

YOUR GUIDE TO THE LOGITECH EXPERIENCE CENTRE

– AND WHY EVERY IT LEADER SHOULD VISIT

We've all done it before: purchased something online without checking out the product in person, only to be disappointed when it arrives.

From headsets that aren't quite big enough, to keyboards too bulky for a modest desk or a webcam that doesn't integrate with Microsoft Teams: blindly buying tech online can feel full of hazards – especially when you're buying at scale.

Thankfully, this is easily solved by testing prospective products in person. When you can explore the product range you're considering in real life, you alleviate all the risk. You can rest assured the tools you're giving your team will equip them with everything they need to succeed at wherever they're working from today.

And with tools that were designed to work with the Microsoft software solutions you already use, you can relax knowing you can rely on the Logitech suite to slot perfectly into the way you work now.

We believe nobody should have to put up with video conferencing solutions that don't meet their standards. And yet so many do. That's why we built the Logitech Experience Centre.

The Logitech Experience Centre allows you to see, use, and experience Logitech products in person. From getting under the hood of our mice and keyboards, to trialling a fully-equipped Logitech Rooms enabled meeting space, you'll be treated to a full end-to-end look at how to help their business thrive in the golden age of hybrid working.

With the ability to simulate both remote and office working scenarios, you'll discover how the Logitech offering works across a range of different environments, with tailored assistance to help narrow down what would benefit your business the most.

Perhaps your workforce prefer remote working. In this case, you can focus on the personal workspace range, and learn how the products seamlessly integrate with the Microsoft suite and unlock the full potential of software you use every day, from Teams to Word and beyond.

Short on space? Explore how to transform even the smallest of office spaces into a hub of communication that everyone from IT to the least tech-capable user on your team can get on board with.

No matter your needs, we're here to help you build the ultimate collaboration solution for your business.

Why visit?

- Touch, feel, and develop tactile understanding of the products
- Receive dedicated specialist assistance for 2 or 4 hours, giving ample opportunity to have every video conferencing conundrum solved
- Explore how Logitech products interact with the Microsoft suite, from one touch to join meeting rooms synced with Outlook, to unique keyboard shortcuts and programmable buttons to make everything from Teams to Excel seamless and slick
- Bring end users along for feedback and allow staff with requirements such as dealing with Carpal Tunnel or RSI to see if ergonomic equipment meets their needs
- Learn how to educate workforces on best practice for video conferencing, audio configuration, and more
- Work with a Sales Account Manager to craft a plan and curated IT kit that can be easily installed, monitored, and scaled for your unique business needs
