*Please note the VRT rebate will change as a result of your final vehicle configuration.

*Please note the SEAI grant amount can change as a result of your final vehicle configuration, please contact your local dealer for more information.

**Maximum electrical output of 250kW and 210kW (85x & 85x Sportline) can be accessed for a maximum of 10 seconds, calculated in accordance with UN GTR.21. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery. The availability of the maximum power requires the high-voltage battery to be between 23°C and 50°C and have a charge level of > 88%. Deviations from the aforementioned parameters in particular may lead to a reduction in power, through to the complete unavailability of the maximum power. To maintain the high-voltage battery's usable capacity as effectively as possible, a battery charging target of 80% is recommended if the vehicle is used daily (to be switched to 100% prior to long-distance journeys for example). With other engine-battery variants, the availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery.

ROTR = Recommended On the Road Price. All prices are recommended by ŠKODA Ireland and are inclusive of VAT. Available state subsidies for private customers comprise of VRT rebate and SEAI (Sustainable Energy Authority of Ireland) grant, subject to approval. Business/Commercial Buyers state subsidies comprise of VRT rebate only, subject to approval.

ŠKODA Ireland reserves the right to alter pricing and specification without notice. ŠKODA Ireland has made every effort to ensure the accuracy of information but does not accept liability for any errors or omissions. The specified power consumption values are the official figures obtained in accordance with Worldwide Harmonized Light Vehicles Test Procedure (WLTP), a more realistic test method for measuring fuel consumption (Wh/km) are correct at the time of print. The above values reflect the worldwide standard vehicle range excluding additional equipment such as optional extras and accessories which may have an effect on the power consumption (Wh/km). You can discover more about the WLTP at www.skoda-auto.com/services/wltp.

SKODA

Enyaq Coupé 60/85/85x: Key Equipment

SAFETY

Driver & front passenger airbags incl. passenger airbag deactivation
Front side airbags with curtain airbag
Lane assist
iSOFIX child seat anchor points
Seat belt warning system
Hill hold control
eCall emergency system
Turn assist
Front assist: Forward collision warning incl. emergency brake & pedestrian recognition
Tyre pressure monitoring system

FUNCTIONAL

Climatronic dual-zone air conditioning
Cruise control incl. speed limiter
Kessy Go – Keyless start/stop
Front & Rear parking sensors
Rear view camera
Power folding exterior mirrors
Automatic rain & light sensors
Auto-dimming rear view mirror
Front & rear electric windows
Mode-3 cable; 7.2kW AC (Wallbox/public charging)
Up to 120kW DC charging capability
Infotainment pack: 13" touchscreen display - Navigation system - Bluetooth & Voice control - Smartlink (Apple Carplay / Android Auto) 2x USB-C ports & 8 speakers - DAB – Digital radio reception - Infotainment Online (3 years subscription) - Remote access (3 years subscription)

EXTERIOR

19" 'Proteus' alloy wheels
Panoramic Sunroof
LED headlights & tail lights
LED daytime running lights
Chrome window surrounds
Radiator grille with chrome surround
Body coloured door sills and bumpers
Rear spoiler

INTERIOR

Black/Grey 'Loft' fabric & leatherette upholstery
Front centre armrest
Leather multi-function steering wheel
Front seats incl. height adjust (Manual)
Front seats incl. lumbar support (Manual)
Split folding rear seats incl. rear centre armrest
Front & rear floor mats
Storage compartment in boot
LED interior pack: - LED ambient lighting - LED footwell lights 'Welcome' logo projection

ADDITIONAL EQUIPMENT: 85 & 85x

Up to 135kW DC charging capability - 85
Up to 175kW DC charging capability - 85x

SKODA

Enyaq Coupé Sportline: Key Equipment

The Enyaq Sportline offers exclusive features & can be equipped to the 60, 85 & 85x. Key additional / replacement equipment includes:

EXTERIOR

20" 'Vega' anthracite alloy wheels incl. sports suspension

Sportline exterior styling pack:

