

VK2 RGB

The VK2 RGB is an ATX case that is suitable for a wide range of gaming setups thanks to its spacious design, refined looks, and a side panel made of tempered glass. Four fans are already pre-installed for a strong airflow. This can be expanded to comprise up to eight fans or, for maximum performance, radiators with a size of up to 360 mm. There is also sufficient space for HDDs and SSDs as well as tidy cable management.

Features

■ GAMING DESIGN

With the subtly playful look of the front panel and a tempered-glass side panel, the VK2 RGB is ideal for many different kinds of gaming setup and perfectly blends into all kinds of surroundings.

■ EXPANDABLE AIRFLOW

Three 120 mm fans and one 120 mm RGB LED fan are already pre-installed in the VK2 RGB, but this can be easily expanded to up to eight fans. The areas of air intake are protected by dust filters.

■ WATER-COOLING SUPPORT

For demanding systems, and instead of fans, the VK2 can be equipped with a 240 mm or 280 mm radiator under the top panel and a 360 mm radiator behind the front panel.

■ SUFFICIENT SPACE FOR DATA STORAGE

Up to two 3.5" HDDs or four 2.5" SSDs can be conveniently installed in different locations inside the VK2 RGB.

■ CONNECTIONS NEAR THE FRONT

For peripheral devices, two fast USB 3.0 ports and a TRRS port for headsets are available on the top of the ATX case.

■ ROOM FOR LARGE HARDWARE COMPONENTS

The VK2 offers sufficient space for large components, such as graphics cards with a length of up to 35 cm, a CPU cooler with a maximum height of 16 cm, and a power supply unit with a length of up to 21 cm.
