

Setup Guide

Jethro V1 AI Mouse

**Download the V-AI Software
Upon First Use**

Hardware Overview

Jethro V1 AI Mouse

Hardware Setup

Jethro V1 AI Mouse

■ Charging the Mouse

- Fast charging isn't supported. Use the included USB-C cable for safe charging.
- It is recommended to connect the mouse to your computer for charging.

■ USB Receiver Location

- The USB receiver is stored inside the mouse. Open the back cover to access it.

■ Multiple Connections

- Connect up to 3 different devices.
- Use the button on the right side to switch between them.
- Different lights indicate each connected device.

Online User Manual

V-AI Software Installation

Window System

- Visit our official website: www.virtusxus.com
- Navigate to the **Software** tab.
- Select Download for **Windows**.
- Install the software. It should automatically open upon successful installation.

Important: If you use McAfee or Norton, you may see a warning. Please allow the installation to continue.

V-AI Software Installation

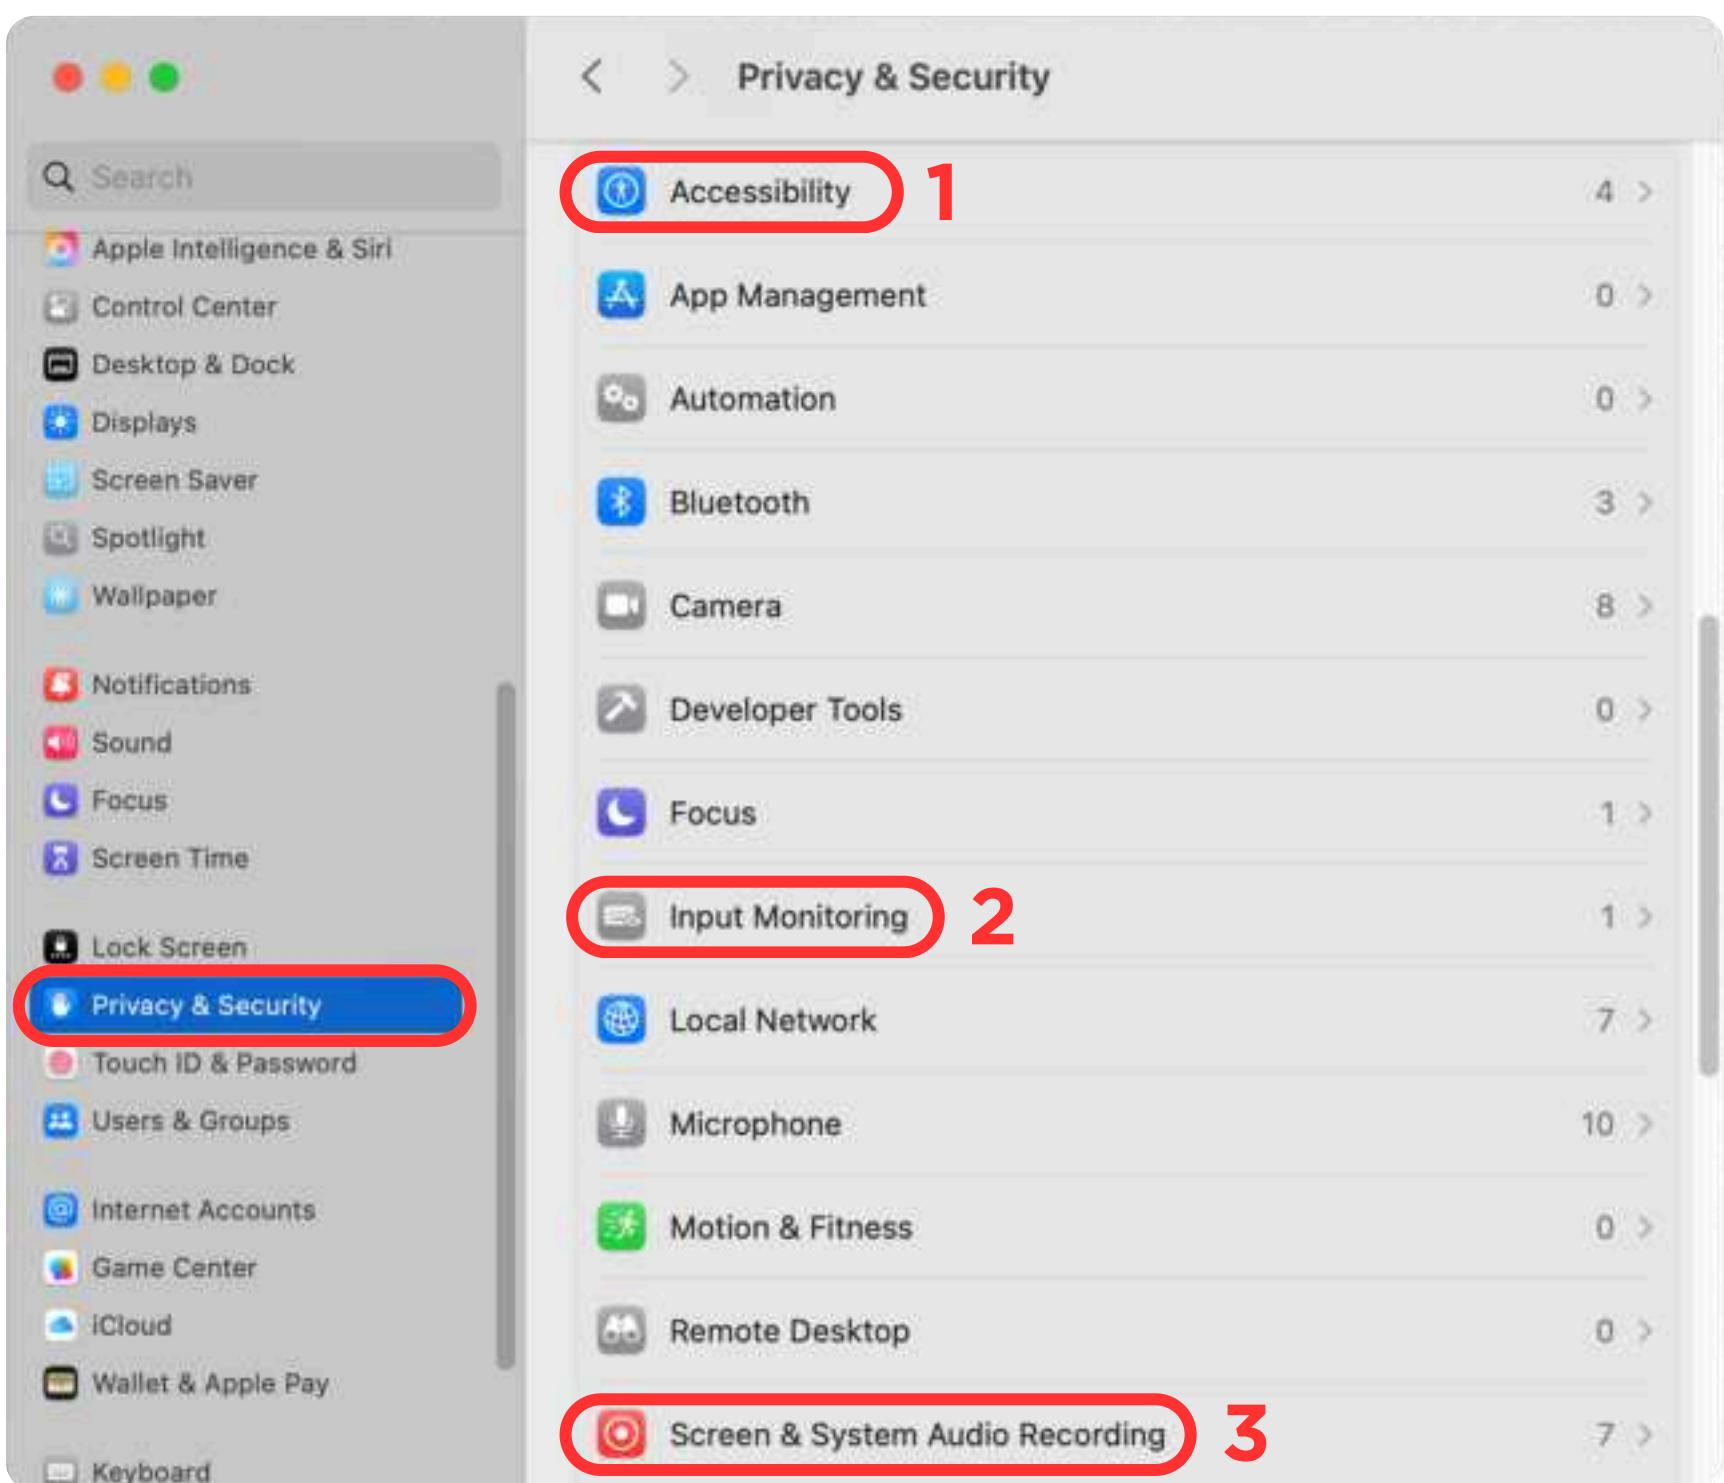

MacOS System

- Visit our official website: www.virtusxus.com
- Navigate to the **Software** tab.
- Select Download for **MacOS**.
- Double-click the file, then drag the V-AI icon to Applications to install.
- After installation, open System Settings and go to **Privacy & Security**.
- Enable the V-AI software under the following sections:
 - Accessibility.
 - Input Monitoring.
 - Screen Recording & System Audio Recording.

Important: Once these settings are enabled, all AI features will function seamlessly on your MacOS system.

