Elektor is the world's leading source of essential technical information and electronics products for pro engineers, electronics designers, and the companies seeking to engage them. Each day, our international team develops and delivers high-quality content - via a variety of media channels (including magazines, video, digital media, and social media) in several languages - relating to electronics design and DIY electronics. www.elektormagazine.com

Contents

Preface	13
Foreword from: Ethics in Electronics	15
Netflix Helps!	15
Chapter 1 • Workshop Environment, Tools, and Electronics Planning	16
1.1 Organization	16
1.1.1 Organizational tips	17
1.1.2 Procurement and storage of items	18
1.1.3 Other storage tips	20
1.1.4 Keep or discard?	22
1.2 Work Environment and Fixtures	22
1.2.1 Electrical power and lighting	22
1.2.2 Heating and cooling	22
1.3 Resourcing Existing Materials for Setting up a Workshop	22
1.4 Work Gear	26
1.4.1 Recommended work gear	27
1.5 Planning Your Repair	29
1.5.1 Management of unforeseen delays and failed outcomes	29
1.5.2 Planning strategies for repairs	30
Summary	34
Chapter 2 • Workshop Electronics Tools and Practices	36
2.1 Working with Hand Tools	36
2.1.1 Overall practice	36
2.2 Tools and accessories used for electronics	37
2.2.1 Screwdrivers	37
2.2.2 Screwdriver types	38
2.2.3. Fastener removal	39
2.2.2 Other commonly used hand tools	39
2.2.3 Other principal servicing aids	41
2.3 Tool Maintenance	42
2.3.1 Electrical safety of power tools and equipment	42

2.3.2 Regular Inspection and maintenance of tools	42
2.3.2.1 Cleaning and sharpening a grindstone	43
2.3.3 Cleaning and lubricating your tools	43
2.3.4 Storing tools with care.	43
2.4 Tool quality	44
2.5 Innovative ways of using tools	44
Summary	45
Chapter 3 • Soldering.	46
3.1 Soldering Irons	46
3.2 Soldering Bits	47
3.3 Solder Types and Sizes.	48
3.4 Soldering & Desoldering	49
3.4.1 Tinning preparation.	49
3.4.2 Procedure for soldering	49
3.4.3 Procedure for desoldering	51
3.4.4 Working with SMDs / SMA parts	52
3.5 Other Soldering Aids	52
3.6 Dry Joints.	54
3.7 PCB Repairs	55
3.9 Soldering and Safety.	56
3.10 Solder Equipment Maintenance	57
Summary	57
Chapter 4 • Fix, Restore, or Hack?	58
4.1 Understanding the Product	58
4.2 Planning Your Repair	58
4.3 Initial, Basic Checks.	59
4.4 General Disassembly Procedures	60
4.5 General Reassembly Procedures	61
4.5.1 Wiring and cables	62
4.5.2 Ribbon cables and sockets	62
4.6 More Disassembly and Reassembly Tips	62
4.7 Other Assembly Considerations.	63

4.7.1 TV Panels and displays	63
4.7.2 CRT TVs and monitors	64
4.7.3 Smartphones and tablets.	65
4.7.4 Portable Electronic MP3 and MP4 Players (Old and New)	65
4.7.5 Receivers, compact cassette decks, and audio amplifiers	65
4.7.6 Speakers, remote controls, and other connecting accessories.	66
4.7.7 Laptop and desktop PCs.	66
4.7.8 CD and DVD players	69
4.7.9 VCRs and Camcorders	70
4.7.10 Portable compact audio cassette players	71
4.7.11 Turntables	73
Summary	73
Chapter 5 • Repairing Audio and Hi-Fi Products	74
5.1 Breaking Down the Key Areas of a Product for Examination	74
5.2 Common Problems with Audio and Hi-Fi Products	77
5.2.1 Portable electronic MP3 and MP4 players (old and new).	77
5.2.2 Receivers, compact cassette decks and audio amplifiers	77
5.2.3 Loudspeakers, remote controls, and other connecting accessories	100
5.2.3 Portable compact audio cassette players	104
5.2.4 Turntables	106
5.2.5 CD and DVD players	111
Summary	120
Chapter 6 • Repairing Video, PC, and Phone Products.	121
6.1 TV Panels and Displays.	121
6.1.1 Vintage CRT TVs and Monitors	122
6.1.2 Plasma (PDP) TVs.	127
6.1.3 LCD TVs	130
6.2 VCRs and Cassette Tape Camcorders	134
6.2.1 VCRS (Video Cassette Recorders)	134
6.2.1.1 Tape transport adjustments	137
6.2.1.2 Video head cleaning, wear, and management	139
6.2.1.3 Cleaning, lubricating, and maintaining mechanical parts in tape path	140

