## What's In The Box

Please inspect the contents of your shipped package to ensure you have received everything that is listed below.

Heavy Duty Aluminum  
Spreader

---

## Aluminum Tripod Spreader

- Place the spreader flat on the floor. Adjust the spreader arms to the required width using the provided knob.

- The spreader is now fully and properly opened.

**Note:-** The build-up radius of the spreader is 41-66 cm / 16-26 inches.

- Carefully place the spiked end of the tripod leg into the designated slot on the spreader.

- Ensure the rubber gripper is properly aligned with the tripod leg—it should sit evenly around the spike leg housing.
- If it doesn't fit snugly, adjust the gripper's position.

- Using a screwdriver (not included), loosen the screws on both sides of the rubber gripper to allow adjustment.

- Adjust and re-position the rubber gripper so it fits snugly around the twin spiked feet of the tripod leg.

- Tighten both the screws using a screwdriver.

- Firmly mount the rubber gripper onto the tripod leg, wrapping the spike feet completely.

- The tripod and spreader are now securely attached, as shown in the image.
