. [Upgrade the CPLD](#) - using the `upgrade fpga-image system cpld stack-unit 1 booted` command.

## Upgrade the BIOS or Boot Selector

To upgrade the BIOS or Boot Selector from Dell Networking OS, perform the following steps:

### 1. Upgrade the S3048-ON Boot Selector image.

EXEC Privilege

```
upgrade boot bootselector-image stack-unit [<id> | all] [booted | flash: | ftp: | scp: |  
tftp: | usbflash:]
```

Dell Networking OS version 9.14(2.16) requires S3048-ON Boot Selector image version 3.24.0.0-11. The booted option is used to upgrade the Boot Selector image to the image version packed with the loaded Dell Networking OS image. The Boot Selector image version packed with the loaded Dell Networking OS can be found using the `show os-version` command in EXEC Privilege mode.

```
DellEMC#upgrade boot bootselector-image stack-unit 1 booted

Current Boot information in the system:
=====
Card           BootSelector    Current Version    New Version
-----
Unit1          Boot Selector    3.24.0.0-9        3.24.0.0-11

*****
* Warning - Upgrading boot selectors is inherently risky and should *
* only be attempted when necessary. A failure at this upgrade may   *
* cause a board RMA. Proceed with caution !                          *
*****

Proceed upgrade Boot Selector image for stack-unit 1 [yes/no]: yes

!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!00:02:33: %S3048-ON:1 %CHMGR-2-
FAN SPEED CHANGE: Fan speed changed to 52 % of the full speed
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
Bootselector image upgrade for stack-unit 1 completed successfully.
DellEMC#
```

### 2. Reload the unit.

EXEC Privilege

```
reload
```

### 3. Verify the Boot Selector image.

EXEC Privilege

```
show system stack-unit <id>
```

```
DellEMC#show system stack-unit 1

-- Unit 1 --

```

Speed in RPM

DellEMC#

## Upgrade the GRUB or Boot Flash

To upgrade the GRUB or Boot Flash from Dell Networking OS, perform the following steps:

1. Upgrade the S3048-ON Boot Flash image.

EXEC Privilege

```

upgrade boot bootflash-image stack-unit [<id> | all] [booted | flash: | ftp: | scp: |
tftp: | usbflash:]

```

```

DellEMC#upgrade boot bootflash-image stack-unit 1 booted

```

Current Boot information in the system:

```

=====
Card                BootFlash      Current Version      New Version
-----
Unit1               Boot Flash          3.24.2.3             3.24.2.9

```

```

*****
* Warning - Upgrading boot flash is inherently risky and should only *
* be attempted when necessary. A failure at this upgrade may cause *
* a board RMA. Proceed with caution !                               *
*****

```

Proceed upgrade Boot Flash image for stack-unit 1 [yes/no]: yes

!!!!

Bootflash image upgrade for stack-unit 1 completed successfully.

## Upgrade the CPLD

The S3048-ON system with Dell Networking OS Version 9.14(2.16) requires System CPLD revision 10 and Module CPLD revision 9.

**NOTE:** If your CPLD revisions are higher than the ones shown here, DO NOT make any changes. If you have questions regarding the CPLD revision, contact technical support..

## Verify that a CPLD upgrade is required

Use the following command to identify the CPLD version:

```
DellEMC#show revision

-- Stack unit 1 --
S3048-ON SYSTEM CPLD      : 10

S3048-ON MODULE CPLD      : 9

DellEMC#
```

Use the following command to view CPLD version that is associated with the Dell Networking OS image:

```
DellEMC#show os-version

RELEASE IMAGE INFORMATION :
-----
Platform      Version      Size      ReleaseTime
S-Series:SG-ON 9.14 (2.16) 65838348 Feb 21 2022 08:37:00

TARGET IMAGE INFORMATION :
-----
Type      Version      Target      checksum
runtime   9.14 (2.16) Control Processor passed

BOOT IMAGE INFORMATION :
-----
Type      Version      Target      checksum
boot flash 3.24.2.9    Control Processor passed

BOOTSEL IMAGE INFORMATION :
-----
Type      Version      Target      checksum
boot selector 3.24.0.0-11 Control Processor passed

FPGA IMAGE INFORMATION :
-----
Card      FPGA Name      Version
stack-unit 1 S3048-ON SYSTEM CPLD 10
stack-unit 1 S3048-ON MODULE CPLD 9
DellEMC#
```