6.2.1.4 Servo and Motor Issues	141
6.2.1.5 Luminance and Chroma issues.	142
6.2.1.6 Understanding and management of video tapes.	142
6.2.2 Tape based Camcorders.	144
6.2.2.1 Functional sections of the tape-based Camcorder	145
6.2.2.2 Mechanical operation and faults	147
6.3 Laptop and Desktop PCs.	149
6.4 Smartphones and Tablets	154
Summary.	156
Chapter 7 • Finding Product Information and Replacement Parts	157
7.1 Identifying Product Information	158
7.1.2 Manufacturer's information	158
7.1.3 Obtaining vintage product information	159
7.2 Other Sources of Product Information	159
7.2.1 Sourcing by Internet searching.	159
7.2.2 Data reference books and periodicals	159
7.2.3 Tertiary education and government sources	160
7.2.4 Circuit tracing (manual approach or using software)	160
7.2.5 Obtaining information from a working duplicate product	160
7.2.6 Shared Knowledge	161
7.3 Identifying and Finding Replacement Parts	161
7.3.1 Common parts that fail	161
7.3.2 Identifying replacement parts.	162
7.3.3 Identifying faulty discrete semiconductors without a schematic	162
7.3.4 Finding spare parts for your workshop.	163
7.4 Specific Component Considerations	164
7.4.1 Hardware.	164
7.4.2 Power source, switching and related components	165
7.4.3 Lighting components.	168
7.4.4 Passive and active components.	168
7.4.5 Selecting a suitable replacement part	171
7.4.6 Difficult to get critical replacement parts	172

Summary	174
Chapter 8 • Using Salvaged Parts for Your Workshop	175
8.1 Guidelines to Salvaging Components	176
8.2 Assessment of Reusable Common Components	177
8.2.1 Capacitors	178
8.2.2 Resistors	178
8.2.3 Other passive components	179
8.2.4 Semiconductors	180
8.2.5 Power source, switching and related components	181
8.2.6 Switches	181
8.2.7 LEDS, lamps, and displays	181
8.2.8 Hardware, wiring and connectors	182
8.2.9 Motors and associated mechanical components	183
8.2.10 Audio sound transducers	184
8.2.11 Relays	184
8.2.12 Accessories and external components	184
8.2.13 Vintage audio and video products	184
8.2.14 Other miscellaneous parts	185
8.3 Examples of consumer part teardowns and parts obtained	185
8.4 Tools for the Job	188
8.5 Using Salvaged Parts for Your Workshop.	192
8.6 Salvaged Components Organization	194
Summary	194
Chapter 9 • Consumer Product Testing – An Overall Approach	196
9.1. Safety Matters in the Workshop	196
9.1.1 PPE (personal protective equipment) and environment	197
9.1.2 Electrical safety	197
9.1.3 Chemical security	198
9.1.4 Mechanical safety	200
9.1.5 Safe handling practices for components.	201
9.1.6. Actions to avoid when repairing consumer products	201
9.2 Essential Gear for Your Workshop: Specifications and Features	203