Voice Function Setup

Voice Typing/Speech to Text

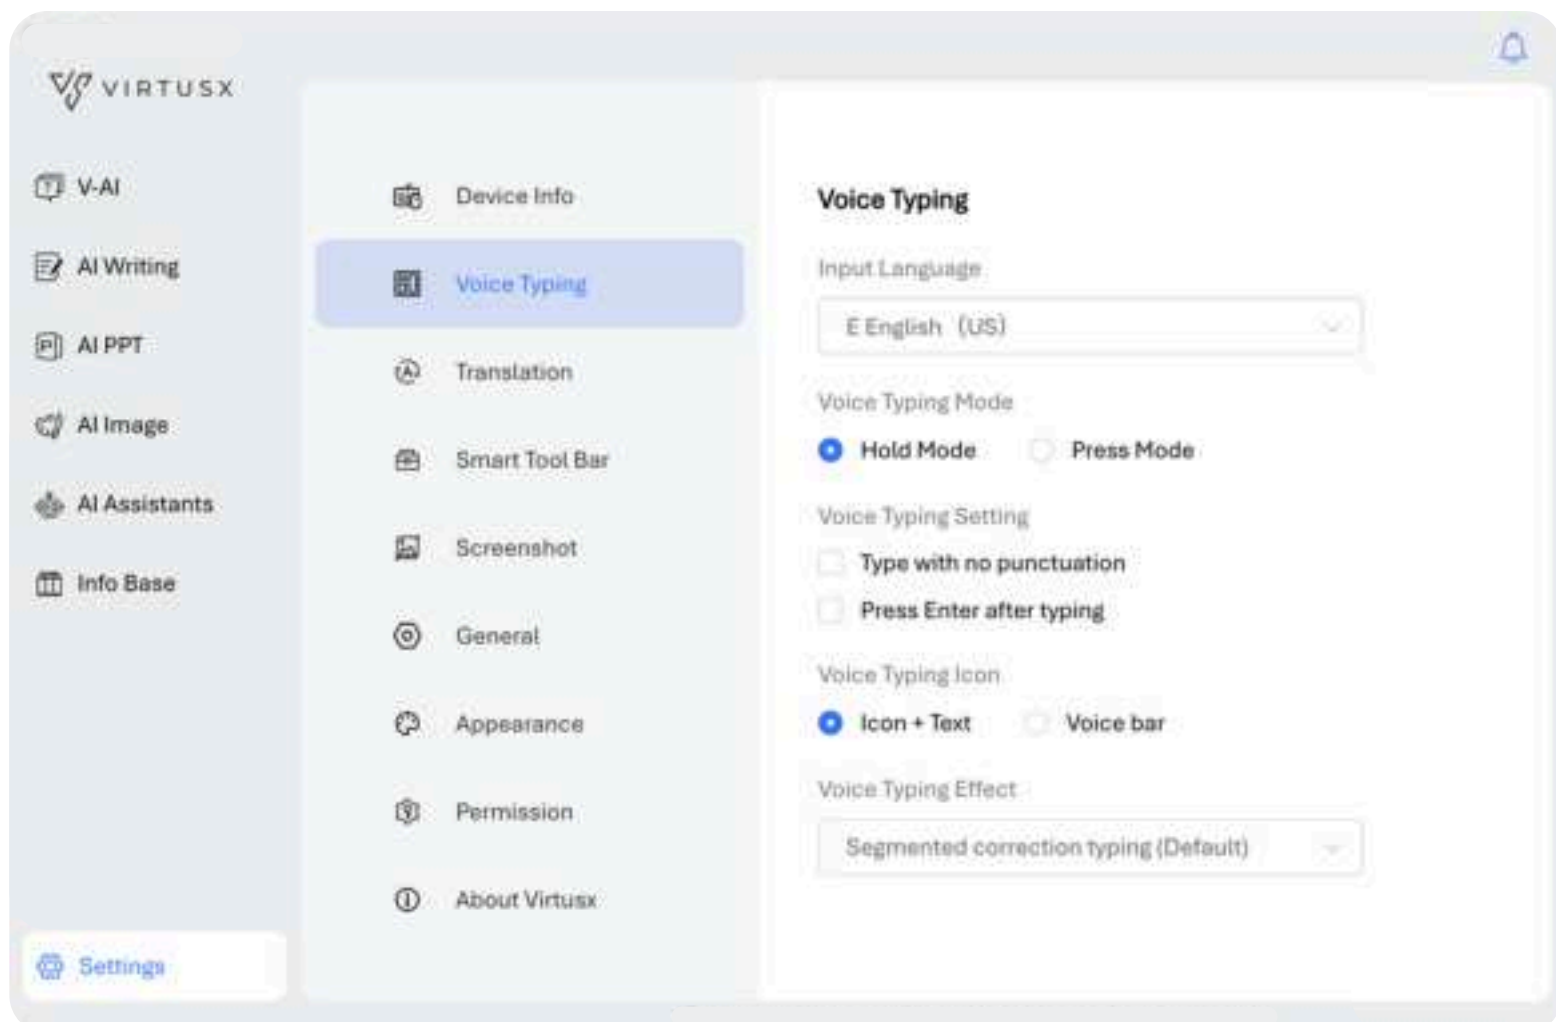

■ Set Your Language

- Open the V-AI software.
- Go to Settings > Voice typing > Language.
- Choose the language you want to speak in.

■ Video Walkthrough

- Still have questions about setting up the voice function? Watch our tutorial video for step-by-step guidance.

Voice Function Tutorial Video

Important: If the voice input language is different from the one you're speaking, it may not work correctly.