## Upgrading the CPLD Image

**NOTE:** The **upgrade fpga-image stack-unit 1 booted** command is hidden when using the FPGA Upgrade feature in the CLI. However, it is a supported command and will be accepted when entered as documented.

**NOTE:** Ensure that the BIOS version is 3.24.0.0-11. You can verify this version using **show system stack-unit 1** command.

To upgrade the CPLD image on S3048-ON, follow these steps.

1. Upgrade the CPLD image.

EXEC Privilege

```
upgrade fpga-image stack-unit <id> booted
```

```
DellEMC#upgrade fpga-image stack-unit 1 booted

Current information for the system:
=====
Card      Device Name      Current Version      New Version
-----
Unit1     S3048-ON SYSTEM CPLD      9      10
Unit1     S3048-ON MODULE CPLD      7      9
```

```
*****
* Warning - Upgrading FPGA is inherently risky and should      *
* only be attempted when necessary. A failure at this upgrade may *
* cause a board RMA. Proceed with caution !                     *
*****
```

```
Upgrade image for stack-unit 1 [yes/no]: yes
```

```
FPGA upgrade in progress!!! Please do NOT power off the unit!!!
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
```

```
Upgrade result :
=====
```

```
Unit 1 FPGA upgrade successful. Power cycle the Unit 1 to complete the upgrade.
```

```
DellEMC#00:04:11: %S3048-ON:1 %DOWNLOAD-6-FPGA_UPGRADE: stack-unit 1 fpga upgrade
success.
```

```
DellEMC#
```

```
Need to power cycle the unit to complete the FPGA upgrade.
```

2. Power cycle the system physically. Switch off the system by unplugging the power chords from the REAR PSUs and wait until the PSU FAN-REAR STATUS LED is completely OFF.

 **NOTE:** Do not switch on the system with PSU-REAR LED glowing AMBER.

You can alternatively power cycle the switch using the `power-cycle stack-unit <1-6>` command as follows:

```
DellEMC#power-cycle stack-unit 1
Proceed with power-cycle? Confirm [yes/no]:yes
```

3. The CPLD version can be verified using `show revision` command output :

EXEC Privilege

```
show revision
```

```
DellEMC#show revision

-- Stack unit 1 --
S3048-ON SYSTEM CPLD      : 10

S3048-ON MODULE CPLD      : 9

DellEMC#
```

 **NOTE:** Do not power off the system while FPGA upgrade is in progress. For any queries, contact technical support.

## Upgrading ONIE on the S3048-ON

To upgrade the ONIE package you have installed, use one of the following two processes: zero touch (dynamic) update or manual update.

1. Zero touch (dynamic): Copy the update ONIE installer and the DIAG installer for your system to the TFTP/HTTP server. Configure the DHCP options using the ONIE specifications shown at the following link: <http://opencomputeproject.github.io/onie/docs/design-spec/updater.html>

```
S3048-ON image>>>> onie-updater-x86_64-s3000_c2338-r0
```

2. Manual: Copy the image onto the TFTP/HTTP servers and boot ONIE. Update the ONIE using the **onie-self-update** command, then download and run an ONIE updater image. The supported URL types are: HTTP, FTP, TFTP, and FILE.

```
S3048-ON image>>>> onie-updater-x86_64-s3000_c2338-r0
```

