

## Robust results continue – Outlook confirmed

- **Orders in Q3 2025 rose 28 percent on a comparable basis to €24.7 billion (Q3 2024: €19.8 billion)**
- **Revenue grew 5 percent on a comparable basis to €19.4 billion (Q3 2024: €18.9 billion)**
- **At €2.8 billion, Profit Industrial Business was 7 percent lower than in the prior-year quarter (Q3 2024: €3.0 billion)**
- **Profit margin Industrial Business was 14.9 percent (Q3 2024: 16.5 percent)**
- **As expected, Digital Industries' software business was much weaker than in the extraordinarily strong Q3 2024, which included several large software license deals. All of Digital Industries' key performance indicators reflect this challenging basis of comparison**
- **Free cash flow at Group level totaled an excellent €2.9 billion (Q3 2024: €2.1 billion)**
- **Net income increased 5 percent to €2.2 billion (Q3 2024: €2.1 billion)**

Siemens continued its successful growth trajectory also in Q3 2025 (ended June 30, 2025), with robust results and achieved growth in nearly all key performance indicators. For this reason, the company confirms its outlook for fiscal 2025, excluding effects related to Altair and Dotmatics, which were successfully acquired ahead of schedule, and excluding the gain from the sale of Innomotics.

“Our third-quarter performance demonstrates that Siemens is delivering robust results despite the volatile global market. We’re posting sustained growth momentum in orders, revenue and net income. Digitalization and sustainability continue to be our growth drivers. In addition, with the closing of our acquisition of Dotmatics, we’re opening up new markets in life sciences and are combining

scientific intelligence with our industrial AI technologies,” said Roland Busch, President and Chief Executive Officer of Siemens AG.

“In the third quarter, we posted an excellent €2.9 billion in free cash flow, and we are again aiming to achieve a double-digit free-cash-flow return for the full fiscal year. Looking ahead, we remain highly confident that we will deliver sustainable and profitable growth. We confirm our outlook for fiscal 2025,” said Ralf P. Thomas, Chief Financial Officer of Siemens AG.

### **Strong growth in orders and free cash flow**

In Q3 2025, Siemens increased orders 28 percent on a comparable basis – that is, excluding currency translation and portfolio effects – to €24.7 billion (Q3 2024: €19.8 billion). Revenue totaled €19.4 billion, a 5 percent increase year-over-year on a comparable basis (Q3 2024: €18.9 billion). The book-to-bill ratio totaled an excellent 1.28. The order backlog at the end of Q3 2025 totaled €117 billion and was of high quality.

Profit Industrial Business declined 7 percent to €2.8 billion (Q3 2024: €3.0 billion) due to a sharp decline in profit at Digital Industries after an exceptionally strong profit at the software business in the prior-year quarter. At all other industrial businesses, profit and profitability increased. The profit margin of the Industrial Business was 14.9 percent (Q3 2024: 16.5 percent).

Net income climbed 5 percent to €2.2 billion (Q3 2024: €2.1 billion), benefiting, among other things, from a €0.2 billion gain from the closing of the sale of part of the airport logistics business. Corresponding basic earnings per share before purchase price allocation accounting (EPS pre PPA) were €2.78 and thus 5 percent higher than in the prior-year quarter (Q3 2024: €2.66).

Free cash flow all-in at Group level from continuing and discontinued operations totaled an excellent €2.9 billion (Q3 2024: €2.1 billion). Free cash flow at the Industrial Business increased significantly from €2.5 billion to €3.0 billion, including improvements at all industrial businesses.

**Profitable growth at Smart Infrastructure and Mobility**

Orders at Digital Industries decreased moderately to €4.4 billion (Q3 2024: €4.5 billion). Nevertheless, orders at the automation business were up from a low prior-year basis on higher demand in all three reporting regions, including substantial growth in China and the U.S. This increase was more than offset by a decline at the software business, where orders came in below the exceptionally strong Q3 2024, which had included a number of large contract wins for licensed software. Comparable revenue was down 10 percent to €4.4 billion (Q3 2024: €4.9 billion). The substantial revenue decline at the software business was also largely due to the high level of licensed software contracts in Q3 2024. In contrast, revenue at the automation business increased year-over-year for the first time since Q4 2023, driven mainly by China. Profit (€642 million) and profitability (14.5 percent) decreased largely due to lower revenue at the software business and to higher severance charges related mainly to the automation business.