Voice Function Setup

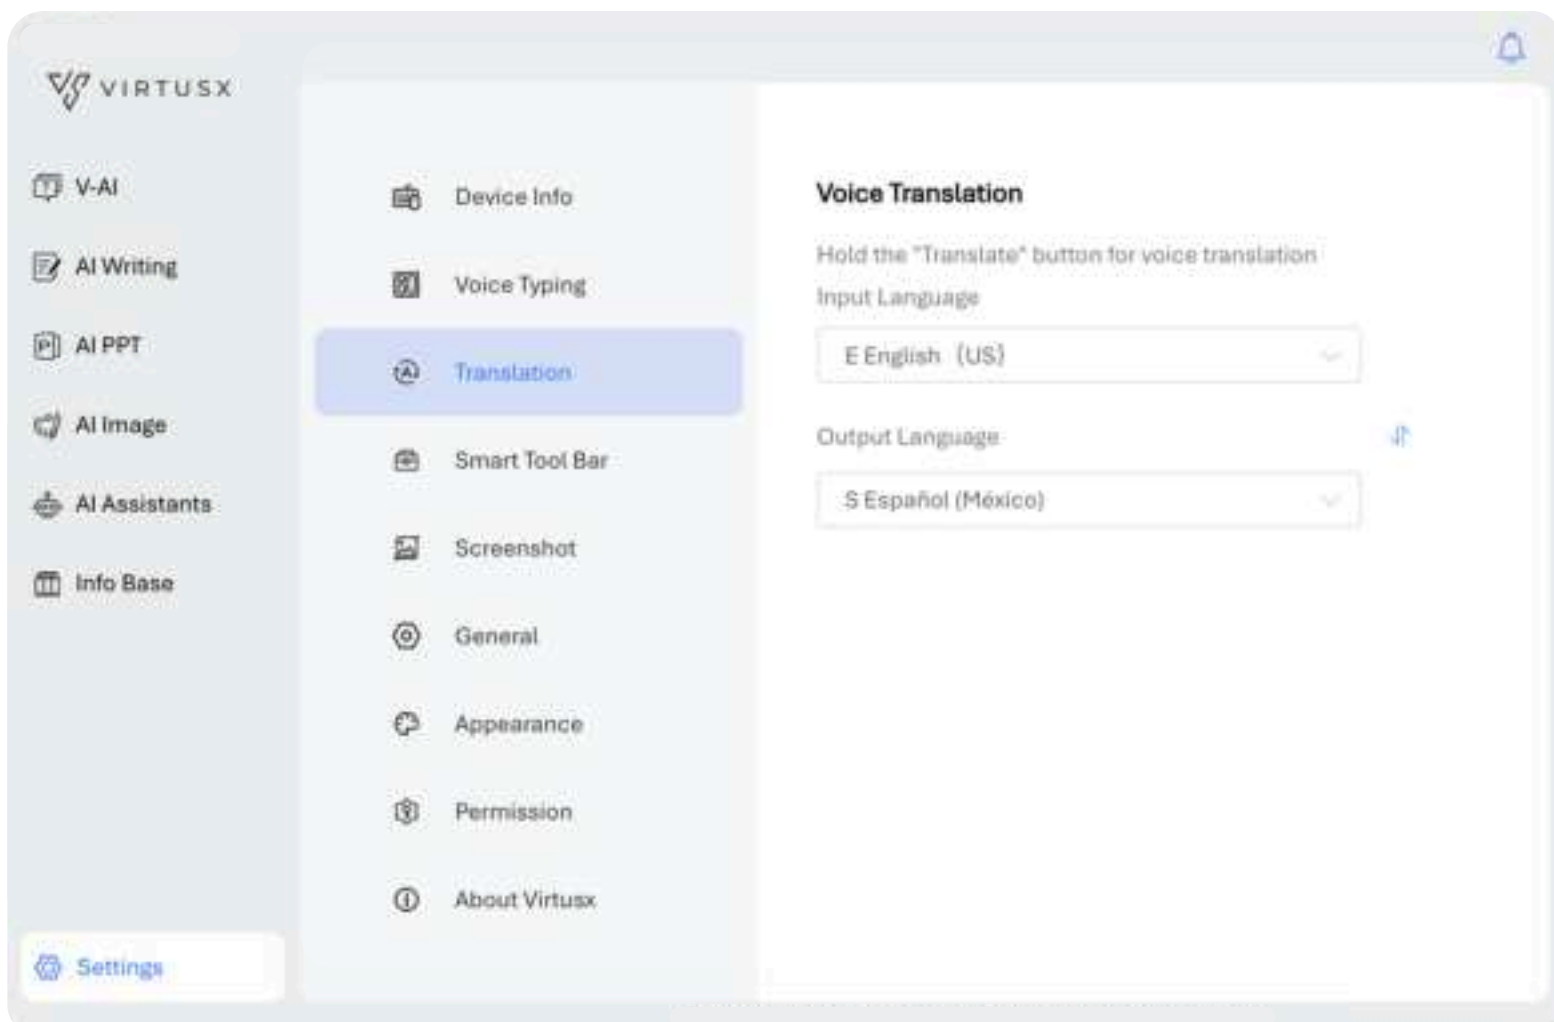

Voice Translation

■ Set Your Language

- Open the V-AI software.
- Go to Settings > Translation > Language.
- Choose the language you will speak and the language you want it translated into.

■ Real Time Translation

- Hold the Smart Toolbar button to activate the language translation function.
- Press mode is not supported. Make sure to hold the button while speaking.

Important: If the voice input language is different from the one you're speaking, it may not work correctly.