3. UPGRADING ONIE ON AN EXISTING S3048-ON SYSTEM.

The following example uses HTTP to upgrade ONIE.

```
ONIE:/ # onie-self-update tftp://10.16.127.35/onie-updater-x86_64-s3000_c23
38-r0
Stopping: discover... done.

## Installing Dell Networking OS on the S3048-ON using ONIE

**NOTE:** The Dell Networking OS installer package, ONIE-FTOS-SG-ON-9.14.2.16.bin, is required for installing Dell Networking OS on S3048-ON that has only ONIE.

To install the Dell Networking OS version 9.14(2.16) on to the new S3048-ON device, perform the following steps:

1. Boot the system to the ONIE prompt. The following ONIE prompt appears:

```
ONIE:/ #
```

2. Stop the ONIE discovery process using the following command:

```
ONIE:/ # onie-discovery-stop
```

The following message appears:

```
Stopping: discover... done.  
ONIE:/ #
```

3. Configure an interface and assign an IP address to that interface using the following command:

```
ONIE:/ # ifconfig eth0 ip-address/prefix up
```

4. Enter the following command to begin the installation process:

```
ONIE:/ # onie-nos-install tftp://10.16.127.35/ONIE-FTOS-SG-ON-9.14.2.16.bin
```

**NOTE:** After the Dell Networking OS installation is complete, the system automatically reboots.

Following is the installation and boot log of Dell Networking OS:

```
ONIE:/ #  
ONIE:/ #

# Upgrading the S3048-ON Dell Networking OS Image using the Dell Networking OS CLI

## Bare Metal Provisioning

 **NOTE:** If you are using Bare Metal Provisioning (BMP), see the Bare Metal Provisioning topic in the Dell Networking OS Configuration Guide or the Open Automation Guide.

## Manual Upgrade Procedure

Follow these steps carefully to upgrade your S3048-ON systems:

1. Dell Networking recommends that you back up your startup configuration and any important files and directories to an external media prior to upgrading the system.

**NOTE:** If you are upgrading from Dell Networking OS version 9.10.0.1P5 or earlier, you cannot directly upgrade to version 9.10.0.1P13 or above. Upgrade to version 9.10.0.1P8 first and then upgrade to the required version.

2. Upgrade the Dell Networking OS in flash partition A: or B:

## EXEC Privilege

```
upgrade system [flash: | ftp: stack-unit <1-6> | tftp: | scp: | usbflash:] [A: | B:]
```

```
DellEMC#upgrade system tftp: a:
Address or name of remote host [: 10.16.127.35
Source file name [: FTOS-SG-9.14.2.16.bin
3d17h59m : Discarded 1 pkts. Expected block num : 62. Received block num: 61
3d17h59m : Discarded 1 pkts. Expected block num : 65. Received block num: 64
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!.....
.....!

System image upgrade completed successfully.
DellEMC#Feb 21 12:00:33: %STKUNIT1-M:CP %DOWNLOAD-6-UPGRADE: Upgrade completed
successfully
DellEMC#
```

3. Verify that the Dell Networking OS has been upgraded correctly in the upgraded flash partition.

## EXEC Privilege

```
show boot system stack-unit [1-6] | all]
```

```
DellEMC#show boot system stack-unit all

Current system image information in the system:
=====
Type           Boot Type           A                                     B
-----
stack-unit 1   DOWNLOAD BOOT   9.14 (2.16) [boot]                   9.14 (2.14)
stack-unit 2   is not present.
stack-unit 3   is not present.
stack-unit 4   is not present.
stack-unit 5   is not present.
stack-unit 6   is not present.
DellEMC#
```

4. Change the Primary Boot Parameter of the S3048-ON to the upgraded partition A: or B:

## CONFIGURATION

```
boot system stack-unit 1 primary system: [A: | B: | tftp: | ftp:]
```

5. Save the configuration so that the configuration will be retained after a reload using write memory command.

EXEC Privilege

```
write memory
```

```
DellEMC#write memory
!
Feb 21 18:58:59: %STKUNIT1-M:CP %FILEMGR-5-FILESAVED: Copied running-config to
startup-config in flash by default
DellEMC#
```

