ISTQB AT LUMIFY WORK

Since 1997, Planit has established its reputation as the world leading provider of software testing training, sharing their extensive knowledge and experience through a comprehensive range of international best-practice training courses like ISTQB.

Lumify Work's software testing training courses are delivered in partnership with Planit.

WHY STUDY THIS COURSE

Want to learn about the fundamentals of testing in Agile projects? In this extension to the ISTQB® Foundation course, you will gain an understanding of how Agile projects are organised. You'll also learn commonly applied development practices, differences between Agile and traditional approaches, and commonly used testing tools.

By the end of this course, you will recognise how testers are positioned in Agile organisations. You will also be able to effectively estimate and organise testing, as well as apply risk-based testing in Agile projects.

Included with this course:

- Comprehensive course manual

- Revision questions for each module

- Practice exam

- Pass guarantee: if you don't pass the exam first time, re-attend the course for free within 6 months

- 12 months' access to the online self-study course after attending this instructor-led course

Please note: The exam is not included in the course fee but can be purchased separately. Please contact us for a quote.

WHAT YOU'LL LEARN

Learning outcomes:

> Collaborate in a cross-functional Agile team

> Understand principles and basic practices of Agile software development

> *My instructor was great being able to put scenarios into real world instances that related to my specific situation.*
>
> *I was made to feel welcome from the moment I arrived and the ability to sit as a group outside the classroom to discuss our situations and our goals was extremely valuable.*
>
> *I learnt a lot and felt it was important that my goals by attending this course were met.*
>
> *Great job Lumify Work team.*