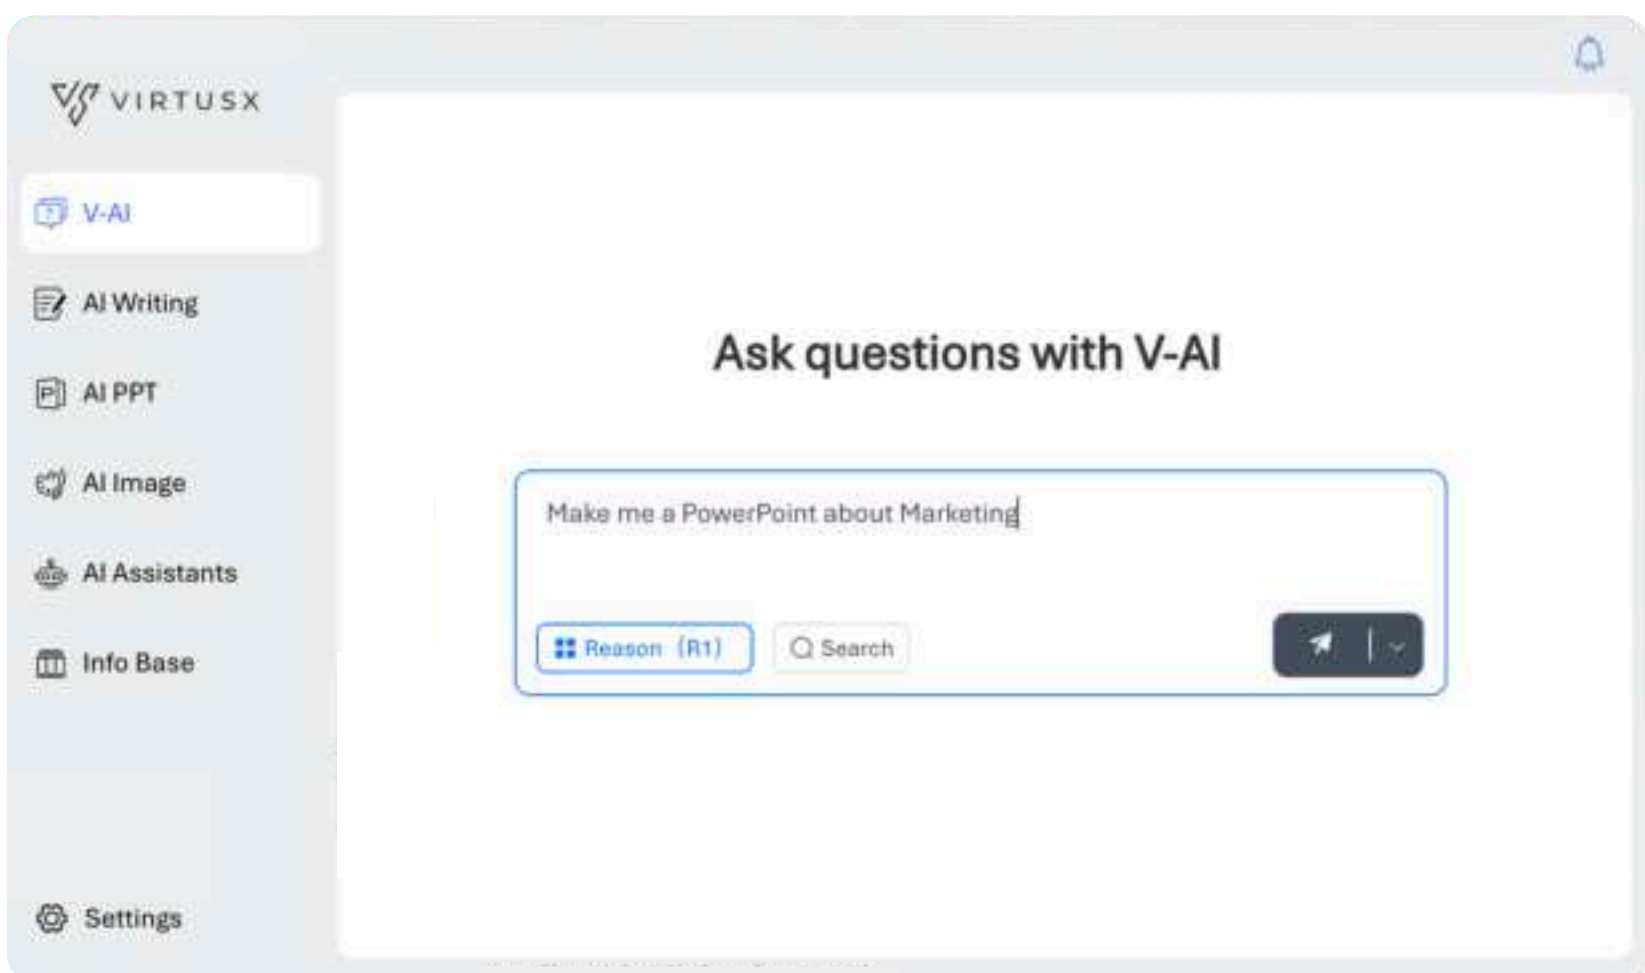

Voice Function Setup

Voice Command

Voice Command uses the same settings as Voice Typing.

■ Use Voice Command

- Hold the AI button and speak your task.
- Your command will automatically be typed into the V-AI chat, regardless of which window is open.
- Once entered, V-AI will start processing your request.

Important: If the voice input language is different from the one you're speaking, it may not work correctly.

Quick Troubleshooting

Frequently Asked Questions

■ **Voice typing is not working**

- The default language is set to English. Please select the language you are speaking before using voice typing.

■ **Voice Function Still Not Working?**

- Go to Settings > About Virtusx > Software Logs.
- Press the voice button—an action should be logged.
- If nothing appears, contact support@virtusxus.com for help.

■ **My mouse is not charging**

- Fast charging isn't supported. Please use the included USB-C cable or a DC 5V-1A charger for safe charging.

■ **Will V-AI receive updates?**

- Yes, we update V-AI every month. Updates are posted in the Community section on our website.