At €5.7 billion, comparable orders at Smart Infrastructure came in close to the strong prior-year level (Q3 2024: €6.0 billion), which had included a number of large contracts from data centers and energy customers. Revenue increased at all businesses and in all reporting regions, climbing 9 percent on a comparable basis to €5.7 billion (Q3 2024: €5.4 billion), led by the electrification business, which continued to execute strongly on its large order backlog from data centers and energy customers. Smart Infrastructure again grew profit and profitability year-over-year on higher revenue, increased capacity utilization and ongoing productivity improvements. Profit increased 16 percent to €1.1 billion (Q3 2024: €923 million), and the profit margin rose to 18.8 percent (Q3 2024: 17.0 percent).

At Mobility, orders more than tripled to €7.9 billion (Q3 2024: €2.4 billion) on a sharply higher volume from large orders, including an order worth €3.5 billion from an existing framework agreement for a turnkey rail system in Egypt as well as a €1.7 billion order for high-speed trains and services in the U.S. Mobility increased its revenue 19 percent on a comparable basis to €3.1 billion (Q3 2024: €2.6 billion) on growth at all businesses, with the strongest growth contributions coming from the rolling stock and customer services businesses. Profit climbed 26 percent to €286 million due to higher revenue (Q3 2024: €227 million). The corresponding profit margin rose to 9.3 percent (Q3 2024: 8.7 percent).

**Siemens AG** (Berlin and Munich) is a leading technology company focused on industry, infrastructure, mobility, and healthcare. The company's purpose is to create technology to transform the everyday, for everyone. By combining the real and the digital worlds, Siemens empowers customers to accelerate their digital and sustainability transformations, making factories more efficient, cities more livable, and transportation more sustainable. A leader in industrial AI, Siemens leverages its deep domain know-how to apply AI – including generative AI – to real-world applications, making AI accessible and impactful for customers across diverse industries. Siemens also owns a majority stake in the publicly listed company Siemens Healthineers, a leading global medical technology provider pioneering breakthroughs in healthcare. For everyone. Everywhere. Sustainably.

In fiscal 2024, which ended on September 30, 2024, the Siemens Group generated revenue of €75.9 billion and net income of €9.0 billion. As of September 30, 2024, the company employed around 312,000 people worldwide on the basis of continuing operations. Further information is available on the Internet at [www.siemens.com](http://www.siemens.com).

## Notes and forward-looking statements

This document contains statements related to our future business and financial performance and future events or developments involving Siemens that may constitute forward-looking statements. These statements may be identified by words such as "expect," "look forward to," "anticipate," "intend," "plan," "believe," "seek," "estimate," "will," "project" or words of similar meaning. We may also make forward-looking statements in other reports, in prospectuses, in presentations, in material delivered to shareholders and in press releases. In addition, our representatives may from time to time make oral forward-looking statements. Such statements are based on the current expectations and certain assumptions of Siemens' management, of which many are beyond Siemens' control. These are subject to a number of risks, uncertainties and factors, including, but not limited to those described in disclosures, in particular in the chapter Report on expected developments and associated material opportunities and risks in the Combined Management Report of the Siemens Report ([www.siemens.com/siemensreport](http://www.siemens.com/siemensreport)), and in the Interim Group Management Report of the Half-year Financial Report (provided that it is already available for the current reporting year), which should be read in conjunction with the Combined Management Report. Should one or more of these risks or uncertainties materialize, should decrees, decisions, assessments or requirements of regulatory or governmental

authorities deviate from our expectations, should events of force majeure, such as pandemics, unrest or acts of war, occur or should underlying expectations including future events occur at a later date or not at all or assumptions prove incorrect, actual results, performance or achievements of Siemens may (negatively or positively) vary materially from those described explicitly or implicitly in the relevant forward-looking statement. Siemens neither intends, nor assumes any obligation, to update or revise these forward-looking statements in light of developments which differ from those anticipated.

This document includes – in the applicable financial reporting framework not clearly defined – supplemental financial measures that are or may be alternative performance measures (non-GAAP-measures). These supplemental financial measures should not be viewed in isolation or as alternatives to measures of Siemens' net assets and financial positions or results of operations as presented in accordance with the applicable financial reporting framework in its Consolidated Financial Statements. Other companies that report or describe similarly titled alternative performance measures may calculate them differently.

Due to rounding, numbers presented throughout this and other documents may not add up precisely to the totals provided and percentages may not precisely reflect the absolute figures.
