Minimum Height 10 cm

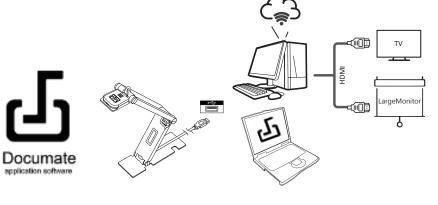

Note:
Use two coins to tighten the screws if the arm is loose.

D| Installing application software on computer/laptop

INS-Flip 4 requires the Documate application or other webinar software to function.

Please download the latest version of the Documate application for PC, Mac, or Chromebook at *www.inswan.com*. Use Documate to display the textbook/objects, and then use screen sharing in any webinar application for high-engagement remote teaching/conferencing.

INS-Flip 4 is compatible with most webinar software applications.

E | Using the Documate application software

Start the application on your computer/laptop and choose the desired operation mode.

Live mode (default):

Shows the live image captured by the INS-Flip 4 and provides various functions to enhance your presentation.

Recording video and image capture

Recording video and image capture.

Click to take snapshots or to record video clips for future use.

Playback mode :

Review and/or edit snapshots and video clips taken by INS-Flip 4 or other devices.

Drawing mode :

Use the whiteboard space and markup tools to add text, create drawings or markup existing images.

Scan mode:

Scan documents or images into PDF, PNG, JPG or TIFF file formats. Also, perform OCR (optical character recognition) to extract text for editing.

Batch scan mode :

Scan more than one document at a time.

You can read multiple pages of text in one sitting by scanning multiple images.

F | Adjust focus

Press for one-time autofocus adjustment.

G | Supplemental illumination

Turn on the LED lamp to improve image quality in dark conditions.

H | Adjust brightness

Press to adjust desired brightness level.

I | Change image orientation

Flip image orientation by simultaneously holding both brightness buttons (+) (-).