- Front & rear sport bumpers
- Black roof rails
- Black window surrounds
- Black front grille & surround
- Black ŠKODA lettering
- Body coloured door sills & bumpers

Matrix LED headlights incl. headlight washers

LED tail lights incl. dynamic indicators

Panoramic sunroof

Rear spoiler

INTERIOR

Sportline interior styling pack:

- Leather & Suedia upholstery
- Front sport seats
- Dark interior headliner
- Leatherette wrapped silver stitched dashboard
- Carbon/Black decorative inserts
- Aluminium sport pedals

Leather heated sports steering wheel (3-spoke) incl. paddles for energy recuperation

Heated front seats & heated washer nozzles

Electric driver seat incl. electric lumbar & memory function

FUNCTION

Kessy Full - Keyless entry/go system

Walkaway locking

'SUNSET' dark tinted privacy glass

Acoustic side windows

Wireless charging pad (subject to device compatibility)

Drive mode select

Progressive steering

Adaptive lane assist incl. emergency assist

Climatronic 3-zone air conditioning

Roller blinds for rear side windows

Rear storage behind centre console

2x USB-C ports (rear)

Trailer hitch preparation

Virtual pedal – electric tailgate incl. motion sensor

SAFETY

Side Assist – blind spot monitoring system

Crew protect assist

Driver alert

Anti-theft alarm

Rear side airbag

ADDITIONAL EQUIPMENT: 85 & 85x

Up to 135kW DC charging capability - 85

Up to 175kW DC charging capability – 85x

SKODA

Enyaq Coupé RS: Key Equipment

The Enyaq RS offers exclusive features. Key additional / replacement equipment includes:

EXTERIOR

20" 'Taurus' black metallic with Aero trims

RS exterior styling pack:

- Front & rear sport bumpers with air curtains
- Exclusive RS badging
- Black window surrounds
- Black front grille surround
- Black ŠKODA lettering
- Body coloured door sills

Matrix LED headlights incl. headlight washers

LED tail lights incl. dynamic indicators

Crystal Face – illuminated front grille

Panoramic sunroof

Rear spoiler

INTERIOR

RS Lounge interior styling pack:

- Fabric & Suedia upholstery
- Lime stitched front sport seats
- Carbon/Black decorative inserts
- Aluminium sport pedals
- Dark interior headliner

Leather heated sports steering wheel (3-spoke) incl.

RS badging & paddles for energy recuperation

Heated front & rear seats & heated washer nozzles

Electric driver seat incl. electric lumbar & memory function

FUNCTION

Head Up display

Kessy Full -Keyless entry/go system

Walkaway locking

'SUNSET' dark tinted privacy glass

Acoustic side windows

Heated windscreen

Wireless charging pad (subject to device compatibility)

Drive mode select

Progressive steering

Adaptive lane assist incl. emergency assist

Climatronic 3-zone air conditioning

Roller blinds for rear side windows

Rear storage behind centre console

2x USB-C ports (rear)

Trailer hitch preparation

Virtual pedal – electric tailgate incl. motion sensor

Canton sound system

SAFETY

Side Assist – blind spot monitoring system

Crew protect assist

Anti-theft alarm

Driver alert

Rear side airbag

However, due to print processes, Škoda Ireland cannot guarantee that colours shown are 100% accurate. Please contact your local Škoda dealer for more information.

SKODA

Battery & Charging

An electric vehicle’s power is not determined solely by the power of the electric motor itself, but also by the power that the battery is able to deliver. As such, the value cited for the car’s power is determined by the entire drive system.

Battery	Number of modules*	Weight	Capacity	DC charging power	System output**
58 kWh	9	376 kg	156 Ah	120 kW	132 kW
77 kWh (85 version)	12	493 kg	234 Ah	135 kW	210 kW

*One module has 24 battery cells.
**The availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery.

