

WARM TIPS

ALLSTAND offers a lifetime warranty and please contact us for any quality issues.

Please read these warm tips before using our products.

When installing:

1. The light strip has cathode and anode poles. Connect the cathode and anode poles first, and then connect the power supply. **If the light doesn't work, try flipping one of the poles and re-operate.**

1. It is recommended not to fully tighten until assembly is complete, but to fully tighten after assembly is complete.

3. We have prepared the installation instruction for you in the packing box. Please follow the assembly steps accordingly.

4. We label every part to ensure that you get the correct one according to the instructions. Please contact us in case of any discrepancies.

5. If you feel the computer desk is slightly unstable after assembly, this is normal, you can adjust the foot pads to increase stability.

How to contact us?

1. There is an after-sales email on the manual, you can contact us through this.

2. You can contact us through the after-sales mailbox on the package.
