Washing Instruction

- ◆ **Prepare**
 1. The machine should be placed on flat ground. The bottom window of washing machine can not be blocked when use it.
 2. This machine requires to use the an bipolar plug to assure the safety of the machine when working. Do not connect the ground wire to the water pipe, gas pipe, heating pipes and so on.
 3. Lay down the overflow hose. (Do not lay down the hose when machine is on up drain function.)
 4. Use the water hose to connect the water tap to the water inlet.
 5. According to the material and weight of cloth, adjust the level of water.
 6. Switch on power.
 7. Before washing, operator must separate light colour clothes and faded colour clothes.
- ◆ **Washing**
 1. Put the clothes and correct amount of detergent into the tub. (Excessive detergent will make it difficult to get rid of the suds and insufficient rinsing may result)
 2. Turn on the tap valve, inlet water and adjust the water level according to the requirement.
 3. Set the wash drain-switch to strength or tender according to the material and weight of clothes.
 4. Set the wash timer knob to the proper position and start to wash.
 5. After wash, set the wash-drain switch to the drain position to drain water.
 6. It is strictly prohibited to put feather clothes into the Spin-tub to dehydrate.
- ◆ **Spin-drying**
 1. After drain of water, put the clothes to the right spin-tub and hold down the clothes.
 2. Put down the safety lid and spin-dry lid in turn.
 3. Set the spin-dry timer to the proper time according to the clothes.
- ◆ **Drain washing**
 1. After drying, inlet water to the spin-dry barrel for 20-30 seconds.
 2. According to the spin-drying process, dry the clothes for 1 minute, then spin 1-2 minutes again.
- ◆ **Rinsing**
 1. After drying as the spin-dry tub finally stop, open the spin-basket, safety lid and spin-dry lid in turn, take out the clothes to the washing tub and prepare to rinse.
 2. Besides no more putting the detergent, the rinsing process have no difference with the washing process.

Maintenance

- Ensure that the machine is unplugged after usage

Do not place the washing machine near fire hazard.

Do not put any hot or heavy objects on the machine.

When cleaning the main body, use soft cloth only. Steel bristle or organic solvent might cause damage to the finishing.

Do not place the machine outdoor, under hot sun or in damp places.

After Use

1. Disconnect the plug and place at the proper position.
2. Drain off the water, which remains in the tub.
3. Turn over the filter and wash it.
4. Bring in the water inlet hose and hang the drain hose.

When the machine is on updrain function bring in the water inlet hose only. Put all lids on. In addition place the machine on a well-ventilated area.