Electric vehicles can be charged at public charging stations much like you would refuel a normal car at a petrol station. These charging stations are powerful so they can recharge vehicles’ batteries rapidly. Most users, however, will generally use a home charger – a Wallbox – or an ordinary power socket. This charging takes longer, but hooking up to the grid is an automatic process and you can charge the batteries overnight, or at any time you are not using the car, without having to be present.

Source	Charging	60	85	85x & RS	Cable
Home socket	Charging power Charging time (0-100%)	Max 2.3 kW >24 hours	Max 2.3 kW >24 hours	Max 2.3 kW >24 hours	Mode 2
Wallbox (3-phase)	Charging power Charging time (0-100%)	Max 11 kW 6 hours 15 mins	Max 11 kW 7 hours 30 mins	Max 11 kW 7 hours 30 mins	Mode 3
Wallbox (1-phase)	Charging power Charging time (0-100%)	Max 7.2 kW 9 hours 30 mins	Max 7.2 kW 13 hours	Max 7.2 kW 13 hours	Mode 3
DC fast charger	Charging power Charging time (10-80%)	Max 120 kW 35 mins	Max 135 kW 28 mins	Max 175 kW 28 mins	Mode 4 – part of charging station

• All charge times are average and can vary depending on certain conditions, such as temperature and power supply available.

Enyaq Coupé: Tyre & Maintenance Plan

The new Škoda Enyaq uses the latest materials and technologies that requires expert skills and knowledge when it comes to maintenance and care. For your convenience we have compiled a Tyre & Maintenance Plan as part of the vehicle delivery charge to provide up to 39% savings when compared to purchasing the services and components separately. See below for what is included in the Enyaq Tyre & Maintenance Plan.

3 Pin Home Charging Cable

Is essential when charging away from home or when public charging points cannot be accessed.

Routine Inspection 1 & 2 comprises of Electronic Health Checks to ensure your vehicle is free from faults and functioning correctly.

Service Interval Maintenance

High voltage component checks, Brake Fluid Change, Pollen Filter Replacement and a Coolant refill are the main tasks carried out by technicians during this service.

4 Low Rolling Resistance Tyres

provide better battery range and low cabin noise levels. They are likely to be the most expensive operating cost you will experience during the lifetime of the vehicle.

Brake Pads may require replacement during the Service Interval or if the vehicle signals the driver on the infotainment display.

Wiper Blades ensure maximum visibility and safety. A set of wiper blades is included in the Tyre & Maintenance Plan.

Tyre and Maintenance Plan Summary: Replacement Tyres - As required €1,240, Mode 2 Charging Cable for backup/domestic charging (supplied at delivery) -€274, Inspection 1 & 2 - Electronic Vehicle Health Check, Functionality and Fault Assessment -€70, Routine Service Maintenance - High Voltage Component Check, Running Gear Assessment, High Voltage Battery Status, Brake Fluid Change, Pollen Filter Replacement, Top-up Cooling System Levels- €209, Brake Pad Replacement - As required-€175, Wiper Blade Replacement - As required -€96. Total value if purchased separately €2,064. As part of Tyre and Maintenance Plan €1,250 (saving of 39%). Price based on component recommended retail price and average dealer labour rates. Tyre prices are based on 21" Self Sealing Technology. Please discuss your Tyre & Maintenance Plan requirements with your local ŠKODA Dealer.

*Maximum electrical output of 250kW and 210kW (85x & 85x Sportline) can be accessed for a maximum of 10 seconds, calculated in accordance with UN GTR.21. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery. The availability of the maximum power requires the high-voltage battery to be between 23°C and 50°C and have a charge level of > 88%. Deviations from the aforementioned parameters in particular may lead to a reduction in power, through to the complete unavailability of the maximum power. To maintain the high-voltage battery's usable capacity as effectively as possible, a battery charging target of 80% is recommended if the vehicle is used daily (to be switched to 100% prior to long-distance journeys for example). With other engine-battery variants, the availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery.
