

INSTALLATION INSTRUCTIONS

FOR UNIVERSAL HOOK

FOR ELECTRIC CAR
CHARGING CABLE

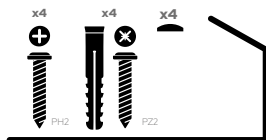

TOOLS REQUIRED TO MOUNT THE UNIVERSAL HOOK ON THE WALL:

- Drill with masonry drill bit 8 mm
- Electric screwdriver with PZ2 bit

TOOLS REQUIRED TO MOUNT THE UNIVERSAL HOOK TO A METAL POLE:

- Electric screwdriver with PH2 bit

SET COMPONENTS:

- Universal hook – 1 pc.
- Self-drilling screws PH2 – 4 pcs.
- Plastic expansion wall plugs with PZ2 screws – 4 pcs.
- Screw plugs – 4 pcs.

1 WALL MOUNTING METHOD:

- Mark the locations of the dowel holes by using the hook as a template.
- Drill 4 holes 8 mm in diameter and 60 mm deep.
- Place the wall plugs in the holes.
- Place the bottom part of the plugs on the screws.
- Screw the hook to the post with the screws.
- Cover the heads of the screws with the upper part of the plugs.

2 METAL POLE MOUNTING METHOD:

- Mark the screw locations on the surface of the pole.
- Screw the hook to the post with the self-drilling screws.