- 9.2.1 Power supplies 203
- 9.2.2 Multimeters 207
- 9.2.3 Oscilloscopes 212
- 9.2.4 Other test gear 216
- 9.3 Component testing 218
 - 9.3.1 Testing Resistors 220
 - 9.3.2 Testing Capacitors 225
 - 9.3.3 Semiconductors 226
- Summary 231
- Chapter 10 • Benchtop Repair and Parts Rescue Demos 232**
 - 10.1 TV Remote Control (R/C) 232
 - 10.1.1 Initial assessment 232
 - 10.1.2 Finding information and sourcing parts 233
 - 10.1.3 Diagnosing the fault 233
 - 10.1.4 Tools and aids used 234
 - 10.1.5 Product disassembly and reassembly 234
 - 10.1.6 The repair process 235
 - 10.1.7 Testing and commissioning 235
 - 10.1.8 Preventive Maintenance 235
 - 10.2 Household Vacuum Cleaner 235
 - 10.2.1 Initial assessment 235
 - 10.2.2 Safe-practice procedures 236
 - 10.2.3 Finding information 236
 - 10.2.4 Product disassembly and reassembly 237
 - 10.2.5 Diagnosing the fault 238
 - 10.2.6 Tools and aids used 239
 - 10.2.7 Parts sourcing 239
 - 10.2.8 The repair process 239
 - 10.2.9. Testing and commissioning. 239
 - 10.2.10 Preventive maintenance 239
 - 10.3 Korg 800 Music Synthesizer 240
 - 10.3.1 Initial assessment 240

10.3.2 Finding information	240
10.3.3 Product disassembly and reassembly.	240
10.3.4 Diagnosing the fault	241
10.3.5 Tools and aids used	241
10.3.6 Parts sourcing	241
10.3.7 Salvaging spare parts and uses.	242
10.3.8 The repair process	242
10.3.9 Testing and commissioning	242
10.3.10 Preventive maintenance	243
10.4 Boss (Roland) Reverb Unit	243
10.4.1 Initial assessment	243
10.4.2 Finding information	243
10.4.3 Product disassembly and reassembly.	243
10.4.4 Diagnosing the fault	244
10.4.5 Tools and aids used	244
10.4.6 Finding parts	244
10.4.7 The repair process	245
10.4.8 Testing and commissioning	245
10.5 Sandwich Press	246
10.5.1 Initial Assessment	246
10.5.2 Safe Practicing procedures	246
10.5.3 Finding information	247
10.5.4 Disassembly of Product	248
10.5.5 Diagnosing the fault	248
10.5.6 Tools and aids used	249
10.5.7 Testing of salvaged parts	249
10.5.8 Salvaging parts and uses	249
10.6 VCR (VHS)	250
10.6.1 Initial Assessment	250
10.6.2 Finding information	253
10.6.3 Disassembly and Reassembling Product.	253
10.6.4 History of faults and maintenance	254

10.6.5 Tools and aids used	256
10.6.6 Finding parts	256
10.6.7 Repair and Maintenance processes	256
10.7 Turntable	258
10.7.1 Initial assessment	258
10.7.2 Finding information	258
10.7.3 Disassembly and reassembly	259
10.7.4 Diagnosing the fault	259
10.7.5 Tools and aids used	261
10.7.6 Finding parts	261
10.7.7 Repair Process and commissioning process.	261
10.7.8 Maintenance	261
10.8 Portable Radio/ Cassette Player	262
10.8.1 Initial assessment	262
10.8.2 Finding information	263
10.8.3 Disassembly and Reassembly	264
10.8.4 Diagnosing the fault	264
10.8.5 Tools and aids used	265
10.8.6 Finding parts	265
10.8.7 Repair Process	265
10.8.8 Commissioning	266
10.8.9 Maintenance	267
10.9 Faultfinding Summary	267
Summary	268
Appendix A • Common Audio Connectors and Pinouts	269
Appendix B • Functional Block Diagrams for VCR and TV	270
Appendix C • Resources	272
C.1. Bibliography and Suggestions for Further Reading	272
C.2. Web Resources.	272
C.3. Acknowledgements for Images from Online Sources.	273
Index	275