6. Reload the unit.

EXEC Privilege

```
reload
```

```
Command      : reload
Mode         : EXEC PRIVILEGE
DellEMC#reload
Proceed with reload [confirm yes/no]: y
```

7. Verify the S3048 ON has been upgraded to the Dell Networking OS version 9.14(2.16).

EXEC Privilege

```
show version
```

```
DellEMC#show version

## Uninstalling Dell Networking OS on the S3048-ON

To uninstall the Dell Networking OS version 9.14(2.16) from the S3048-ON device, perform the following steps:

1. Reboot the system. During the reboot process, the system displays the following message prompting you to press the Esc key in order to stop the auto-boot process:

```
Version 2.16.1242. Copyright (C) 2021 American Megatrends, Inc.
BIOS Date: 02/21/2022 01:14:04 15:25:58 Ver: 0ACBZ018

Press DEL or F2 to enter setup.

Grub 1.99~rc1 (Dell EMC)
Built by root at ubuntu on Mon_Feb_21_14:42:47 UTC_2022
S3000ON Boot Flash Label 3.24.2.9 NetBoot Label 3.24.2.9
```

```
Press Esc to stop autoboot ... 5
```

2. At this prompt message, press the Esc key. The following menu appears:

```
+-----+
| Dell EMC Networking OS
| Dell EMC-Boot Line Interface
| DELL-DIAG
| ONIE
+-----+
```

3. From the menu, choose the **ONIE** option.

**NOTE:** To choose an option from the menu, highlight one of the options using the up or down arrow key and press **Enter**.

The following menu appears:

```
+-----+
| ONIE: Install OS
| ONIE: Rescue
| *ONIE: Uninstall OS
| ONIE: Update ONIE
| ONIE: Embed ONIE
| ONIE: Diag ONIE
| DELL-DIAG
+-----+
```

4. From this menu, choose the **ONIE : Uninstall OS** option.

**NOTE:** To choose an option from the menu, highlight one of the options using the up or down arrow key and press **Enter**.

The uninstall process begins. Following is the log generated by the system while Dell Networking OS 9.14.2.16 uninstalls:

```

## Installing a Third Party Operating System

Apart from the Dell Networking OS, you can also install a supported third party operating system on the S3048-ON system. For more information on installing a third party operating system, please check the ONIE documentation at <https://github.com/opencomputeproject/onie/wiki/Quick-Start-Guide> and refer to the respective third party OS vendor's website for OS installation instructions.

## Support Resources

The following support resources are available for the S3048-ON system.

## Documentation Resources

This document contains operational information specific to the S3048-ON system.

For information about using the S3048-ON, refer to the following documents at <http://www.dell.com/support>:

- *Installing the S3048-ON System*
- *Quick Start Guide*
- *Dell Networking Command Line Reference Guide for the S3048-ON System*
- *Dell Networking Configuration Guide for the S3048-ON System*

For more information about hardware features and capabilities, refer to the Dell Networking website at <https://www.dellemc.com/networking>.

For more information about the open network installation environment (ONIE)-compatible third-party operating system, refer to <http://onie.org>.

## Issues

Issues are unexpected or incorrect behavior and are listed in order of Problem Report (PR) number within the appropriate sections.

## Finding Documentation

This document contains operational information specific to the S3048-ON switch.

- For information about using the S3048-ON, refer to the documents at <http://www.dell.com/support>.
- For more information about hardware features and capabilities, refer to the Dell Networking website at <https://www.dellemc.com/networking>.
- For more information about the open network installation environment (ONIE)-compatible third-party operating system, refer to <http://onie.org>.

## Contacting Dell

 **NOTE:** If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area. To contact Dell for sales, technical support, or customer service issues:

Go to [www.dell.com/support](http://www.dell.com/support).

## Notes, cautions, and warnings

 **NOTE:** A NOTE indicates important information that helps you make better use of your product.

 **CAUTION:** A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

 **WARNING:** A WARNING indicates a potential for property damage, personal injury, or death.
